

CHADALAWADA RAMANAMMA ENGINEERING COLLEGE (AUTONOMOUS)

Approved by AICTE, New Delhi & Affiliated to JNTUA, Anantapur, A.P
Accredited by NAAC with "A" Grade, An ISO 9001 - 2015 Certified Institution

1.1.3

List of courses offered across all programs during last five years

AY 2021-22

S.No	Program code	Program name	Course code	Course name	Year of offering the course
1	2	B.Tech EEE	20CA54301	Mathematics -I	2021-22
2	2	B.Tech EEE	20CA51101	Engineering Chemistry	2021-22
3	2	B.Tech EEE	20CA52101	Communicative English	2021-22
4	2	B.Tech EEE	20CA03101	Engineering Graphics & Design	2021-22
5	2	B.Tech EEE	20CA03102	Basic Civil & Mechanical Engineering	2021-22
6	2	B.Tech EEE	20CA52102	Communicative English Lab	2021-22
7	2	B.Tech EEE	20CA51102	Engineering Chemistry Lab	2021-22
8	2	B.Tech EEE	20CA03102	Engineering and IT Workshop	2021-22
9	2	B.Tech EEE	20CA54201	Mathematics - II	2021-22
10	2	B.Tech EEE	20CA55101	Engineering Physics	2021-22
11	2	B.Tech EEE	20CA02201	Electrical Circuits - I	2021-22
12	2	B.Tech EEE	20CA04301	Electronic Devices and Circuits	2021-22
13	2	B.Tech EEE	20CA05101	Problem Solving with Programming in C	2021-22
14	2	B.Tech EEE	20CA55102	Engineering Physics Lab	2021-22
15	2	B.Tech EEE	20CA05102	Problem Solving with Programming in C Lab	2021-22
16	2	B.Tech EEE	20CA02202	Electrical Electronics Engineering Workshop	2021-22
17	2	B.Tech EEE	20CA51201	Environmental Science (Mandatory course - I)	2021-22
18	2	B.Tech EEE	20CA54301	Mathematics - III	2021-22
19	2	B.Tech EEE	20CA02301	Electrical Circuits - II	2021-22
20	2	B.Tech EEE	20CA02302	Electrical Machines - I (DC Machines and transformers)	2021-22
21	2	B.Tech EEE	20CA02303	Electromagnetic Fields	2021-22
22	2	B.Tech EEE	20CA04201	Digital Electronics and Logic Design	2021-22
23	2	B.Tech EEE	20CA02304	Electrical Circuits - I Lab	2021-22
24	2	B.Tech EEE	20CA04304	Electronic Devices and Circuits Lab	2021-22
25	2	B.Tech EEE	20CA02305	Electrical Machines - I Lab	2021-22
26	2	B.Tech EEE	20CA02306	Skill Oriented Course-I	2021-22
27	2	B.Tech EEE	20CA53201	Universal Human Values and Ethics Mandatory course - II	2021-22
28	2	B.Tech EEE	19CA54401	Mathematics - IV	2021-22
29	2	B.Tech EEE	20CA02401	Control Systems	2021-22
30	2	B.Tech EEE	20CA02402	Power System - I	2021-22
31	2	B.Tech EEE	20CA02403	Electrical Machines - II	2021-22
32	2	B.Tech EEE	20CA04406	Analog and Digital IC Applications	2021-22
33	2	B.Tech EEE	20CA02404	Electrical Circuits - II Lab	2021-22
34	2	B.Tech EEE	19CA02405	Electrical Machines - II Lab	2021-22
35	2	B.Tech EEE	20CA52401	Advanced Communicative English Lab	2021-22
36	2	B.Tech EEE	20CA02406	Skill oriented course - II	2021-22
37	2	B.Tech EEE	19CA04510	Linear & Digital Electronics	2021-22
38	2	B.Tech EEE	19CA04504	Microprocessors and Microcontrollers	2021-22
39	2	B.Tech EEE	19CA02501	Power Systems - II	2021-22
40	2	B.Tech EEE	19CA02502	Power Electronics	2021-22
41	2	B.Tech EEE	19CA02505	Modern Control Theory	2021-22
42	2	B.Tech EEE	19CA05403	Java Programming	2021-22
43	2	B.Tech EEE	19CA04511	Microprocessors & Microcontrollers Lab	2021-22
44	2	B.Tech EEE	19CA02503	Electrical Machines - II Lab	2021-22
45	2	B.Tech EEE	19CA02504	Power Electronics Lab	2021-22
46	2	B.Tech EEE	19CA02505	Socially Relevant Project II	2021-22
47	2	B.Tech EEE	19CA05505	AI Tools, Techniques and Applications	2021-22
48	2	B.Tech EEE	19CA02601	Electrical Measurements and Instrumentation	2021-22
49	2	B.Tech EEE	19CA02602	Power System Analysis	2021-22
50	2	B.Tech EEE	19CA05201	Python Programming	2021-22
51	2	B.Tech EEE	19CA39601	Managerial Economics and Financial Analysis	2021-22
52	2	B.Tech EEE	19CA52603	Soft Skills	2021-22
53	2	B.Tech EEE	19CA02603	Power System Analysis Lab	2021-22

54	2	B.Tech EEE	19CA02604	Electrical Measurements and Instrumentation Lab	2021-22
55	2	B.Tech EEE	19CA05404	OOPs Through Java Programming Lab	2021-22
56	2	B.Tech EEE	19CA02605	Socially Relevant Project III	2021-22
57	2	B.Tech EEE	17CA02701	Power System Operation and Control	2021-22
58	2	B.Tech EEE	17CA02702	Utilization of Electrical Energy	2021-22
59	2	B.Tech EEE	17CA02705	Flexible Alternating Current Transmission Systems	2021-22
60	2	B.Tech EEE	17CA02713	PLC and Automation Laboratory	2021-22
61	2	B.Tech EEE	17CA02714	Power System Computer Aided Design Laboratory	2021-22
62	2	B.Tech EEE	17CA02715	Technical Seminar	2021-22
63	2	B.Tech EEE	17CA57711	AI Master Class Using Matlab (VAC-III)	2021-22
64	2	B.Tech EEE	17CA02717	Wind Energy	2021-22
65	2	B.Tech EEE	17CA02718	Solar Energy Basics	2021-22
66	2	B.Tech EEE	17CA02719	Electrical Utilities Fundamentals Future	2021-22
67	2	B.Tech EEE	17CA02720	Wireless Communication for Energy Body	2021-22
68	2	B.Tech EEE	17CA02721	Advance in UHV Transmission & Distribution	2021-22
69	2	B.Tech EEE	17CA02722	Introduction to Smart Grid	2021-22
70	2	B.Tech EEE	17CA02723	Power System Protection and Switch Gear	2021-22
71	2	B.Tech EEE	17CA02724	Electric Power System	2021-22
72	2	B.Tech EEE	17CA02801	HVDC & FACTS	2021-22
73	2	B.Tech EEE	17CA02804	Advanced Control Systems	2021-22
74	2	B.Tech EEE	17CA02806	Comprehensive Online Examination	2021-22
75	2	B.Tech EEE	17CA02807	Project Work	2021-22
76	3	B.Tech MECH	20CA54101	Mathematics I	2021-22
77	3	B.Tech MECH	20CA55103	Engineering Physics	2021-22
78	3	B.Tech MECH	20CA52101	Communicative English	2021-22
79	3	B.Tech MECH	20CA02101	Essential Electrical and Electronic Engineering	2021-22
80	3	B.Tech MECH	20CA05101	C Programming Language	2021-22
81	3	B.Tech MECH	20CA52102	Communicative English Lab	2021-22
82	3	B.Tech MECH	20CA55102	Engineering Physics Lab	2021-22
83	3	B.Tech MECH	20CA05102	C Programming Lab	2021-22
84	3	B.Tech MECH	20CA54201	Mathematics II	2021-22
85	3	B.Tech MECH	20CA51101	Engineering Chemistry	2021-22
86	3	B.Tech MECH	20CA03201	Engineering Graphics	2021-22
87	3	B.Tech MECH	20CA03202	Engineering Mechanics	2021-22
88	3	B.Tech MECH	20CA03203	Material Science and Engineering	2021-22
89	3	B.Tech MECH	20CA03102	Engg. Workshop	2021-22
90	3	B.Tech MECH	20CA51102	Engineering Chemistry Lab	2021-22
91	3	B.Tech MECH	20CA02205	Essential Electrical and Electronic Engineering Lab	2021-22
92	3	B.Tech MECH	20CA53201	Universal Human Values and Ethics (MC-I)	2021-22
93	3	B.Tech MECH	20CA54301	Mathematics III	2021-22
94	3	B.Tech MECH	20CA03301	Kinematics of Machinery	2021-22
95	3	B.Tech MECH	20CA03302	Strength of Materials	2021-22
96	3	B.Tech MECH	20CA03303	Manufacturing Processes	2021-22
97	3	B.Tech MECH	20CA03304	Thermodynamics	2021-22
98	3	B.Tech MECH	20CA03305	Material Science and Engineering Lab	2021-22
99	3	B.Tech MECH	20CA03306	Strength of Materials Lab	2021-22
100	3	B.Tech MECH	20CA03307	Manufacturing Processes Lab	2021-22
101	3	B.Tech MECH	SC-I	Skill Oriented Course	2021-22
102	3	B.Tech MECH	20CA51201	Environmental Science (MC-II)	2021-22
103	3	B.Tech MECH	20CA54402	Probability and Statistics	2021-22
104	3	B.Tech MECH	20CA03401	Dynamics of Machinery	2021-22
105	3	B.Tech MECH	20CA03402	Machine Tools	2021-22
106	3	B.Tech MECH	20CA03403	Thermal Engineering	2021-22
107	3	B.Tech MECH	20CA03404	Machine Drawing	2021-22
108	3	B.Tech MECH	20CA52401	Advanced English Communication Lab	2021-22
109	3	B.Tech MECH	20CA03405	Machine Tools Lab	2021-22
110	3	B.Tech MECH	20CA03406	Thermal Engineering Lab	2021-22
111	3	B.Tech MECH	SC-II	Skill Oriented Course	2021-22
112	3	B.Tech MECH	19CA03501	Applied Thermodynamics	2021-22
113	3	B.Tech MECH	19CA03502	Manufacturing Technology	2021-22
114	3	B.Tech MECH	19CA03503	Fluid Mechanics and Hydraulic Machinery	2021-22
115	3	B.Tech MECH	19CA03504	Design of Machine Elements-I	2021-22
116	3	B.Tech MECH	19CA03507	Industrial Engineering and Management	2021-22
117	3	B.Tech MECH	19ca04508	Introduction to MEMS	2021-22
118	3	B.Tech MECH	19CA03510	Applied Thermodynamics Lab	2021-22
119	3	B.Tech MECH	19CA03511	Manufacturing Technology Lab	2021-22

3.1 List of courses offered across all programs during last five years

AY 2018-19

S.No	Program code	Program name	Course code	Course name	Year of offering the course
1	2	B.Tech EEE	17CA52101	Functional English	2018-2019
2	2	B.Tech EEE	17CA54101	Mathematics-I	2018-2019
3	2	B.Tech EEE	17CA05101	Computer Programming	2018-2019
4	2	B.Tech EEE	17CA55101	Engineering Physics	2018-2019
5	2	B.Tech EEE	17CA09101	Engineering Drawing	2018-2019
6	2	B.Tech EEE	17CA52102	English Language and Communication Skills Lab	2018-2019
7	2	B.Tech EEE	17CA55102	Engineering Physics Lab	2018-2019
8	2	B.Tech EEE	17CA05102	Computer Programming Lab	2018-2019
9	2	B.Tech EEE	17CA50101	Foundation of Yoga (Audit Course)	2018-2019
10	2	B.Tech EEE	17CA52201	English for Professional Communication	2018-2019
11	2	B.Tech EEE	17CA54201	Mathematics -II	2018-2019
12	2	B.Tech EEE	17CA51101	Engineering Chemistry	2018-2019
13	2	B.Tech EEE	17CA51102	Environmental Studies	2018-2019
14	2	B.Tech EEE	17CA02201	Electrical Circuits-I	2018-2019
15	2	B.Tech EEE	17CA09209	Engineering & I.T. Workshop	2018-2019
16	2	B.Tech EEE	17CA51103	Engineering Chemistry Laboratory	2018-2019
17	2	B.Tech EEE	17CA02202	Electrical Circuits Laboratory	2018-2019
18	2	B.Tech EEE	17CA50201	Clinical Psychology(Audit Course)	2018-2019
19	3	B.Tech MECH	17CA52101	Functional English	2018-2019
20	3	B.Tech MECH	17CA54101	Mathematics-I	2018-2019
21	3	B.Tech MECH	17CA05101	Computer Programming	2018-2019
22	3	B.Tech MECH	17CA51101	Engineering Chemistry	2018-2019
23	3	B.Tech MECH	17CA51102	Environmental Studies	2018-2019
24	3	B.Tech MECH	17CA52102	English Language and Communication Skills Lab	2018-2019
25	3	B.Tech MECH	17CA51103	Engineering Chemistry Lab	2018-2019
26	3	B.Tech MECH	17CA05102	Computer Programming Lab	2018-2019
27	3	B.Tech MECH	17CA50101	Foundation of Yoga (Audit Course)	2018-2019
28	3	B.Tech MECH	17CA52201	English for Professional Communication	2018-2019
29	3	B.Tech MECH	17CA54201	Mathematics -II	2018-2019
30	3	B.Tech MECH	17CA55101	Engineering Physics	2018-2019
31	3	B.Tech MECH	17CA09101	Engineering Drawing	2018-2019
32	3	B.Tech MECH	17CA09202	Material Science and Engineering	2018-2019
33	3	B.Tech MECH	17CA09203	Engineering & I.T. Workshop	2018-2019
34	3	B.Tech MECH	17CA55102	Engineering Physics Laboratory	2018-2019
35	3	B.Tech MECH	17CA09204	Material Science and Engineering Laboratory	2018-2019
36	3	B.Tech MECH	17CA50201	Clinical Psychology(Audit Course)	2018-2019
37	4	B.Tech ECE	17CA52101	Functional English	2018-2019
38	4	B.Tech ECE	17CA54101	Mathematics-I	2018-2019
39	4	B.Tech ECE	17CA05101	Computer Programming	2018-2019
40	4	B.Tech ECE	17CA51101	Engineering Chemistry	2018-2019
41	4	B.Tech ECE	17CA51102	Environmental Studies	2018-2019
42	4	B.Tech ECE	17CA52102	English Language and Communication Skills Lab	2018-2019
43	4	B.Tech ECE	17CA51103	Engineering Chemistry Lab	2018-2019
44	4	B.Tech ECE	17CA05102	Computer Programming Lab	2018-2019
45	4	B.Tech ECE	17CA50101	Foundation of Yoga (Audit Course)	2018-2019
46	4	B.Tech ECE	17CA52201	English for Professional Communication	2018-2019
47	4	B.Tech ECE	17CA54201	Mathematics -II	2018-2019
48	4	B.Tech ECE	17CA55101	Engineering Physics	2018-2019
49	4	B.Tech ECE	17CA09101	Engineering Drawing	2018-2019
50	4	B.Tech ECE	17CA02203	Network Analysis	2018-2019
51	4	B.Tech ECE	17CA09203	Engineering & I.T. Workshop	2018-2019
52	4	B.Tech ECE	17CA55102	Engineering Physics Laboratory	2018-2019
53	4	B.Tech ECE	17CA02204	Network Analysis Laboratory	2018-2019
54	4	B.Tech ECE	17CA50201	Clinical Psychology(Audit Course)	2018-2019
55	5	B.Tech CSE	17CA52101	Functional English	2018-2019

COMMUNICATIVE ENGLISH

I B.Tech I Semester: Common to all branches

Course code	Category	Hours/week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
20CA52101	Foundation	3	-	-	3	30	70	100
Contact Classes:46	Tutorial Classes: Nil	Practical Classes: Nil			Total Classes:46			

OBJECTIVES:

The course should enable the students to :

- I. Facilitate effective listening skills for better comprehension of academic lectures and English spoken by native speakers
- II. Focus on appropriate reading strategies for comprehension of various academic texts and authentic materials
- III. Help improve speaking skills through participation in activities such as role plays, discussions and structured talks/oral presentations
- IV. Impart effective strategies for good writing and demonstrate the same in summarizing, writing well organized essays, record and report useful information
- V. Provide knowledge of grammatical structures and vocabulary and encourage their appropriate use in speech and writing

UNIT-I **Lesson: On the Conduct of Life; William Hazlitt** **Classes:10**

Listening: Identifying the topic, the context and specific pieces of information by listening to short audio texts and answering a series of questions.

Speaking: Asking and answering general questions on familiar topics such as home, family, work, studies and interests; introducing oneself and others.

Reading: Skimming to get the main idea of a text; scanning to look for specific pieces of information.

Reading for Writing: Beginnings and endings of paragraphs - introducing the topic, summarizing the main idea and/or providing a transition to the next paragraph.

Grammar and Vocabulary: Content words and function words; word forms: verbs, nouns, adjectives and adverbs; nouns: countables and uncountables; singular and plural; basic sentence structures; simple question form - wh-questions; word order in sentences.

Learning Outcomes

At the end of the module, the learners will be able to

DIRECTOR

Chadalawada Ramanamma Engineering College
(AUTONOMOUS)
TIRUPATI

- Understand social or transactional dialogues spoken by native speakers of English and identify the context, topic, and pieces of specific information
- Ask and answer general questions on familiar topics and introduce oneself/others
- Employ suitable strategies for skimming and scanning to get the general idea of a text and locate specific information
- Recognize paragraph structure and be able to match beginnings/endings/headings with paragraphs
- Form sentences using proper grammatical structures and correct word forms

UNIT-II	Lesson: The Brook: Alfred Tennyson	Classes:10
----------------	---	-------------------

Listening: Answering a series of questions about main idea and supporting ideas after listening to audio texts.

Speaking: Discussion in pairs/ small groups on specific topics followed by short structured talks.

Reading: Identifying sequence of ideas; recognizing verbal techniques that help to link the ideas in a paragraph together.

Writing: Paragraph writing (specific topics) using suitable cohesive devices; mechanics of writing - punctuation, capital letters.

Grammar and Vocabulary: Cohesive devices - linkers, sign posts and transition signals; use of articles and zero article; prepositions.

Learning Outcomes

At the end of the module, the learners will be able to

- comprehend short talks on general topics
- participate in informal discussions and speak clearly on a specific topic using suitable discourse markers
- understand the use of cohesive devices for better reading comprehension
- write well structured paragraphs on specific topics
- identify basic errors of grammar/ usage and make necessary corrections in short texts

UNIT-III	Lesson: The Death Trap: Saki	Classes:10
-----------------	-------------------------------------	-------------------

Listening: Listening for global comprehension and summarizing what is listened to.

Speaking: Discussing specific topics in pairs or small groups and reporting what is discussed

Reading: Reading a text in detail by making basic inferences -recognizing and interpreting specific context clues; strategies to use text clues for comprehension.

Writing: Summarizing - identifying main idea/s and rephrasing what is read; removing redundancies and repetitions.

Grammar and Vocabulary: Verbs - tenses; subject-verb agreement; direct and indirect speech, reporting verbs for academic purposes.

Learning Outcomes

At the end of the module, the learners will be able to

- comprehend short talks and summarize the content with clarity and precision
- participate in informal discussions and report what is discussed
- infer meanings of unfamiliar words using contextual clues

**CHADALAWADA RAMANAMMA ENGINEERING COLLEGE****(Autonomous)****COMPUTER SCIENCE AND ENGINEERING****COURSE STRUCTURE & SYLLABI (R20)****(w.e.f Academic Year 2020-21)****Communicative English Lab**

I B. Tech - I Semester : (Common to All Branches of Engineering)									
Course code	Category	Hours/week			Credits		Maximum Marks		
		L	T	P	C	CIA	SEE	TOTAL	
20CA52102	Foundation	-	-	3	1.5	30	70	100	
Contact Classes:	Tutorial Classes: Nil		Practical Classes:45			Total Classes:45			

OBJECTIVES:**The course should enable the :**

- students will be exposed to a variety of self instructional, learner friendly modes of language learning
- students will learn better pronunciation through stress, intonation and rhythm
- students will be trained to use language effectively to face interviews, group discussions, public speaking
- students will be initiated into greater use of the computer in resume preparation, report writing, format making etc

List of Topics

1. Phonetics
2. Reading comprehension
3. Describing objects/places/persons
4. Role Play or Conversational Practice
5. JAM
6. Etiquettes of Telephonic Communication
7. Information Transfer
8. Note Making and Note Taking
9. E-mail Writing
10. Group Discussions-1
11. Resume Writing
12. Debates
13. Oral Presentations
14. Poster Presentation
15. Interviews Skills-1

DEPARTMENT OF FRESHMAN ENGINEERING

SOFT SKILLS-II SYLLABUS

III B. Tech – II Semester: Common for All Branches								
Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
19CA52601	Foundation	3	1	-	3	30	70	100
Contact Classes:45	Tutorial Classes:15	Practical Classes: Nil			Total Classes:60			
Objectives:								
<ul style="list-style-type: none"> To enhance employability skills through Group discussions and Mock Interviews. To enable the students collectively in organizational skills. To train the students to meet communicative competence. 								
UNIT – I	VERBAL ABILITY & COMMUNICATION SKILLS						Classes:09	
Communication: Verbal and Non-Verbal Communication, Barriers to effective Communication, Types of Communication - Oral, Aural, Writing and Reading Grammar:- usage of Articles, Preposition, Verb, Tenses, Adverbs, If-Conditionals, Adjectives, Degrees of Comparison, Conjunction, Simple, Compound & Complex, Active & Passive voice, Reported Speech and Common Errors in English. Word Power: - Synonyms, Antonyms, Affixes, One word substitutions and Idioms & Phrases.								
UNIT- II	EMPLOYABILITY SKILLS						Classes:09	
COMPREHENSIONS:- Listening Comprehension, Reading Comprehension, Technical Reports, Resume Writing, E-mail Writing and Essay Writing SVAR (Accent): Phonetics, Inflections, Stress and Intonation. GROUP ACTIVITIES: Just-A-Minute (JAM), Debate, Group Discussion and Interview Skills								
UNIT - III	Arithmetic III						Classes:09	
Number System(HCF&LCM), Averages, Percentages, Simple Interest & Compound Interest, Problems on Ages, Profit & Loss, Probability, Permutation & Combinations, Logarithms								
UNIT - IV	Arithmetic IV						Classes:10	
Time & work, Time and Distance, Allegation and Mixtures, Mesuration2D, Mensuration3D, Data Interpretation.								
UNIT –V	Reasoning II						Classes:08	
Analogy, Classification, Number series, Coding Decoding, Direction & Distance,Blood Relation. Critical Reasoning – Syllogism, Statements & Assumptions, Statements & Arguments, Data sufficiency, Seating Arrangement, Puzzles.								
Text Books:								
1. Rizvi M. Oral Effective Technical Communication , Tata McGraw-Hill Publications, 2006. 2. R.S Aggarwal, Quantitative Aptitude for Competitive Examinations , S. Chand Publications 3. R.S.Agarwal, Verbal and Non Verbal Reasoning , S.Chand Publications.

AI TOOLS, TECHNIQUES AND APPLICATIONS

II B.TECH II SEM ME								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
19CA05405	Elective	L	T	P	C	CIA	SEE	Total
		3	-	-	3	30	70	100
Contact Classes: 45	Tutorial Classes: Nil	Practical Classes: Nil			Total Classes: 45			
OBJECTIVES: The course should enable the students to: I. Study the concepts of artificial intelligence in problem solving. II. Explore the methods of agents and reasoning patterns. III. Introduce the concepts of knowledge representation and learning. IV. Analyze and solve statistical learning methods using AI techniques.								
UNIT-I	INTRODUCTION						Classes: 08	
The AI problems, what is an AI technique, the levels of the model, the underlying assumption, problems; Problem spaces and search; Defining the problem as a state space search, production systems, problem characteristics and production system characteristics; Problem-solving: Uninformed search strategies; Informed search strategies: Heuristic search strategies, local search algorithms and optimization problems, backtracking search for CSP.								
UNIT-II	KNOWLEDGE AND REASONING						Classes: 10	
Logical agents, knowledge-based agents, the wumpus world and propositional logic, reasoning patterns in propositional logic and agents based on propositional logic; First-order logic: Syntax and semantic of first-order logic, knowledge engineering in first-order logic; Inference in first-order logic: Propositional vs first-order inference, unification and lifting, forward chaining, backward chaining, resolution.								
UNIT-III	KNOWLEDGE REPRESENTATION						Classes: 08	
Categories and objects, actions, situations and events, mental events and mental objects: The internet shopping world, truth maintenance systems. Uncertain knowledge and reasoning: Uncertainty, acting under uncertainty, basic probability notation, the axioms of probability, inference using full joint distributions, independence, Baye's rule and its use.								
UNIT-IV	LEARNING						Classes: 10	
Learning from observations, forms of learning, Inductive learning: Learning decision trees, ensemble learning; Why learning works: Computational learning theory.								
UNIT-V	STATISTICAL LEARNING METHODS						Classes: 09	
Knowledge in learning: A logical formulation of learning, knowledge in learning; Neural networks; Fuzzy logic systems: Introduction, crisp sets, fuzzy sets, some fuzzy terminology, fuzzy logic control, sugeno style of fuzzy inference processing, fuzzy hedges, a cut threshold.

Course Outcomes

At the end of the course, the students will be able to

CO1: Remember and understand the different aspects of the English language proficiency with emphasis on LSRW skills

CO2: Apply communication skills through various language learning activities

CO3: Analyze the English speech sounds, stress, rhythm, intonation and syllable division for better listening and speaking comprehension.

CO4: Evaluate and exhibit acceptable etiquette essential in social and professional settings.

CO5: Create awareness on mother tongue influence and neutralize it in order to improve fluency in spoken English.

ENGINEERING WORKSHOP

I Semester: Common to all

Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
20CA03103	Core	-	-	3	1.5	30	70	100
Contact Classes:-	Tutorial Classes: Nil	Practical Classes: 51			Total Classes: 51			

OBJECTIVES:

1. Identify and use of tools, types of joints in carpentry, fitting, tin smithy welding and foundry operations.

Any 10 of the following experiments has to be performed

CARPENTRY

- | | |
|---------|--|
| Expt. 1 | Preparation of dove tail joint as per given taper angle. |
| Expt. 2 | Preparation of lap joint as per given dimensions. |
| Expt. 3 | Preparation of Cross Lap joint as per given taper angle. |

FITTING

- | | |
|---------|---|
| Expt. 4 | Make a square fit for given sizes. |
| Expt. 5 | Make a V Joint for given dimensions. |
| Expt. 6 | Make a half round fit for given dimensions. |

TIN SMITHY

- | | |
|---------|---|
| Expt. 7 | Prepare the development of a surface and make a rectangular tray. |
| Expt. 8 | Prepare the development of a surface and make a round tin. |

FOUNDRY

- | | |
|----------|---------------------------------|
| Expt. 9 | Prepare a single Piece pattern. |
| Expt. 10 | Prepare a Split pattern. |

WELDING

- | | |
|----------|-------------------------------|
| Expt. 11 | Preparation of V butt joint |
| Expt. 12 | Preparation of Lap joint |
| Expt. 13 | Preparation of T fillet joint |

C PROGRAMMING LAB

B.Tech I Year II Semester

Course Code	Category	Hours/Week			Credits	Maximum Marks		
20CA05102	Foundation	L	T	P	C	CIA	SEE	Total
		0	0	3	1.5	30	70	100
Contact Classes: Nil		Tutorial Classes: Nil		Practical Classes: 48			Total Classes: 48	

COURSE OBJECTIVES:

1. Learn C Programming language.
2. To make the student solve problems, implement algorithms using C language.
3. To write diversified solutions using C language.

LIST OF PROGRAMS

Week -1

Write C program to

- a) Print the size of all data types.
- b) Find the Sum of three numbers
- c) Exchange (swap) of two numbers by using third variable.
- d) Exchange (swap) of two numbers without using third variable.

Week - 2

- a) Develop a calculator to convert time, distance, area, volume and temperature from one unit to another.
- b) Write a C program to find the Priority and associativity of operators using expressions. Take the expressions with different operators.
- c) Write a C program to swap two numbers using bitwise operators.

Week - 3

- a) Write a C program to find whether the given integer is odd or even.
- b) Write a C program to find the Maximum of three numbers.
- c) Write a C program to print 'hello world' without using semicolon.
- d) Write a C program to find whether the given number is odd or even using bitwise operator.
- e) Write a C program to find the maximum of two numbers using Conditional operator.
- f) Write a program which takes two integers and one arithmetic operator from the user, and performs the operation and then prints the result by using **switch-case**. (Operators : +, -, *, /, %)

Week -4

- a) Write a C program to generate the required multiplication table.
- b) Write a C program to find the Factorial of a given integer.
- c) Write a C program to compute x power of n (x^n) without using built in functions.
- d) Write a C program to check whether the given integer is prime or not.
- e) Write a C program to find GCD

Week - 5

- a) Write a C program to find the sum of the digits of an integer.
- b) Write a C program to find whether the given integer is a Palindrome or not.
- c) Write a C program to generate Fibonacci numbers in the given range.

Week - 6

DIRECTOR
 Chaitanya Engineering College
 (AUTONOMOUS)
 TIRUPATI

	<p>a) Write a C program to print the following pattern.</p> <pre> 1 2 2 3 3 3 </pre> <p>b) Print multiplication tables up to the given table. c) Write a C program to print series of prime numbers in the given range.</p>
Week - 7	
	<p>a) Write a C program to check whether the given integer is strong number or not. b) Write a C program to evaluate the sum of the following series up to 'n' terms $e^x = 1 + x + x^2/2! + x^3/3! + x^4/4! + \dots$</p>
Week - 8	
	<p>a) Compute the maximum, minimum and average of N numbers. b) Write a C program to find the sum of positive and negative numbers in a given set(Array) of numbers. c) Write a program to implement linear search technique d) Write a C program to read two matrices and find i) Sum. ii) Product and display the result in the matrix form.</p>
Week - 9	
	<p>a) Write a C program to read a matrix and perform the following operations i) Find the sum of Diagonal Elements of a matrix. ii) Print Transpose of a matrix. iii) Print sum of even and odd numbers in a given matrix.</p>
Week - 10	
	<p>a) Write a C program to read two strings and perform the following operations without using built-in string library functions. i) String length determination. ii) Compare Two Strings. iii) Concatenate Two Strings. iv) String reversing v) Determining whether a string is a palindrome or not b) Write a C program to accept a line of characters and print the number of Vowels, Consonants, blank spaces, digits and special characters. c) Write a C program to read a set of strings and sort them in alphabetical order.</p>
Week - 11	
	<p>a) Write a C program to illustrate the following types of functions i) Function with no arguments and no return values ii) Function with arguments and no return value iii) Function without arguments and with return value iv) Function with arguments and with return value</p>
Week - 12	
	<p>a) Write a C program to exchange two numbers using pointers. b) Write a program to print the elements of an array in reverse order using pointers.</p>
Week - 13	
	<p>a) Write a C program to express a four digit number in words. For example 1546 should be written as one thousand five hundred and forty six b) Write a C program using recursion for finding Factorial of a number c) Calculate the greatest common divisor using recursion for two numbers as specified</p>

INDUSTRIAL ENGINEERING & MANAGEMENT (PROFESSIONAL)
ELECTIVE -I)

III B.Tech I Semester: ME								
Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		C	CI A	SE E
19CA03507	Core	3	-	-	3	30	70	100
Contact Classes: 54	Tutorial Classes: Nil	Practical Classes: Nil			Total Classes: 54			
Course prerequisites :Basic knowledge on engineering mathematics								
OBJECTIVES:								
<ol style="list-style-type: none"> 1. To create awareness to learn principles, concepts, functions of management and also to design organizational structures. 2. To gain knowledge on plant location, layouts and analyze concepts of network techniques. 3. To familiarize the students regarding work study and work sampling 4. To train with materials and marketing management concepts in organizational context. 5. To get awareness on Human Resource Management and its functions 								
UNIT-I	Management and Organization						Classes:11	
Concepts of Management and Organization – Functions of Management – Evolution of Management Thought: Taylor's Scientific Management, Fayol's Principles of Management - Systems Approach to Management. Basic concepts related to Organization - Departmentation and Decentralization, Types of organization, Line organization, Line and staff organization, functional organization, Committee organization, matrix organization and their merits and demerits								
UNIT-II	Plant Location & Project Management						Classes:11	
Plant location, definition, factors affecting the plant location, comparison of rural and urban sites-methods for selection of plant. Plant Layout – definition, objectives, types of production, types of plant layout. PERT & CPM Project management, network modeling-probabilistic model, various types of activity-times estimation programme evaluation review techniques- Critical Path-probability of completing the project, deterministic model, critical path method -critical path calculation.								
UNIT-III	Work Study						Classes:10	
WORK STUDY: Definition, objectives, Method study - definition, objectives, steps involved-various types of associated charts-difference between micro-motion and memo-motion studies. Work measurement- definition, time study, steps involved-equipment, different methods of performance rating- allowances, standard time calculation. Work Sampling – definition, steps involved, standard time calculations, differences with time study- Applications. Predetermined motion time study – Method time measurement (MTM), introduction to ergonomics.								
UNIT-IV	Materials Management						Classes:11	
MATERIALS MANAGEMENT: Objectives, Inventory – functions, types, associated costs, inventory classification techniques. Stores Management and Stores Records. Purchase management, duties of purchase manager, associated forms. Marketing, selling, marketing mix, product life cycle.								

DIRECTOR
 Chaitanya Raman Autonomous Engineering College
 (AUTONOMOUS)
 TIRUPATI

UNIT-V	Human Resource Management	Classes:11
HUMAN RESOURCE MANAGEMENT: Functions of HRM, Job Evaluation, different types of evaluation methods. Job description, Merit Rating- difference with job evaluation, different methods of merit ratings, wage incentives, different types of wage incentive schemes.		
Text Books:		
1. O.P. Khanna, Industrial Engineering and Management.,DhanpatRai, 2018,17 th ed. 2. Stoner, Freeman, Gilbert, Management, Pearson Edu., 2007, 6 th Ed. 3. Pannervselvam, Production and Operations Management. PHI, 2010. 4. Armine, Manufacturing Organization and Management. Pearson, 2009.		
ReferenceBooks:		
1. Ralph M Barnes, Motion and Time Studies. John Wiley and Sons, 2007. 2. Chase, Jacobs, Aquilano, Operations Management. TMH, 2007, 10 th Ed. 3. L.S. Srinath, PERT/CPM. East-West Press, 2005.		
Course Outcomes:		
1. Discuss the principles and functions of management & decide the competitive strategy that works best for the organization. (L3) 2. Understand the importance of plant locations and develop effective project management techniques. (L2) 3. Understand the concept of work study, method study and types of associated charts, the work measurement, work sampling and their steps. (L2) 4. Learn the concepts of material management and apply the knowledge of inventory management and marketing strategies in work setting (L3). 5. Discuss the importance of various sub systems of HRM. (L3)

DESIGN FOR MANUFACTURE (MOOC Course-II)

IV B.Tech I Semester: ME								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
17CA03707	Elective	3	-	-	3	30	70	100
		Contact Classes: 51			Tutorial Classes: Nil		Practical Classes: Nil	
						Total Classes: 51		
UNIT-I	Introduction							10
Introduction: Design philosophy – steps in Design process – General Design rules for manufacturability – basic principles of designing for economical production – creativity in design.								
UNIT-II	Materials							10
Selection of Materials for design – Developments in Material technology – criteria for material selection – Material selection interrelationship with process selection – process selection charts.								
UNIT-III	Machining Process							11
Overview of various machining processes – general design rules for machining - Dimensional tolerance and surface roughness – Design for machining, Ease – Redesigning of components for machining ease with suitable examples. General design recommendations for machined parts.								
UNIT-IV	Metal Casting							10
Appraisal of various casting processes, selection of casting process, - general design considerations for casting – casting tolerances – use of solidification simulation in casting design – product design rules for sand casting.								
UNIT-V	Metal Joining							11
Metal Joining: Appraisal of various welding processes, Factors in design of weldments – general design guidelines – pre and post treatment of welds – effects of thermal stresses in weld joints – design of brazed joints.								
Text Books:								
1. Design for Manufacture / John Cobert / Adisson Wesley, 1995.								
2. ASM Handbook , Vol.20.								
3. Product design and Manufacturing / A.K Chitale and R.C Gupta / Prentice – Hall of India, New Delhi, 2003.								
Reference Books:								
1. Engineering Design- A Material and Processing Approach / George E. Deiter / McGraw Hill Intl., 2nd Edition, 2000.								
2. Design and Manufacturing / Surender Kumar & Goutham Sutradhar / Oxford & IBH Publishing Co. Pvt .Ltd., New Delhi, 1998								
Course Outcomes:								
At the end of this course the student will be able to:

 TIRUPATI

Advanced PRODUCTION TECHNOLOGY (MOOC-II)

IV B.Tech VII Semester: ME								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
17CA03710	Elective	-	-	-	3	30	70	100
		Contact Classes:		Tutorial Classes:		Practical Classes: Nil		Total Classes:
UNIT-I	Metal casting							
Metal casting processes: Sand casting shell moulding – expandable pattern casting - plaster mould and ceramic mould castings- investment casting – vacuum casting – permanent mould casting – slush casting – squeeze casting and semi solid metal casting.								
UNIT-II	Welding Processes							
solid state welding processes: cold welding – ultrasonic welding – friction welding. Resistance welding – explosion welding – diffusion welding – adhesive joining – joining plastics- thermal spraying								
UNIT-III	Metal Cutting							
Mechanics of chip formation-Geometry of Single point cutting tool – cutting forces – cutting power – tool life – selection of cutting tool materials and cutting fluids – machining –economics.								
UNIT-IV	Advanced Machining Processes							
Electro discharge machining – electro chemical grinding – electron beam machining – abrasive jet machining – micromachining– applications.								
UNIT-V	Processing of Powders, Ceramics and Plastics							
Production, compaction, sintering of powders – design considerations – shaping of ceramics – forming and shaping of glass – Processing methods for plastics, tool making and die making for plastics.								
<p>Course Outcomes: At the end of course students should be able to</p> <ol style="list-style-type: none"> 1. Apply knowledge of advanced casting techniques.(L3) 2. Understand various welding processes.(L2) 3. Apply knowledge of basic methodology of metal cutting and to educate the student about the structure, working, forces involved in single point and multipoint cutting tools.(L3) 4. Understand the various unconventional manufacturing processes and to know about the applications of advanced machining processes.(L2) 5. Illustrate the various process in making of components for engineering / domestic

INTERNET OF THINGS (IOT)

VI Semester ECE								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P	C	CIA	SEE	Total
19CA05604	Core	3	0	0	3	30	70	100
Contact Classes: 48	Tutorial Classes: Nil	Practical Classes: Nil			Total Classes: 48			
OBJECTIVES:								
The course should enable the students to:								
<ol style="list-style-type: none"> 1. Introduce the fundamental concepts of IoT and physical computing. 2. Expose the student to a variety of embedded boards and IoT Platforms. 3. Create a basic understanding of the communication protocols in IoT communications. 4. Familiarize the student with application program interfaces for IoT. 5. Enable students to create simple IoT applications. 								
UNIT-I								Classes: 09
Overview of IoT: The Internet of Things: An Overview, The Flavour of the Internet of Things, The "Internet" of "Things", The Technology of the Internet of Things, Enchanted Objects, Who is Making the Internet of Things? Design Principles for Connected Devices: Calm and Ambient Technology, Privacy, Web Thinking for Connected Devices, Affordances. Prototyping: Sketching, Familiarity, Costs Vs Ease of Prototyping, Prototypes and Production, Open source Vs Close source, Tapping into the community.								
UNIT-II								Classes: 10
Embedded Devices: Electronics, Embedded Computing Basics, Arduino, Raspberry Pi, Mobile phones and tablets, Plug Computing: Always-on Internet of Things.								
UNIT-III								Classes: 10
Communication in the IoT: Internet Communications: An Overview, IP Addresses, MAC Addresses, TCP and UDP Ports, Application Layer Protocols Prototyping Online Components: Getting Started with an API, Writing a New API, Real-Time Reactions, Other Protocols Protocol.								
UNIT-IV								Classes: 10
Business Models: A short history of business models, The business model canvas, Who is the business model for, Models, Funding an Internet of Things startup, Lean Startups. Manufacturing: What are you producing, Designing kits, Designing printed circuit boards.								
UNIT- V								Classes: 09
Manufacturing continued: Manufacturing printed circuit boards, Mass-producing the case and other fixtures, Certification, Costs, Scaling up software. Ethics: Characterizing the Internet of Things, Privacy, Control, Environment, Solutions.								
Text Books:								
<ol style="list-style-type: none"> 1. Internet of Things - A Hands-on Approach, Arshdeep Bahga and Vijay Madisetti, Universities Press, 2015, ISBN: 9788173719547 R16 B.TECH ECM. 2. Getting Started with Raspberry Pi, Matt Richardson & Shawn Wallace, O'Reilly (SPD), 2014, ISBN: 9789350239759. 								
Web References:								
<ol style="list-style-type: none"> 1. https://www.arduino.cc/ 2. https://www.raspberrypi.org/ 								
COURSE OUTCOMES:								
Upon the successful completion of the course, the student will be able to								
CO1: Choose the sensors and actuators for an IoT application.								
CO2: Select protocols for a specific IoT application.								
CO3: Utilize the cloud platform and APIs for IoT applications.								
CO4: Experiment with embedded boards for creating IoT prototypes.								
CO5: Design a solution for a given IoT application.

COMPUTER SCIENCE AND ENGINEERING**COURSE STRUCTURE & SYLLABI (R20)**

(w.e.f Academic Year 2020-21)

IT WORKSHOP LAB

II- Semester : CSE

Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
20CA05203	Foundation	-	-	3		30	70	100
Contact Classes: Nil	Tutorial Classes: Nil	Practical Classes: 45			Total Classes: 45			

Objectives:

- Introduce the internal parts of a computer, peripherals, I/O ports, connecting cables
- Teach basic command line interface commands on Linux
- Teach the usage of Internet for productivity and self paced life long learning
- Introduce Compression, Multimedia and Antivirus tools
- Introduce Office Tools such as Word processors, Spreadsheets and Presentation tools.

LIST OF EXPERIMENTS**WEEK -1**

Learn about Computer: Identify the internal parts of a computer, and its peripherals. Represent the same in the form of diagrams including Block diagram of a computer. Write specifications for each part of a computer including peripherals and specification of Desktop computer. Submit it in the form of a report.

WEEK -2

Assembling a Computer: Disassemble and assemble the PC back to working condition. Students should be able to trouble shoot the computer and identify working and non-working parts. Student should identify the problem correctly by various methods.

WEEK-3

Operating System installation : Installing an Operating System such as Linux on Computer hardware.

Operating system features: Students should record the various features that are supported by the operating system(s) installed. They have to submit a report on it. Students should be able to access CD/DVD drives, write CD/DVDs, access pen drives, print files, etc. Students should install new application software and record the installation process.

WEEK-4**Productivity tools**

MS WORD: Students should be able to create documents using the word processor tool. Some of the tasks that are to be performed are inserting and deleting the characters, words and lines, Alignment of the lines, Inserting header and Footer, changing the font, changing the colour, including images and tables in the word file, making page setup, copy and paste block of text, images, tables, linking the images which are present in other directory, formatting paragraphs, spell checking, etc.

WEEK-5**Productivity tools**

MS POWER POINT: creating, opening, saving and running the presentations, selecting the style for slides, formatting the slides with different fonts, colours, creating charts and tables, inserting and deleting text, graphics and animations, bulleting and numbering, hyperlinking, running the slide show, setting the timing for slide show.

WEEK-6**Productivity tools**

MS-EXCEL: Students should be able to create, open, save the application documents and format

CATIA V5 SYLLABUS

Module	Session	Contents
Introduction	1	CATIA as a CAD software:- Concept of Parametric Modeling, Feature Based Modeling, User Interface, Mouse operations, File types and Management, drawing profiles. Major user industries of Catia. Why Catia is preferred?
Sketcher	2	Sketcher: Profile toolbar, operation (corner, chamfer, delimitations, transformations, project 3D element), constraints, types of constraints, workbench.
	3	Sketcher:- sketch tools, tools(Sketch sloving status, sketch analysis, output feature), visulization toolbar, user selection filter.
Modelling of Machined Component (Part Modelling)	4	Modeling of Machined component, Material Addition and Removal (Pad, Pocket, Shaft, Groove), Sketch and Positioned Sketch, Types of Fillets, Types of Chamfer, Types of Hole.
	5	Modeling of Machined component - 2. Pattern (Rectangular, Circular, User) , Thread/Tap, Datum Features (Plane, Axes, Points),Simple Draft. Frequently used commands for Machined components in Catia / Creo
	6	Advance Design features :- Axis System, Types of draft, Shell, Stiffener, rib slot, Multi section solid, Removed multi sectionsolid, Apply Material, Measure, Render.
	7	Introduction To Multi body concept:- Copy Paste, Paste special, Insert body, Boolean Operations (Add, remove, Intersect), Transformation (Translation, Mirror, Scaling, Affinity).
	8	Multi body concept:- Standard example , Negative body concept (Boolean Operations)
	9	Advance Features:- Parameters, Formula, Relations, Design Table.
	10	Introduction To Drafting & Detailing Theory:- (types Generative – Interactive), Initial Drafting setting, Sheet Background, Views (ortho, ISO), Dimensions (Types-Generate Dimension & Create Dimension).
	11	Views:- (Aux, Section, Details, Clipping, VIEWPORT View properties, DATUMS & Tolerances.
	12	Annotations:- GD & T, Symbols, Note, Leaders, Table, Symbols (Machining, Roughness, Welding, Custom), Dress-upToolbar.

PROFESSOR
 Anna Engineering College
 (AUTONOMOUS)
 TIRUPATI

Drafting	13	Surfacing Modeling based Plastic Component:- Environment, Tool bars, Surface Creation (Extrude, Revolve, Sphere, Cylinder), Surface Modification, Surface Editing (Trim, Split, Shape Fillet, Close Surface, Thickness).
	14	Surfacing:- Offset(All 3 types), Fill, Blend,Join, healing, Project-Combine.
	15	Advanced Surfacing:- Adaptive Sweep,Sweep(ALL), Multi section Surface.
Wire-frame Modeling	16	Wire-frame Modeling:- Point, Line, Planes,Curves, Circle-Conic, STANDARD EXAMPLES. Use of wire frame modeling,
BIW Templates	17	BIW Templates:- What is BIW, Junction, Diabolo, Hole, Mating Flange, Bead, BlendCorner.
Assembly & Mechanism	18	Introduction to Assembly:- Types of assembly approach, Types of Constrains andDOF, placement of components in the Assembly, Manipulating Components, BOTTOM UP Approach
	19	TOP DOWN Approach:- Part, Product, Component, Space Analysis, Reuse Pattern,Save management.
	20	Assembly Drafting:- Scene(Exploded View), Bill of material, Ballon creation,Graph Tree Reordering.

II B. Tech (CSE), IV- SEMESTER - 2021-22										
COURSE: PYTHON PROGRAMMING										
Course Code	Category	Hours / Week			Credits	Maximum Marks				
		L	T	P		CIA			SEE	Total
20CA05401	Core	3	-	-	3	CIE	AAT	TOT	70	100
Classes: 48 Hrs.	Tutorial: Nil	Practical Classes: Nil			Total Classes: 48Hrs					

Objectives:

The course should enable the students to:

1. To elucidate problem solving through python programming language
2. To train in development of solutions using modular concepts
3. To teach practical Pythonic solution patterns
4. To introduce function-oriented programming paradigm through python

UNIT - I INTRODUCTION TO PYTHON _____ 8Hrs

Introduction to Python: Python- Numbers, Strings, Variables, operators, expressions, statements, String operations, Math function calls, Input/Output statements

UNIT - II CONTROL STATEMENTS _____ 10Hrs

Conditional If, while and for loops, User defined Functions, parameters to functions, recursive functions, Turtle Graphics.

UNIT - III DATA STRUCTURES AND IDIOMATIC PROGRAMMING IN PYTHON _____ 10Hrs

Lists, Tuples, Dictionaries, Strings, Files and their libraries. Beautiful Idiomatic approach to solve programming problems.

UNIT - IV PYTHON OBJECT ORIENTED PROGRAMMING _____ 10Hrs

Introduction to oops: Concept of class, object and instances, Method. Inheritance. Polymorphism. Data Abstraction. Encapsulation. Oops through Python: Data hiding, Polymorphism, Inheritance, Class and static variables, Class methods and Static methods, Constructors and Destructors.

UNIT -V EVENT DRIVEN PROGRAMMING _____ 10Hrs

Turtle Bar Chart, Event Driven programming. Key press events, Mouse events, timer events.

COURSE STRUCTURE & SYLLABI (R20)
(w.e.f Academic Year 2020-21)

them as per the requirement. Some of the tasks that may be practiced are Managing the worksheet environment, creating cell data, inserting and deleting cell data, format cells, adjust the cell size.

WEEK-7

Productivity tools

MS-EXCEL: Applying formulas and functions, preparing charts, sorting cells, Pivot table. Students should submit a user manual of the Spreadsheet.

WEEK -8

Networking and Internet

Networking: Students should connect two computers directly using a cable or wireless connectivity and share information. Students should connect two or more computers using switch/hub and share information. Crimping activity, logical configuration etc. should be done by the student. The entire process has to be documented.

WEEK -9

Networking and Internet

Browsing Internet: Student should access the Internet for Browsing. Students should search the Internet for required information. Students should be able to create e-mail account and send email. They should get acquaintance with applications like Facebook, skype etc.

WEEK -10

Antivirus: Students should download freely available Antivirus software, install it and use it to check for threats to the computer being used. Students should submit information about the features of the antivirus used, installation process, about virus definitions, virus engine etc.

WEEK-11

Cloud based productivity enhancement and collaboration tools:

- Manage event registrations, create quizzes, analyze responses: Google Forms
- Build public sites, internal project hubs: Google Sites
- Keep track of important events, sharing one's schedule, and create multiple calendars: Google Calendar.

Reference Books:

1. Introduction to Computers, Peter Norton, McGraw Hill
2. MOS study guide for word, Excel, Powerpoint & Outlook Exams, Joan Lambert, Joyce Cox, PHI.
3. Introduction to Information Technology, IITL Education Solutions limited, Pearson Education.
4. Networking your computers and devices, Rusen, PHI

II B. Tech (CSE) IV SEM - R20 REGULATIONS

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING											
II B. Tech (CSE), IV- SEMESTER - 2021-22											
COURSE: PYTHON PROGRAMMING LABORATORY											
Course Code	Category	Hours / Week				Maximum Marks				SEE	Total
						CIA			DDE		
20CA05406	PE	L	T	P	C	LIE	TOTAL				
				-	-	3	2	20	10	30	70
Classes: 45 Hrs	Tutorial: Nil	Practical Classes: Nil				Total Classes: 45Hrs					

Objectives:

The course should enable the students to:

1. To write, test, and debug simple Python programs.
2. To implement Python programs with conditionals and loops.
3. Use functions for structuring Python programs.
4. Represent compound data using Python lists, tuples, dictionaries.
5. Read and write data from/to files in Python.
6. To implement Python programs with Turtle graphics.

LIST OF EXPERIMENTS

Week -1 BASIC PROGRAMS

Write a program:

1. To print 'HELLO CREC'
2. To Compute All Arithmetic Operators.
3. To Swap Two Variables with and without third variable.

Week -2 BASIC PROGRAMS

Write a program

1. To Generate A Random Number
2. To Find The Area Of A Triangle.
3. To Calculate Quadratic equation.

Week-3 CONTROL STATEMENTS

1. Design a Python script to convert a Binary number to Decimal number and verify if it is a Perfect number.
2. Write a program to compute the GCD of two numbers.

Week-4 CONTROL STATEMENTS

1. Design a Python Script to determine the Square Root of a given number without using inbuilt functions in Python.
2. Write a program to find the sum of the digits of a number.
3. Write a program to find given number is strong number or not

Week-5 CONTROL STATEMENTS

1. Write a program to find the maximum of a list of numbers.
2. Write a program to find the factorial of given number.
3. Write a program to find the whether the given number is prime or not.

Objectives:

1. To understand fundamentals of android operating systems.
2. Illustrate the various components, layouts and views in creating android applications
3. To understand fundamentals of android programming.

WEEK 1

Installation of Android studio.

WEEK 2

Create "Hello World" Application

- a. Create a new Android Project
- b. Run "Hello World" on the Emulator
- c. On a Physical Device
- d. Greeting the User

WEEK 3

Create Application by Using Widgets

Creating the Application by using the Activity class

1. onCreate()
2. onStart()
3. onResume()
4. onPause()
5. onStop()
6. onDestroy()
7. (vii) onRestart()

WEEK 4

Creating the Application by using Text Edit control.

WEEK 5

Creating the Application Choosing Options

1. CheckBox
2. (ii) RadioButton

WEEK 6

Creating the Application Choosing Options

1. RadioGroup
2. (ii) Spinner

WEEK 7

Create Application by Using Building Blocks for Android Application Design

Design the Application by using

1. Linear Layout

DIRECTOR

(AUTONOMOUS)
TIRUPATI

II B. Tech (CSE) IV SEM - R20 REGULATIONS

2. (ii) Relative Layout

WEEK 8

Create Application by Using Building Blocks for Android Application Design in Absolute Layout

WEEK 9

Design the Application for Menus and Action Bar

WEEK 10

Design the application to display the Drop-Down List Action Bar.

Text Books:

1. Android Programming by B.M Harwani, Pearson Education, 2013.

Course Outcomes

Upon completion of the course, the students should be able to:

CO1	Apply essential Android Programming concepts.
CO2	Develop various Android applications related to layouts & rich uses interactive interfaces
CO3	Utilize rapid prototyping techniques to design and develop sophisticated mobile interfaces.
CO4	Develop mobile applications for the Android operating system that use basic and advanced phone features.

MOBILE APPLICATION DEVELOPMENT

VII Semester: CSE (Non-FSI) / VIII Semester: CSE (FSI)

Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		CIA	SEE	Total
17CA05702	Core	3	-	-	3	30	70	100
Contact Classes: 45	Tutorial Classes: Nil	Practical Classes: Nil			Total Classes: 45			

Objectives:

- To introduce the Android technology and its application.
- Design & program real working education based mobile application projects.
- Become familiar with common mobile application technologies and platforms; open files, save files, create and program original material, integrate separate files into a mobile application project, create and edit audio sound effects & music.

UNIT-I	Introduction to Android:	Classes: 10
---------------	---------------------------------	--------------------

The Android 4.1 jelly Bean SDK, Understanding the Android Software Stack, installing the Android SDK, Creating Android Virtual Devices, Creating the First Android Project, Using the Text view Control, Using the Android Emulator, The Android Debug Bridge(ADB), Launching Android Applications on a Handset

UNIT-II	Basic Widgets	Classes: 10
----------------	----------------------	--------------------

Understanding the Role of Android Application Components, Understanding the Utility of Android API, Overview of the Android Project Files, Understanding Activities, Role of the Android Manifest File, Creating the User Interface, Commonly Used Layouts and Controls, Event Handling, Displaying Messages Through Toast, Creating and Starting an Activity, Using the Edit Text Control, Choosing Options with Checkbox, Choosing Mutually Exclusive Items Using Radio Buttons

UNIT-III	Building Blocks for Android Application Design	Classes: 10
-----------------	---	--------------------

Introduction to Layouts, Linear Layout, Relative Layout, Absolute Layout, Using Image View, Frame Layout, Table Layout, Grid Layout, Adapting to Screen orientation.Utilizing Resources and Media Resources, Creating Values Resources, Using Drawable Resources, Switching States with Toggle Buttons, Creating an Images Switcher Application, Scrolling Through Scroll View.

UNIT-IV	Using Selection widgets and Debugging:	Classes: 08
----------------	---	--------------------

Using List View, Using the Spinner control, Using the GridView Control, Creating an Image Gallery Using the ViewPager Control, Using the Debugging Tool: Dalvik Debug Monitor Service(DDMS), Debugging Application, Using the Debug Perspective.

UNIT-V	Building Menus and Storing Data:	Classes: 07
---------------	---	--------------------

Creating Interface Menus and Action Bars, Menus and Their Types, Creating Menus Through XML, Creating Menus Through Coding, Applying a Context Menu to a List View, Using the Action Bar, Replacing a Menu with the Action Bar, Creating a Tabbed Action Bar, Creating a Drop-Down List Action Bar. **Using Databases:** Using the SQLiteOpenHelper class, Accessing Databases with the ADB, Creating a Data Entry Form.

DIRECTOR
 Choolawada Ramaiah Engineering College

 TIRUPATI

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING
III B.Tech (CSE), V- SEMESTER – 2021-22
COURSE : DATABASE MANAGEMENT SYSTEMS
Course Code: 19CA05503

Course Outcomes (COs)

- CO1 Students will be able to understand database concepts and popular database languages.
- CO2 Students will be able to conceptualize data using different data models.
- CO3 Students will be able to write different types of interactive queries with selected databases.
- CO4 Students can create efficient relational databases for various business applications such as banking, e-commerce, and retail etc.
- CO5 Students can design and develop database applications and database system software components such as transaction, storage and concurrency modules.

UNIT-I INTRODUCTION TO DATABASE SYSTEMS 8Hrs

Introduction-Database System, Purpose of Database Systems, History of Data base Systems, Database Advantages of Database systems Applications, View of Data - Data Abstraction, Instances and Schema, Data Models, Database Languages - DDL, DML, Database Architecture, Database Users and Administrators.

UNIT-II DATA MODELS 10Hrs

Introduction to Data base design , ER diagrams, Beyond ER Design, Entities, Attributes and Entity sets, Relationships and Relationship sets, Additional features of ER Model, Conceptual Design with the ER Model, Conceptual Design for Large enterprises. Relational Model: Introduction to the Relational Model - Integrity Constraints over Relations, Enforcing Integrity constraints, querying relational data, Logical data base Design, Introduction to Views Destroying/ altering Tables and Views.

UNIT-III RELATIONAL ALGEBRA AND CALCULUS 10Hrs

Relational Algebra and Calculus: Relational Algebra - Selection and Projection, Set operations, Renaming, Joins, Division, Examples of Algebra Queries, Relational calculus - Tuple relational Calculus - Domain relational calculus - Expressive Power of Algebra and calculus. Form of Basic SQL Query - Examples of Basic SQL Queries, Introduction to Nested Queries, Correlated Nested Queries, Set - Comparison Operators, Aggregate Operators, NULL values - Comparison using Null values - Logical connectives - AND, OR and NOT - Impact on SQL Constructs, Outer Joins, Disallowing NULL values, Complex Integrity Constraints in SQL Triggers and Active Data bases.

UNIT-IV NORMAL FORMS 10Hrs

Normalization: Purpose of Normalization or schema refinement, concept of functional dependency, normal forms based on functional dependency (1NF, 2NF and 3 NF), Lossless join and dependency preserving decomposition, concept of surrogate key, Boyce-codd normal form(BCNF), Multivalued Dependencies

UNIT-V TRANSACTION AND CONCURRENCY CONTROL

DIRECTOR
 Chadalawada Ramana Engineering College
 (AUTONOMOUS)
 TIRUPATI

Transaction Concept, Transaction State, Implementation of Atomicity and Durability, Concurrent Executions, Serializability, Recoverability, Implementation of Isolation, Testing for Serializability, **Concurrency Control** - Lock - Based Protocols - Timestamp Based Protocols.

**CHADALAWADA RAMANAMMA ENGINEERING COLLEGE
(AUTONOMOUS)**

**IV B.TECH I SEM CSE
E-COMMERCE(17CA05707)**

Course Outcomes:

CO1: Define and describe the 9 major ecommerce business models.

CO2 : Identify the differences and similarities among customers and their perception of value in B2B and B2Ce-commerce.

CO3: Compare and contrast developing a marketing mix in B2B and B2Cecommerce.

CO4: Summarize ways of moving money in e-commerce and related issues.

CO5: Discuss major trends that are impacting both the e-commerce world and society in general..

SYLLABUS

Unit-I	Electronic Commerce	Classes: 12
Electronic Commerce: Frame work, anatomy of E-Commerce applications, E- Commerce Consumer applications, E-Commerce organization applications. Consumer Oriented Electronic commerce: Mercantile Process models.		
Unit-II	Electronic Payment Systems	Classes: 12
Electronic paymentsystems: DigitalToken-Based, SmartCards, CreditCards ,RisksinElectronic Paymentsystems. Inter Organizational Commerce: EDI, EDI Implementations, and Value added networks.		
Unit-III	Inter Organizational Commerce	Classes: 13
Inter Organizational Commerce: Work Flow, Automation Customization and internal Commerce, Supply chain Management. Corporate Digital Library: Types of Digital Documents, Corporate Data Warehouses, e-Advertising and Marketing, Advertising on the Internet, On-line Marketing Process, and Market Research.		
Unit-IV	Consumer Search	Classes: 11
Consumer Search: Search and Resource Discovery Paradigms, Information Search and Retrieval, Electronic Commerce Catalogs (Directories), Overview of the Directory Business, Information Filtering, Consumer-Data Interface.		

DIRECTOR

BIG DATA LABORATORY

VII Semester: CSE (Non-FSI) / VIII Semester: CSE (FSI)

Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		CIA	SEE	Total
17CA05713	Core	-	-	4	2	30	70	100
Contact Classes: 45	Tutorial Classes: Nil	Practical Classes: Nil			Total Classes: 45			

Objectives:

- Learn Working with big data tools

Week 1

1. Implement the following Data structures in Java
a) Linked Lists b) Stacks c) Queues d) Set e) Map

Week 2

2. (i) Perform setting up and Installing Hadoop in its three operating modes:
Standalone,
Pseudo distributed,
Fully distributed.
(ii) Use web based tools to monitor your Hadoop setup

Week 3

3. Implement the following file management tasks in Hadoop:
Adding files and directories
Retrieving files
Deleting files
Hint: A typical Hadoop workflow creates data files (such as log files) elsewhere and copies them into HDFS using one of the above command line utilities.

Week 4

4. Run a basic Word Count Map Reduce program to understand Map Reduce Paradigm.

Week 5

5. Write a Map Reduce program that mines weather data.
Weather sensors collecting data every hour at many locations across the globe gather a large volume of log data, which is a good candidate for analysis with MapReduce, since it is semi structured and record-oriented

Week 6:

6. Implement Matrix Multiplication with Hadoop Map Reduce

Week 7,8:

7. Install & Run Pig then write Pig Latin scripts to sort, group, join, project, filter your data.

Week 9,10:

8. Install and Run Hive then use Hive to create, alter, and drop databases, tables, views, functions, and indexes

Text Books:

- Hadoop: The Definitive Guide by Tom White, 3rd Edition, O'reilly

Reference Books:

- Hadoop in Action by Chuck Lam, MANNING Publications.

MBA - I YEAR

SEMESTER - I

CHADALAWADA RAMANAMMA ENGINEERING COLLEGE
(AUTONOMOUS)
(Affiliated to JNTUA, Approved by AICTE, New Delhi and Accredited by NAAC 'A' Grade)
Tirupati – 517506, Chittoor Dt. Andhra Pradesh.

Management and organization Behaviour

I MBA I Semester :								
Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		Internal	External	Total
20CE00101	Foundation	4	-	-	4	40	60	100
	Contact classes:50	Practical classes: Nil				Total classes:65		
	Tutorial Classes:15							

COURSE OBJECTIVE:

To understand the fundamentals of management and behavioral aspects of individual and groups in an organization. This will form foundation to study other functional areas of management. Further, this course provides insight into behavioral issues.

COURSE OUTCOMES: The student is able to

- CO1: Examine the Management concepts and functions. [K4]
- CO2: Apply the concepts of planning, decision making, and delegation of authority, decentralization and departmentalization in real life situations. [K3]
- CO3: Analyze the controlling principles and practices, Ethics and corporate social responsibility. [K4]
- CO4: Discuss the organizational behavior and climate. [K6]
- CO5: Evaluate the basic concepts of organizational conflicts and climate. [K5]

SYLLABUS:

UNIT-I: MANAGEMENT

Definition, Nature, Scope and Importance, Science, Art, Profession, Managerial roles and functions, Management skills, Evolution of management thought, levels of management, challenges of manage, management Vs. Administration.

[Signature]
DIRECTOR
Chadala Wada Ramanamma Engineering College
(AUTONOMOUS)
TIRUPATI

UNIT-II: PLANNING& DECISION MAKING

Nature and Importance of planning,- Steps in planning – Types of planning,- Planning premises, - Forecasting techniques- Decision making – Significance – Process of Decision making – techniques – MBO.

UNIT-III: ORGANIZING& CONTROLLING

Concept, Nature, Principles, and Types of Organization structures, Departmentalization, Span of management – power - Authority and Responsibility Relationship – Delegation - Centralization and decentralization of Authority.

Control Concepts, Steps, Design of effective control System - Types of Controlling Techniques, Co-ordination types and principles.

UNIT-IV: ORGANISATIONAL BEHAVIOUR AND CULTURE

Organizational Behavior: Definition, Nature, Scope, Importance, Linkages with other social sciences-Organizational climate -Organizational Culture – Implications of OC.

UNIT-V: ORGANISATIONAL CONFLICTS

Goal conflict- Role- Organizational level of conflict – Group level – Conflict Management – Organizational effectiveness – concept – Approaches – Factors – Organizational change,-Nature – Factors – Process- Organizational growth & Change Agents- OD- concept, Process and Techniques

Relevant cases and situation analysis is discussed in each unit

Accounting for Managers

Course Code	Category	I MBA I Semester :				Maximum Marks		
		Hours/Week	Credits	Internal	External	Total		
20CE00103		L	T	P	C			
		4	-	-	4	40	60	100
Contact classes:50	Tutorial Classes:15	Practical classes: Nil				Total classes:65		

Course Description:

This course is designed to introduce and analyze the need, users view, concepts and conventions of Accounting. The course starts with the preparation of books of Accounts and then discusses preparation of financial statements, their analysis, accounting standards and emerging issues in Accounting field as a branch of study.

COURSE OBJECTIVES:

To prepare, understand, interpret and analyze financial statements with a thorough conceptual understanding. To appreciate and use financial statements as a means of business transparency for stakeholders. To use the analytical techniques and arrive at conclusions from financial information for the purpose of managerial decision making.

COURSE OUTCOMES

CO1 : Develop and understand the nature and purpose of financial statements in relationship to decision making and the applicability of Accounting Standards. [K4]

CO2 : Enhancing knowledge in preparation of final accounts, Income tax concepts and returns of

GSE-[K3]

CO3: Appreciate the distinction in preparing accounts for NFP organisations, applying methods of depreciation and inventory valuation [K4]

CO4: Analysing financial statements from stakeholders' point of view [K4]

CO5: Evaluating the financial statements key managerial decisions [K5]

UNIT – I	Introduction	1. Classes: 10
-----------------	---------------------	-----------------------

Meaning and Definition of Accounting – Need of Accounting for business decisions - Objectives of Preparation of Accounts — Users of Accounting Information - Classification of Accounts – Rules of Debit and Credit - Accounting Concepts and Conventions - Accounting Cycle – Process of Accounting – Journalizing – Posting – Trial Balance – Introduction to Accounting Standards – Accounting Standards Board of India.

UNIT – II	Financial Statements	Classes: 10
------------------	-----------------------------	--------------------

Preparation and Presentation of Final Accounts -Trading Account – Profit and Loss Account – Balance Sheet- Provisions of Company’s Act, 2013 relating to the preparation and presentation of Final Accounts of Companies - Income Tax concepts – Tax Evasion – Computation of GST [simple problems] - GST Returns

UNIT – III	Income and Expenditure	Classes: 10
-------------------	-------------------------------	--------------------

NFP organisations - Distinction between Capital and Revenue- Capital Expenditure – Revenue Expenditure - Deferred Revenue Expenditure – Capital Receipt and Revenue Receipt- Depreciation: Concept, Reasons, Methods of Depreciation Straight Line, written down, sum of years digits, annuity, machine hour rate – AS-6 - Inventory – Types - Inventory Valuation Methods-AS-2

UNIT – IV	Financial Analysis I	Classes: 10
------------------	-----------------------------	--------------------

Financial Statement Analysis: Importance, Uses, Horizontal Analysis, Vertical Analysis – Trend Percentages- Ratio Analysis: Importance, Uses – Solvency – Liquidity – Activity – Profitability Ratios.

UNIT – V	Financial Analysis II	Classes: 10
-----------------	------------------------------	--------------------

Concept of Funds - Uses and Preparation of Cash Flow Statements – Direct and Indirect methods - Uses and Preparation of Funds Flow Statements - Schedule of Changes in Working Capital – Ascertaining Funds from Operations – Managerial decisions

Business Communication Lab-I

I MBA I Semester :									
Course Code	Category	Hours/Week				Credits	Maximum Marks		
		L	T	P	C		Internal	External	Total
20CE00108	Foundation	4	-	-	4	40	60	100	
	Contact classes:50	Tutorial Classes:10				Practical classes: Nil	Total classes:55		

Objectives:

The introduction of Business Communication Lab is considered as essential in the I year I semester level. At this stage the students have to develop themselves for their career so that they have to practice listening, speaking, Reading and writing skills in English for interpersonal communication and for their Profession in this globalised era.

Course Outcomes:

CO1: To extract the need and importance of effective communication skills in the social and work related situations. (K4)

CO2: To use phonetics in different business/work related situations. (K3)

CO3: To elevate listening skills and effective communication skills. (K2)

CO4: Thorough application of speaking skills and capable of organising various events. (K3)

CO5: Develop writing and reading skills and equipping managerial skills. (K6)

Unit – I	Understanding the need of Communication Skills	Classes: 15
-----------------	---	--------------------

Understanding the need of Communication Skills for Managers, importance of effective communication through different social/work related situations, Enact role play of verbal and Nonverbal communication, Identifying the communication barriers in the organization through case studies, identify effective use of body language, paralanguage and spatial communication

Unit – II	Phonetics	Classes: 10
------------------	------------------	--------------------

Phonetics– Introduction to sounds of speech, vowels and consonants, phonetic transcription, orthographic transcription, syllabification, word stress, Innovation, Accent, Rhythm, Oral Skills, Situational Dialogues, Role Plays.

Unit - III	Listening Exercises	Classes: 10
-------------------	----------------------------	--------------------

Listening with a focus on pronunciation (ear training) : segmental-sounds, stress, ~~real~~ forms, intonation, listening for meaning (oral comprehension) listening to talks, lectures, conversations, discussions, jingles, riddles, etc.

CHADALAWADA RAMANAMMA ENGINEERING COLLEGE
 (AUTONOMOUS)
 TIRUPATI

Unit – IV	Speaking Skills	Classes: 10
------------------	------------------------	--------------------

Speaking about the future plans, expressing opinions, Telephone conversations, PPT Presentations, Poster Presentations, Public Speaking, Welcome Address (Inviting Dignitaries to department workshops, symposiums and university functions proposing vote of thanks), Interview Skills and Mock Interviews.

Unit – V	Writing and Reading exercises	Classes: 10
-----------------	--------------------------------------	--------------------

Reading and comprehension of the texts supported by suitable exercises Use of Dictionary, Note making after reading a text, showing the main idea and supporting ideas and the relationships between them -Practice in writing paragraphs, short essays and summaries. Skills Training:- Non-Verbal communication, Decision Making, Goal Setting, Etiquettes and grooming, Stress Management, Time Management, Problem Solving Skills.

Reference Books:

1. □ Basic Business Communication Skills for empowering the internet generation, Lesikar Flatley, Tata McGraw Hill.
2. Business Communication for Managers, Penrose, Rasberry and Myers, Cengage.
3. □ A Text Book of English Phonetics for Indian Students by, T. Balasubramanian, McMillan.

Mode of Evaluation: Assignments, Seminars, Written Examinations.

ENTREPRENEURSHIP DEVELOPMENT

II MBA I Semester :								
Course code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		C	Internal	External
20CE00301	Foundation	4	-	-	4	40	60	100
Contact Classes: 50	Tutorial Classes: 15	Practical Classes - Nil				Total Classes - 65		

COURSE OBJECTIVES:

The main **objective** of this **course** is **develop entrepreneurial** abilities by providing background information about support systems , skill sets , financial and risk covering institutions and other for building an enterprise so that future budding **entrepreneurs** can make right decisions for starting and running a venture.

COURSE OUTCOMES:

- CO1: To equip and develop the learners entrepreneurial skills and qualities essential to undertake business [k3].
- CO2: To build the learner's entrepreneurial competencies needed for managing business efficiently and effectively [k6].
- CO3: To analyze the business plan for starting a business [K4].
- CO4: To formulate and manage a small business [K6]
- CO5: To manage and monitor the small business [K5].

UNIT – I: Entrepreneurial Competence:

Entrepreneurship concept – Entrepreneurship as a Career – Entrepreneurial Personality -Characteristics of Successful Entrepreneurs – Knowledge and Skills of an Entrepreneur.

UNIT- II: Entrepreneurial Environment:

Business Environment – Role of Family and Society - Entrepreneurship Development, Training and Other Support Organizations - Services - Central and State Government Industrial Policies and Regulations.

DIRECTOR
 Chadalawada Ramanamma Engineering College
 (AUTONOMOUS)
 TIRUPATI

UNIT- III Business Plan Preparation:

Sources of Product for Business - Prefeasibility Study - Criteria for Selection of Product -Ownership - Capital Budgeting- Project Profile Preparation - Matching Entrepreneur with the Project - Feasibility Report Preparation and Evaluation Criteria.

UNIT- IV: Launching of Small Business:

Finance and Human Resource Mobilisation - Operations Planning - Market and Channel Selection - Growth Strategies - Product Launching -Incubation - Venture capital, Start-ups.

UNIT- V: Management of Small Business:

Monitoring and Evaluation of Business - Business Sickness - Prevention and Rehabilitation of Business Units - Effective Management of small Business - Case Studies.

Legal Aspects of Business

		II MBA II Semester :						
Course Code	Category	Hours/Week			Credits	Maximum Marks		
20CE00403	Foundation	L	T	P	C	Internal	External	Total
		3	-	-	4	40	60	100
Contact classes:50	Tutorial Classes:15	Practical classes: Nil				Total classes:65		

COURSE OBJECTIVES:

To sensitize the students as also help they appreciate the overall legal framework within which business activities are carried out. To create awareness in respect of rules and regulations affecting various managerial functions.

COURSE OUTCOMES:

- CO1: Analyze the Indian Contract Act. [K4]
- CO2: Evaluate Sales of Goods Act and the machinery for redressal of consumer grievances. [K5]
- CO3: Elaborate rights and duties of agent and principal, Principal's liability for the acts of agent and the procedure for termination of agency. [K6]
- CO4: Examine the rights and duties of partners, dissolution of partnership firm and the formation of company, amendments act in 2013. [K4]
- CO5: Explain the kinds of Negotiable Instruments and Goods and Services Act. [K5]

UNIT -I: THE INDIAN CONTRACT ACT, 1872

Nature of the Act - – Essentials of a Valid Contract – Classification of Contracts- Capacity – Free Consent – Performance of a Contract – Discharge of a Contract – Remedies for Breach of a Contract

UNIT -II: SALES OF GOODS ACT, 1930 & CONSUMER PROTECTION ACT, 1986

Distinction between Sales and Agreement to Sell – Conditions and Warranties – Performance of Contract of Sale – Rights of an Unpaid Seller. **Consumer Protection Act, 1986:** Consumer Rights – Machinery for Redressal of Consumer Grievances- District Consumer Forum – State Level Commission – National Level Commission.

(AUTONOMOUS)
TIRUPATI

UNIT –III: CONTRACT OF AGENCY ACT, 1872

Kinds of Agents –Creation of Agency-Rights and Duties of Principal – Rights and Duties of Agent - Principal’s Liability for the Acts of the Agent-Liability of Agent –Termination of Agency.

UNIT-IV: INDIAN PARTNERSHIP ACT, 1932

Meaning and Essentials of Partnership Firm –Registration Deed – Tests of Partnership-Rights and Duties of Partners –Dissolution of Partnership.

UNIT –V: COMPANIES ACT 2013 & NEGOTIABLE INSTRUMENTS ACT, 1881

(i) Nature and Types of Companies – Formation of a Company –Memorandum of Association-Articles of Association–Kinds of Shares – Company Act amended in 2013 - Duties of Directors-Winding up Procedure.

(ii) Kinds of Negotiable Instruments and Endorsement- Presentation of a Negotiable Instrument Discharge of a Negotiable Instrument – Goods and Services Tax Act,2017

Relevant cases have to be discussed in each unit

PYTHON PROGRAMMING LAB

Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P	C	CIA	SEE	Total
20CF00108	core			4	2	40	60	100
Contact Classes: Nil	Tutorial Classes: Nil	Practical Classes: 45			Total classes:45			

Course Objectives:

- To train the students in solving computational problems
- To elucidate solving mathematical problems using Python programming language
- Practical understanding of building different types of models and their evaluation

Course Outcomes:

- Design real life situational problems and think creatively about solutions of them.
- Apply a solution clearly and accurately in a program using Python.
- Student will be able to understand the fundamentals of Python programming concepts and its applications.
- Students will be able to solve computational problems.
- Apply the best features of Python to program real life problems

Week-1	Write a program to demonstrate a) Different numeric data types and b) To perform different Arithmetic Operations on numbers in Python.
Week-2	Write a Python program to find first n prime numbers. Write a Python Program to find the maximum from a list of numbers.
Week-3	Write a Python program to find GCD of two numbers. Write a Python Program to find the square root of a number by Newton's Method
Week-4	Write a Python program to multiply matrices. Write a program to print each line of a file in reverse order.
Week-5	Write a program to convert a list of tuples in a dictionary. Write a Python program to check whether an element exists within a tuple.
Week-6	Write a function dups to find all duplicates in the list. Write a function cumulative product to compute cumulative product of a list of numbers.
Week-7	Write a Python script to concatenate following dictionaries to create a new one. Sample Dictionary : dic1={1:10, 2:20} dic2={3:30, 4:40} dic3={5:50,6:60} Write a Python program to replace dictionary values with their average.
Week-8	Write a program to read character data from a text file by using the following read methods. read(),read(n),readline(),readlines().
Week-9	Write a program to describe about Instance variable using ATM Machine Class

DIRECTOR

OFFICE AUTOMATION LAB

I - Semester

OFFICE AUTOMATION LAB

Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
20CF00109	Foundation	-	-	4	2	40	60	100
Contact Classes: Nil	Tutorial Classes: Nil	Practical Classes: 45			Total Classes: 45			

Course Objectives:

- Learning about the Computer internal components.
- Practice on operating system installation and configuration settings.
- Prepare productivity tools like word processors, spreadsheets, presentations.

Course Outcomes:

- Able to Assemble and disassemble the computer components.
- Able to prepare power point presentations
- Able to construct data charts and graphs.
- Able to generate reports.
- Prepare professional documents, perform accounting operations, and prepare professional multimedia presentations..

Exp-1	Learn about computer internal parts & Peripherals.
Exp-2	Assembling & Disassembling a Computer.
Exp-3	Installation of various Operating Systems.
Exp-4	Networking two or more computers and document the process.
Exp-5	Browsing Internet and creating an email account: Studying various web browsers and their features.
Exp-6	Word Processor: Introduction to Word:Creating project Certificate; Abstract features to be covered; Formatting Styles: Inserting table, bullets and numbering, changing text direction, cell alignment, footnote, hyperlink, symbols, spell check, images from files and clipart, drawing toolbar and Word Art, formatting images, textboxes and paragraphs, Page numbers, Header and Footer, Mail merge, Macro.
Exp-7	Spreadsheet-I: Spreadsheet basics, modifying worksheets, formatting cells, formulas and functions.
Exp-8	Spreadsheet-II: Sorting and filtering, charts, renaming and inserting worksheets, hyper linking, count function, sorting, and conditional formatting.
Exp-9	Presentations: creating, opening, saving and running the presentations, Selecting the style for slides, formatting the slides with different fonts, colors, creating charts and tables, inserting and deleting text, graphics and animations, bulleting and numbering, hyperlinking, running the slide show, setting the timing for slide show.

20CF00311	Core	-	-	3	2	40	60	100
Contact Classes: Nil	Tutorial Classes: Nil	Practical Classes: 45			Total Classes: 45			

Course Objectives:

From the course the student will Learn

- The core concepts of both the frontend and backend programming course.
- Get familiar with the latest web development technologies.
- Learn all about SQL and Mongo databases.

Course Outcomes:

At the end of the course, student will be

- Able to Identify the Basic Concepts of Web & Markup Languages
- Develop web Applications using Scripting Languages & Frameworks
- Creating & Running Applications using JSP libraries
- Creating Our First Controller Working with and Displaying in Angular Js and Nested Forms with ng-form Working with the Files in React JS and Constructing Elements with Data
- Creating Our First Controller Working with and Displaying an Online fee payment form using JScript and MangoDB

List of Programs

Week-1	Implementation of 'get' and 'post' methods
Week- 2	CSS implementation in colors, boarder padding
Week- 3	CSS implementation button frames tables, navigation bars.
Week- 4	Create registration and login forms with validations using Jscript query.
Week- 5	Jscript to retrieve student information from student database using database connectivity.
Week- 6	Angular Js data binding
Week- 7	Angular JS directives and Events
Week- 8	Using angular Js fetching data from MySQL.
Week- 9	Using React Js creating constructs data elements.
Week-10	Using React Js implementations DoM
Week-11	Invoking data using Jscript from Mongo DB
Week-12	Create an Online fee payment form using JScript and MangoDB

ARTIFICIAL INTELLIGENCE USING R LAB

Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
20CF00213	Core	-	-	4	2	40	60	100
Contact Classes: Nil	Tutorial Classes: Nil	Practical Classes: 45			Total Classes: 45			
Course Objectives:								
<ul style="list-style-type: none"> • Able to Install and use R for simple programming tasks. • To Extend the functionality of R by using add-on packages • Understand basic idea of how to program in R and its working environment. • Understand how to write simple facts using R • Extract data from files and other sources and perform various data manipulation tasks on them. 								
Course Outcomes:								
<ul style="list-style-type: none"> • Create a software application using the Java programming language. • Debug a software application written in the Java programming language. • Test a software application written in the Java programming language. • Apply the knowledge of R gained to data Analytics for real life applications 								
List of Experiments								
Week-1								
1. Write predicates One converts centigrade temperatures to Fahrenheit, the other checks if a temperature is below freezing using R.								
Week-2								
1. Write a program to solve 8 queens problem using R.								
Week-3								
1. Write a Program to Solve any problem using depth first search using R. 2. Write a Program to Solve any problem using best first search using R.								
Week-4								
1. Write a program to implement factorial, Fibonacci of a given number using R.								
Week-5								
1. Write a program to solve Robot (traversal) problem using means End Analysis using R.								
Week-6								
1. Write a program to solve traveling salesman problem using R.								
Week-7								
1. Write a program to solve water jug problem using R.								
Week-8								
1. Write a program to solve the Monkey Banana problem using R.								
Week-9								
1. Write a program to solve 8-puzzle problem using best first search

MACHINE LEARNING LAB

		L	T	P	C	CIA	SEE	Total
20CF00312	core	-	-	3	2	40	60	100
Contact Classes: Nil	Tutorial Classes: Nil	Practical Classes: 45				Total classes:45		
Course Objectives: <ul style="list-style-type: none"> Understand the implementation procedures for the machine learning algorithms. Design Java/Python programs for various Learning algorithms. Identify and apply Machine Learning algorithms to solve real world problems Course Outcomes: <ul style="list-style-type: none"> Implement procedures for the machine learning algorithms Design Python programs for various Learning algorithms Building an Artificial Neural Network for machine learning algorithms Apply appropriate data sets to the Machine Learning algorithms Identify and apply Machine Learning algorithms to solve real world problems 								
Week-1	Implement and demonstrate the FIND-S algorithm for finding the most specific hypothesis based on a given set of training data samples. Read the training data from a .CSV file							
Week-2	For a given set of training data examples stored in a .CSV file, implement and demonstrate the Candidate-Elimination algorithm to output a description of the set of all hypotheses consistent with the training examples.							
Week-3	Write a program to demonstrate the working of the decision tree based ID3 algorithm. Use an appropriate data set for building the decision tree and apply this knowledge to classify a new sample							
Week-4	Build an Artificial Neural Network by implementing the Back propagation Algorithm and test the same using appropriate data sets..							
Week-5	Write a program to implement the naïve Bayesian classifier for a sample training data set stored as a .CSV file. Compute the accuracy of the classifier, considering few test datasets.							
Week-6	Assuming a set of documents that need to be classified, use the naïve Bayesian Classifier model to perform this task. Built-in Java classes/API can be used to write the program. Calculate the accuracy, precision, and recall for your data set.							
Week-7	Write a program to construct a Bayesian network considering medical data. Use this model to demonstrate the diagnosis of heart patients using standard Heart Disease Data Set. You can use Java/Python ML library classes/API.							
Week-8	Apply EM algorithm to cluster a set of data stored in a .CSV file. Use the same data set for clustering using k-Means algorithm. Compare the results of these two algorithms and comment on the quality of clustering. You can add Java/Python ML library classes/API in the program.							
Week-9	Write a program to implement k-Nearest Neighbour algorithm to classify the iris data set. Print both correct and wrong predictions. Java/Python ML library classes can be used for this problem							
Week-10	Implement the non-parametric Locally Weighted Regression algorithm in order to fit data points. Select appropriate data set for your experiment and draw graphs..

MOBILE APPLICATION DEVELOPMENTS LAB

Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
20CF00313	Core	-	-	3	2	40	60	100
		Contact Classes: Nil		Tutorial Classes: Nil		Practical Classes: 45		Total Classes: 45

Course Objectives:

- To understand fundamentals of android operating systems.
- Illustrate the various components, layouts and views in creating android applications
- To understand fundamentals of android programming.

Course Outcomes:

- Create data sharing with different applications and sending and intercepting SMS.
- Develop applications using services and publishing android applications.
- To demonstrate their skills of using Android software development tools.
- To create Android environment using different interceptions.
- Demonstrate various applications connecting databases.

Week-1	<p>Setting Up the Development Environment :</p> <p>1.1 Download/Install the SDK For in-depth instructions, visit Android Installation Documentation. Otherwise perform the following steps.</p> <ul style="list-style-type: none"> • Go to http://developer.android.com/sdk/index.html. • Unpack to a convenient location - Remember the full path to this location, we will refer to it as <android_sdk_dir> for the rest of the lab. <ul style="list-style-type: none"> ◦ <android_sdk_dir> would then be/home/<username>/android_dir. • Add the path to the <android_sdk_dir>/tools directory to your system PATH <ul style="list-style-type: none"> ◦ Windows: <ol style="list-style-type: none"> 1. Right-click My Computer. 2. Click Properties. 3. Click Advanced tab. 4. Click Environment Variables button. 5. Double Click Path under System Variables. 6. Add ; <android_sdk_dir>/tools;<android_sdk_dir>/platform-tools to the end of the Variable Values text field. • Navigate to your <android_sdk_dir>/tools directory and type android. Add the appropriate components. See step 4 in http://developer.android.com/sdk/installing.html. • Test your installation by running adb from the command line. If you did everything right, you should get a long list of help instructions. <ol style="list-style-type: none"> 1. Click the menu Help -> Software Updates. 2. Click Available Software tab -> Add Site button. 3. Enter https://dl-ssl.google.com/android/eclipse into the "Location" field. 4. Click OK button. 5. Click the checkbox next to Developer Tools. 6. Click the Install button. 7. Click the Next button. 8. Accept the terms, click Finish. 9. Restart Eclipse.
---------------	--

Week-2	<p>1.2 Download/Install the Eclipse Plugin</p> <ul style="list-style-type: none"> • It is recommended that you use Eclipse 3.4 or later <p>• Lab Machines - Fedora Eclipse based on 3.4.2 The version of Eclipse used by the lab machines is missing a vital component and requires adding an additional Eclipse plugin in</p>

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING								
II M.Tech (CSE), II- SEMESTER – 2021-22								
COURSE : HUMAN COMPUTER INTERACTION								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		CIA	SEE	Total
21CD05206	PE-III	4	-	-	4	40	60	100
Classes : 60	Tutorial: Nil	Practical Classes: Nil			Total Classes: 60Hrs			

Objectives:

The course should enable the students to:

1. Determine the characteristics of good user interface designs.
2. Recognize how a computer system may be modified to include human diversity.
3. Develop user interface design tools.
4. Investigate the automatic generation of user interface s from high-level specifications.
5. Evaluate user interfaces and applications using a variety of methods.

Outcomes:

1. Find innovative ways of interacting with computers
2. Help the disabled by designing non-traditional ways of interacting
3. Use cognitive psychology in the design of devices for interaction

UNIT-I Introduction 10Hrs

Human computer interface: Characteristics of graphics interface, direct manipulation graphical system; web user interface, popularity, characteristic and principles.

UNIT-II Human Computer Interaction 14Hrs

User interface design process: Obstacles, usability, human characteristics in design, human interaction speed, business functions; Requirement analysis, direct ,indirect methods, basic business functions, design standards, system timings; Human consideration in screen design structures of menus, functions of menus, contents of menu, formatting, phrasing the menu, selecting menu choice, navigating menus, graphical menus.

UNIT-III Windows 14Hrs

Characteristics: Components, presentation styles, types, managements, organizations, operations.

Web systems: Device based controls characteristics, screen based controls, operate control, text boxes, selection control, combination control, custom control, presentation control.

UNIT-IV Multimedia 12Hrs

Text for web pages: Effective feedback, guidance and assistance, internationalization, accessibility; Icons, image, multimedia, coloring.

DESIGN THINKING

I B. Tech - I Semester:									
Course code	Category	Hours/week			Credits	Maximum Marks			
		L	T	P		CIA	SEE	TOTAL	
19CA53303	Foundation	3	-	-	3	30	70	100	
Contact Classes:	Tutorial Classes: Nil	Practical Classes: Nil			Total Classes:51				
UNIT-I	INTRODUCTION TO DESIGN THINKING						Classes:09		
Introduction to Design thinking: Concept and its role within new product development and Innovation, Frame work of design thinking, Non linear process, principles and mindset. Inspirational Design Briefing: Nine Criteria, Writing, Research findings, pitfalls to avoid, Keys to success.									
UNIT-II	CUSTOMER EXPERIENCE MAPPING						Classes:11		
Customer Experience Mapping: Inputs to experience mapping, Experience mapping process, Experience map as spring board to innovative solutions.									
UNIT-III	BRIDGE RESEARCH AND CONCEPT DESIGN						Classes:10		
Bridge research and concept design: Challenges in idea generation, Need for systematic method to connect to the user, The Visualize, Empathize and Ideate method, applying the method.									
UNIT-IV	CREATIVITY IN IDEA GENERATION						Classes:10		
Boosting creativity in idea generation using Design heuristics: Design Heuristics, The evidence base, Design heuristics for idea generation, Using Design heuristics to generate design concepts, Evidence of the value of design heuristics tools. The role of design in early stage ventures: An emerging start up culture, Basics, Process, and Troubleshooting common mistakes.									
UNIT-V	CORPORATE CULTURE OF DESIGN THINKING						Classes:11		
Leading for Corporate culture of design thinking: What is corporate culture, Impact of corporate culture, Corporate forces that undermine the design thinking, Four pillars of innovation for enabling design thinking, Four stages of transforming to a culture of design thinking.									
Text Books:									
1. Philip Kosky, Robert T. Balmer, William D. Keat, George Wise, "Exploring Engineering: An Introduction to Engineering and Design", 4th edition, Elsevier, 2016. 2. David Ralzman, "History of Modern Design", 2nd edition, Laurence King Publishing Ltd., 2010 3. An AVA Book, "Design Thinking", AVA Publishing, 2010.									
Reference Books:									
1. G. Pahl, W.Beitz, J. Feldhusen, KH Grote, "Engineering Design: A Systematic Approach", 3rd edition, Springer, 2007. 2. Tom Kelley, Jonathan Littman, "Ten Faces in Innovation", Currency Books, 2006.

CAM LABORATORY

IV B.Tech I Semester: ME								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
17CA03713	Core	-	-	4	2	30	70	100
Contact Classes: Nil	Tutorial Classes: Nil	Practical Classes: 68			Total Classes: 68			
List of Experiments								
Expt. 1	Introduction to CNC Machines and G-Code, M-Codes							
Expt. 2	CNC part programming for operations like turning, step turning, taper turning.							
Expt. 3	CNC part programming for threading canned cycles.							
Expt. 4	CNC program for plane milling operation.							
Expt. 5	CNC program for plane drilling operation.							
Expt. 6	Generation of CNC part programming with CAM packages for a given 3D models.							
Expt. 7	Development of APT programming for 2D objects							
Expt. 8	Programming for Robot pick and place and continuous path.							
Text Books:								
1. Mikell P. Groover, Emory W. Zimmers , CAD/CAM, 5/e, Pearson Prentice Hall of India, Delhi, 2008								
2. P. Radhakrishnan, S. Subramanyan & V. Raju, CAD/CAM/CIM, 3/e, New Age International Publishers, 2008								
Course Outcomes								
At the end of this laboratory the student will be able to:								
1. Illustrate Manual Part programs using G and M codes and simulate those using CNC lathe and milling programs. (L4)								
2. Perform machining on CNC machines and fabricate simple machine components on Lathe, Drilling and Milling Machines. (L3)								
3. Develop part programming for robots. (L4)

DESIGN THINKING & PRODUCT INNOVATION

II B. Tech I Semester: CSE

Course code	Category	Hours/week			Credits	Maximum Marks		
		L	T	P		CIA	SEE	TOTAL
19CA53301	Foundation	3	1	-	3	40	60	100
Contact Classes:45	Tutorial Classes :15	Practical Classes: NIL			Total Classes:60			

Objectives:

The course should enable the students to :

- To introduce the basics of design thinking.
- To familiarize product design process.
- To bring awareness on idea generation.
- To familiarize the role of design thinking in services design.

Unit-I	INTRODUCTION	Classes:10
Introduction to design, characteristics of successful product development, product development process, identification of opportunities, product planning, Innovation in product development.		
Unit-II	DESIGN THINKING	Classes:13
Design thinking: Introduction, Principles, the process, Innovation in design thinking, benefits of Design thinking, design thinking and innovation, case studies.		
Unit-III	IDEA GENERATION	Classes:13
Idea generation: Introduction, techniques, Conventional methods, Intuitive methods, Brainstorming, Gallery method, Delphi method, Synaptic, etc. Select ideas from ideation methods, case studies.		
Unit-IV	METRICS	Classes:12
Introduction, size metrics, data structure metrics, information flow metrics, entropy-based measures, metric analysis. Software reliability& Hardware reliability, failures& faults, reliability concepts, reliability models.		
Unit-V	DESIGN THINKING FOR SERVICE DESIGN	Classes:12
Design thinking for service design: How to design a service, Principles of service design, Benefits of service design, Service blueprint, Design strategy, organization, principles for information design, principles of technology for service design.		

Text Books:

1. Christoph Meinel and Larry Leifer, "Design Thinking", Springer, 2011

Reference Books:

1. Aders Riise Machlum, "Extending the TILES Toolkit" from Ideation to Prototyping
2. <http://www.algasytm.com/it-executives-guide-to-design-thinking:e-book>.

DESIGN THINKING LABORATORY & PRODUCT INNOVATION LABORATORY

II B.ech I Semester: CSE

Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
19CA53302	Foundation			2	2	30	70	100
Contact Classes: Nil	Tutorial Classes: Nil	Practical Classes: 42			Total Classes: 42			

COURSE OBJECTIVES:

- Build mindsets & foundations essential for designers
- Learn about the Human-Centered Design methodology and understand their real-world applications
- Use Design Thinking for problem solving methodology for investigating illdefined problems.
- Undergo several design challenges and work towards the final design challenge

Apply Design Thinking on the following Streams to

- Project Stream 1: Electronics, Robotics, IOT and Sensors
- Project Stream 2: Computer Science and IT Applications
- Project Stream 3: Mechanical and Electrical tools
- Project Stream 4: Eco-friendly solutions for waste management, infrastructure, safety, alternative energy sources, Agriculture, Environmental science and other fields of engineering.

TASKS TO BE DONE:

Task 1 : Everyone is a Designer

- Understand class objectives & harness the designer mindset

Task 2: The Wallet/Bag Challenge and Podcast

- Gain a quick introduction to the design thinking methodology
- Go through all stages of the methodology through a simple design challenge
- Podcast: Observe, Listen and Engage with the surrounding environment and identify a design challenge.

Task 3: Teams & Problems

- Start Design Challenge and learn about teams & problems through this
- Foster team collaboration, find inspiration from the environment and learn how to identify problems

Task 4: Empathy

- Continue Design Challenge and learn empathy

DIRECTOR
 Chodaluwado Ramanasima Engineering College
 (AUTONOMOUS)
 TIRUPATI

- Learn techniques on how to empathize with users
- Go to the field and interview people in their environments
- Submit Activity Card

Task 5: Ideating

- Continue Design Challenge and learn how to brainstorm effectively
- Encourage exploration and foster spaces for brainstorming
- Submit Activity Card

Task 6: Prototyping

- Continue Design Challenge and learn how to create effective prototypes
- Build tangible models and use them as communication tools
- Start giving constructive feedback to classmates and teammates
- Submit Activity Card

Task 7: Testing

- Finish Design Challenge and iterate prototypes and ideas through user feedback
- Evolve ideas and prototypes through user feedback and constructive criticism
- Get peer feedback on individual and group performance
- Submit Activity Card

Task 8:

- Final Report Submission and Presentation

COMMUNICATIVE ENGLISH II

II B.Tech II Semester: Common to all branches

Course code	Category	Hours/week			Credits	Maximum Marks		
		L	T	P		CIA	SEE	TOTAL
19CA52401	Foundation	2	-	-	2	30	70	100
Contact Classes:46	Tutorial Classes: Nil	Practical Classes: Nil			Total Classes:46			

OBJECTIVES:

The course should enable the students to :

- I. Help improve speaking skills through participation in activities
- II. Impart effective strategies for good writing and demonstrate the same in summarizing, writing well useful information
- III. Provide knowledge of presentations structures and vocabulary and encourage their appropriate use in speech and writing

UNIT-I		Classes:10
--------	--	------------

1. Features of Communication and Forms of Communication
2. Non-Verbal Communication and Types of Non-verbal Communication
3. Barriers to Communication and Remedies

Learning Outcomes

At the end of the module, the learners will be able to

- Become effective technical communicators.
- Sensitive use of non-verbal language suitable to different situations in professional life.
- Understand how to overcome the barriers in Communication process.

UNIT-II		Classes:10
---------	--	------------

4. Self Introduction-about you
5. English for Etiquette- Greetings-Introducing a person-Congratulating-Complimenting-
6. English for Etiquette - Requesting-Accepting/Declining an invitation-Expressing Gratitude.

Learning Outcomes

At the end of the module, the learners will be able to

- Understand social or transactional dialogues spoken by native speakers of English and identify the context, topic, and pieces of specific information
- Ask and answer general questions on familiar topics and introduce oneself/others
- Form sentences using proper grammatical structures and correct word forms

UNIT-III		Classes:10
----------	--	------------

7. Effective usage of Modal Auxiliaries in framing Conversations.
8. Dialogue building-Formal conversation-Semi formal-Informal Conversation.
9. Asking/Giving directions-Asking some for directions-Giving directions

Learning Outcomes

At the end of the module, the learners will be able to

- comprehend short talks on general topics
- participate in informal discussions and speak clearly on a specific topic using suitable discourse markers
- understand the use of cohesive devices for better conversation

UNIT-IV		Classes:08
---------	--	------------

10. Writing Stories from outline-Developing the hints-How to write stories from the outline given.
11. Letter writing- Informal letter-Formal letter (Business and order)-Official letter.
12. Abstract Writing-Book Review-Film Review

Learning Outcomes

At the end of the module, the learners will be able to

- infer meanings of unfamiliar words using contextual clues
- write summaries based on global comprehension of reading/listening texts
- Use appropriate format for writing memos and produce a coherent paragraph for notice
- use language appropriate for description elements

UNIT-V

Classes:08

13. Designing a Resume-Guidelines for a better presentations-Purpose of the Resume-Designing and formatting your Resume with covering letter- Difference between CV & Resume
14. Welcome Speech and Vote of Thanks-Charesteristics of Welcome Speech-Some common welcome quotes- How to write Vote of thanks-The order of speech for vote of thanks.
15. Report Writing- Types of Reports-Project Report

Learning Outcomes

At the end of the module, the learners will be able to

- make formal oral presentations using effective strategies
- write his/her winning Resume
- produce a well-organized speech

Text Books:

1. Advanced Skills for Communication in English: Book I by V.JEYA SANTHI Dr.R.SELVAM M.A., M.Phil., Ph.D. - December 2015 with 200 Reads, Publisher: 978-81-2343-101-7, Publisher: New Century Book House
2. Effective Technical Communication, M Ashraf Rizvi, Tata Mc.Graw-Hill Pub,company Ltd

Outcomes:

At the end of the course, the learners will be able to

1. Understand the context, topic, and pieces of specific information from social or transactional dialogues spoken by native speakers of English
2. Become effective technical communicators.
3. Analyze discourse markers to speak clearly on a specific topic in informal discussions
And create a coherent paragraph writing

COMMUNICATIVE ENGLISH II LABORATORY

II B. Tech - II Semester : Common for all branches

Course code	Category	Hours/week				Credits			Maximum Marks		
		L	T	P	C	CIA	SEE	TOTAL			
19CA52402	Foundation	-	-	3	2	30	70	100			
Contact Classes: Nil	Tutorial Classes: Nil	Practical Classes:45			Total Classes:45						

OBJECTIVES:

The course should enable the students to :

1. The course allows the students to use multi-media instruction for language development
2. To improve the students' fluency in English, through a well-developed vocabulary and enable them to listen the English spoken at normal conversational speed by educated English speakers and respond appropriately in different socio-cultural and Professional contexts.
3. Further, they would be required to communicate their ideas relevantly and coherently in writing and placing MNCs.

UNIT-I	COMMUNICATIVE COMPETENCE	Classes:09
	1. Syllables 2. Stress & Intonations 3. Listening Comprehension, Listening to the News and Understand	
UNIT-II	WRITING SKILLS	Classes:09
	1. Precise Writing 2. Resume Preparation 3. E-mail Writing	
UNIT-III	PRESENTATION SKILLS	Classes:12
	1. Oral presentation 2. Power point presentation 3. Poster presentation	
UNIT-IV	GETTING READY FOR JOB	Classes:09
	1. SWOT Analysis 2. Group Discussions 3. Interview skills	
UNIT-V	INTERPERSONAL SKILLS	Classes:06
	1. Time Management 2. Problem Solving & Decision Making 3. Etiquettes-Telephonic Etiquettes	

Minimum Requirements for SOFT SKILLS Lab:

Soft Skills Laboratory shall have the following infra-structural facilities to accommodate at least 60 students in the lab:

1. Spacious room with appropriate acoustics.
2. Round Tables with movable chairs
3. Audio-visual aids
4. LCD Projector
5. Public Address system
6. P – IV Processor, Hard Disk – 80 GB, RAM-512 MB Minimum, Speed – 2.8 GHZ
7. T. V, a digital stereo & Camcorder
8. Headphones of High quality

DIRECTOR
 Chadalawada Ramana Engineering College
 (AUTONOMOUS)
 TIRUPATI

Suggested Software:

1. Walden Info tech: Advanced English Communication Skills Lab
2. K-VAN SOLUTIONS-Advanced English Language Communication Skills lab
3. DELTA's key to the Next Generation TOEFL Test: Advanced Skills Practice.
4. TOEFL & GRE(KAPLAN, AARCO & BARRONS, USA, Cracking GRE by CLIFFS)
5. Train2success.com

OBJECT ORIENTED PROGRAMMING THROUGH JAVA LABORATORY

II B.Tech(CSE), II Semester

Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
19CA05404	Core	-	-	2	1	30	70	100
Contact Classes: Nil	Tutorial Classes: Nil	Practical Classes: 42			Total Classes: 42			

Course Objectives:

The course will enable the students to:

- Learn to use object orientation to solve problems and use java language to implement them
- To experiment with the syntax and semantics of java language and gain experience with java programming

Week-1 | Installation and Practice

1. Preparing and practice – Installation of Java software, study of any Integrated development environment, sample programs on Java. Learn to compile, debug and execute Java programs.

Week-2 | Basic Programs

1. Write a Java program to solve Quadratic equation.
2. Write a Java program to generate Fibonacci series
 - a. Using Iterative procedure
 - b. Using Recursive procedure

Week-3 | Matrices, Overloading

1. Write a Java program to multiply two Matrices.
2. Write a Java program on Method overloading

Week-4 | Method Overriding, Constructor overloading

1. Write a Java program on Method overriding.
2. Write a Java program on Constructor overloading

Week-5 | Number and String Palindrome, abstract class

1. Write a Java program that checks whether given number is Palindrome or not.
2. Write a Java program that checks whether given string is Palindrome or not.
3. Write a Java program to create a super class called Figure that receives the dimensions of two dimensional objects. It also defines a method called area that computes the area of an object. The program derives two subclasses from Figure. The first is Rectangle and second is Triangle. Each of the sub classes override area() so that it returns the area of a rectangle and triangle respectively.

Week-6 | Sorting Names, Dynamic method dispatch

1. Write a Java program to sort a list of names in ascending order.
2. Write a Java program that performs Dynamic method dispatch.

Week-7 | Inheritance, Interface

1. Write Java program(s) on use of inheritance, preventing inheritance using final
2. Write Java program(s) on ways of implementing interface

Week-8 | Exception Handling

1. Write Java Program(s) which uses the exception handling features of the language, creates exceptions and handles them properly.
 - a). Uses the predefined exceptions.
 - b). Create own exceptions.

Week-9 | Creating threads, Command Line Arguments

1. Write a Java Program on creating multiple threads
 - a). Using extending thread class.
 - b). Using implementing runnable interface

DIRECTOR
 Chodanawada Ramanna Engineering College
 (AUTONOMOUS)
 TIRUPATI

2. Write a Java Program that demonstrate Command Line Arguments

Week-10 Applets

1. Write a Java Program to develop an Applet that demonstrate a simple message.
2. Write a Java Program to pass parameters to an Applet

Week-11 Multithreading

1. Develop an applet for waving a Flag using Applets and Threads.
2. Write a Java program that creates three threads. First thread displays "Good Morning" every one second, the second thread displays "Hello" every two seconds and the third thread displays "Welcome" every three seconds.

Week-12 Files, Keyboard Events

1. Write a Java program to find and replace pattern in a given file.
2. Write a Java program to handle keyboard events.

Week-13 AWT Controls, Layout Managers

1. Write a Java Program to create the following
 - a). AWT Button
 - b). AWT checkbox
 - c). Scrollbar
2. Write Java Programs to demonstrate Layout Managers

Week-14 Caluculator

Design a simple calculator which performs all arithmetic operations. The interface should look like the calculator application of the operating system. Handle the exceptions if any

ADVANCED PYTHON PROGRAMMING LABORATORY

VI- Semester : CSE

Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
17CA05612	Core	-	-	3	2	30	70	100
Contact Classes: Nil	Tutorial Classes: Nil	Practical Classes: 45			Total Classes: 45			

Objectives:

The course should enable the students to:

- To write, test, and debug simple Python programs.
- To implement Python programs with conditionals and loops.
- Use functions for structuring Python programs.
- Represent compound data using Python lists, tuples, dictionaries.
- Read and write data from/to files in Python.
- Use GUI programming, To implement Python programs with package.

LIST OF EXPERIMENTS

Week -1	BASICS
	<ul style="list-style-type: none"> • Write a python script to display a simple message • Write a python script to perform basic arithmetic operations on two values which are accepted from the user. • Exponentiation (power of a number) • Find the maximum of a list of numbers
Week-2	CONTROL FLOW
	<ul style="list-style-type: none"> • Write a python script to calculate the factorial of a given number. • Write a python script to calculate sum of individual digits of a given number. • Write a python script to display the prime number series up to the given N Value.
Week-3	CONTROL FLOW
	<ul style="list-style-type: none"> • Write a python script to find the largest number among three numbers and display them in ascending order using if-else construct. • Write a python script to display Fibonacci sequence of numbers using while loop, for loop and do-while loop constructs.
Week-4	FUNCTIONS
	<ul style="list-style-type: none"> • Write a python script to find GCD of two numbers using recursive and non recursive Functions. • Write a python script to convert the following using functions: (i) Fahrenheit to Celsius Temperature. (ii) Celsius to Fahrenheit temperature.
Week -5	STRINGS
	<ul style="list-style-type: none"> • Write a python script to demonstrate string methods.

DIRECTOR
 Chadalawada Ramanna Engineering College
 (AUTONOMOUS)
 TIRUPATI

	<ul style="list-style-type: none"> • Write a python Program for Creation of String. • Write a Python Program to Update entire String.
Week -6	LIST
	<ul style="list-style-type: none"> • Write a python script to create a list and add n number of user-defined values to the list and display the same on to the console screen. • Write a python script to perform the following operations on Lists: (i) Matrix Addition. (ii) Matrix Multiplication.
Week -7	LIST
	<ul style="list-style-type: none"> • Write a python script to search a key element in the given list of elements. • Write a python script to arrange the given list of elements in ascending or descending order. • Find the maximum of a list of numbers.
Week -8	TUPLE AND DICTINARIES
	<ul style="list-style-type: none"> • Write a Python program to convert a list of tuples into a dictionary. • Write a Python script to concatenate following dictionaries to create a new one.
Week -9	FILES
	Write a python script to remove all the occurrences of a given character from a text file, copy the resultant text into another text file. Find the total occurrences of the eliminated characters and display the count along with the contents of the text file on to the console.
Week -10	FILES
	<ul style="list-style-type: none"> • Write a Python program to read a file line by line store it into a variable. • Write a Python program to copy the contents of a file to another file .
Week -11	OBJECT ORIENTED PROGRAMMING AND GUI PROGRAMMING
	<ul style="list-style-type: none"> • Write a GUI Script for creating text label in a window. • Write a Python Script to create a command button. When the button is clicked the event should be handled and the message on the window should change from "Hello" to "Good Bye".
Week -12	OBJECT ORIENTED PROGRAMMING AND GUI PROGRAMMING
	<ul style="list-style-type: none"> • Write a Python class to convert an integer to a roman numeral. • Write a Python class to reverse a string word by word.
Week-13	OBJECT ORIENTED PROGRAMMING AND GUI PROGRAMMING
	<ul style="list-style-type: none"> • Write a python script to demonstrate the Exception Handling. • Write a Python script to demonstrate the Mouse and Key Event handling. • Write a python script to demonstrate menu driven applications.
Week-14	TKINTER PACKAGE.
	By forming a group of 3 to 4 members develop a mini project for Horse Race Simulation with the help of GUI programming and tkinter package.

		I MBA I Semester						
Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P	C	Internal	External	Total
20CE00102	Foundation	4	-	-	4	40	60	100
Contact classes:50	Tutorial Classes:15	Practical classes: Nil				Total classes:65		

The objective of this course is to understand the relevance of economics in business concepts. This will enable the students to study various concepts related to functional areas of Demand of the products and services, Production, Market structures, Pricing and Costing, National Income and inter sectoral changes from a broader perspective.

COURSE OUTCOMES: The student is able to

CO1: Examine the basic concepts and principles of Managerial Economics and its relationship with other subjects.(K4)

CO2: Apply the concepts of production and demand concepts in Business Situations (K3)

CO3: Apply the concepts of pricing in business situations and Examine concepts of business structures (K3)

CO4: Analyse the concepts of Economic decision making ,Risk and uncertainties and apply in business (K4)

CO5: Examine the basic concepts of National Income , Money and capital markets ,Fiscal and monetary policies. Evaluate Economic Indicators and inter sectoral linkages (K5)

Unit – I	Foundation of Managerial Economics & Basic Concepts	Classes: 10
-----------------	--	--------------------

Introduction to Managerial Economics:

Nature and Scope of Managerial Economics, Meaning, characteristics, scope and subject matter relationship with other disciplines, decision making and forward planning, Fundamental principles of managerial economics: - Opportunity cost principle-incremental principal, principle of time perspective, discounting principle and equi-marginal principle.

Unit – II	Production and Demand Analysis	Classes: 10
------------------	---------------------------------------	--------------------

Introduction to Production - Production function - Cobb-Douglas Production function - Law of variable proportions - Marginal Rate of Technical Substitution - Iso - quants - types of Iso-quants - Returns to scale and returns to variable – Iso-costs - Economies of scale. Demand Analysis: Meaning and definition of demand, determinants of demand, law of demand, exception to the law of demand, elasticity of demand, Demand Forecasting, Meaning and definitions- methods of demand forecasting, criteria of good forecasting methods.

Unit – III	Pricing and Market structures	Classes: 10
-------------------	--------------------------------------	--------------------

DIRECTOR
 Chadalawada Ramanamma Engineering College
 (AUTONOMOUS)
 TIRUPATI

Introduction to Pricing - objectives of pricing - Multiple product pricing - Pricing of new products - skimming and penetration - Pricing methods - Market structures - Monopoly - Duopoly - Oligopoly (Paul Sweezy kinked demand curve) - Perfect competition - Monopolistic competition - Price discrimination - Introduction to game theory. Revenue – meaning – total revenue, average revenue and marginal revenue - Break even analysis- break even chart.

Unit – IV	Economic Decision Making	Classes: 10
------------------	---------------------------------	--------------------

Principles of Economic decision-making – Concept of Required Rate of Return – Annual cost and Annual-worth Comparisons – Present-worth analysis – The Cost of Capital, Economic Life, Replacement Economy – Analysis of risk and uncertainty.

Unit – V	National Income and Inter Sectoral Linkages	Classes: 10
-----------------	--	--------------------

Introduction to National Income Accounts – Models of National Income Determination – Economic Indicators; Technology and Employment – Issues and Challenges; Business and Government. Inter-Sectoral Linkages: Macro Aggregates and Policy Interrelationships – Fiscal and Monetary Policies; Industrial Finance – Money Market, Capital market and Institutional Finance.

BUSINESS COMMUNICATION

I MBA I Semester								
Course code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		C	Internal	External
20CE00105		4	-	-	4	40	60	100
Contact Classes: 50	Tutorial Classes: 15	Practical Classes - Nil			Total Classes - 65			

COURSE OBJECTIVES :

To understand and demonstrate writing and speaking processes through invention, organization, drafting, revision, editing, and presentation. To understand the importance of specifying audience and purpose and to select appropriate communication choices. To understand and appropriately apply modes of expression, i.e., descriptive, expository, narrative, scientific, and self-expressive, in written, visual, and oral communication.

COURSE OUTCOMES:

- CO1: To build tertiary level grammatical usage in language[K3]
- CO2: To apply LSRW skills in a professional context[K3]
- CO3: To acquaint students with evolving trends in professional communication. [K6]
- CO4: To excel the students in documentation.[K2]
- CO5: To develop the conversation skills of the students [K3].

UNIT -I: Fundamentals Of Business Communication:

Formal and Informal Communication Listening to Conversations – Interviews - Introducing a Product or Service - Small Talk - SWOT Analysis - Telling a story effectively - Reading Reports - Comprehending passages in Business and Economy-related Newspapers – Basics of Business - Correspondence - Formal Letters - Letters calling Quotations - Follow Up and Complaints Letters.

UNIT - II Presentation and Group Discussion Skills:

LISTENING –SPEAKING: Seminars, Conferences - Preparing PowerPoint's – READING: Profiles of Companies - Interpreting Data - Case Studies – WRITING: Reports - Survey – Feasibility

B. Srinivas
DIRECTOR
Chadalawada Ramanamma Engineering College
(AUTONOMOUS)

Business Communication Lab-I

I MBA I Semester :									
Course Code	Category	Hours/Week				Credits	Maximum Marks		
		L	T	P	C		Internal	External	Total
20CE00108	Foundation	4	-	-	4	40	60	100	
Contact classes:50	Tutorial Classes:10	Practical classes: Nil				Total classes:55			

Objectives:

The introduction of Business Communication Lab is considered as essential in the I year I semester level. At this stage the students have to develop themselves for their career so that they have to practice listening, speaking, Reading and writing skills in English for interpersonal communication and for their Profession in this globalised era.

Course Outcomes:

CO1: To extract the need and importance of effective communication skills in the social and work related situations. (K4)

CO2: To use phonetics in different business/work related situations. (K3)

CO3: To elevate listening skills and effective communication skills. (K2)

CO4: Thorough application of speaking skills and capable of organising various events. (K3)

CO5: Develop writing and reading skills and equipping managerial skills. (K6)

Unit – I	Understanding the need of Communication Skills	Classes: 15
-----------------	---	--------------------

Understanding the need of Communication Skills for Managers, importance of effective communication through different social/work related situations, Enact role play of verbal and Nonverbal communication, Identifying the communication barriers in the organization through case studies, identify effective use of body language, paralanguage and spatial communication

Unit – II	Phonetics	Classes: 10
------------------	------------------	--------------------

Phonetics– Introduction to sounds of speech, vowels and consonants, phonetic transcription, orthographic transcription, syllabification, word stress, Innovation, Accent, Rhythm, Oral Skills, Situational Dialogues, Role Plays.

Unit - III	Listening exercises	Classes: 10
-------------------	----------------------------	--------------------

Listening with a focus on pronunciation (ear training) : segmental-sounds, stress, eak forms, pronunciation - listening for meaning (oral comprehension) listening to talks, lectures, conversations, jokes, riddles etc.

DIRECTOR
 Chadalawada Ramanamma Engineering College
 (AUTONOMOUS)
 TIRUPATI

Unit – IV	Speaking Skills	Classes: 10
------------------	------------------------	--------------------

Speaking about the future plans, expressing opinions, Telephone conversations, PPT Presentations, Poster Presentations, Public Speaking, Welcome Address (Inviting Dignitaries to department workshops, symposiums and university functions proposing vote of thanks), Interview Skills and Mock Interviews.

Unit – V	Writing and Reading exercises	Classes: 10
-----------------	--------------------------------------	--------------------

Reading and comprehension of the texts supported by suitable exercises Use of Dictionary, Note making after reading a text, showing the main idea and supporting ideas and the relationships between them -Practice in writing paragraphs, short essays and summaries. Skills Training:- Non-Verbal communication, Decision Making, Goal Setting, Etiquettes and grooming, Stress Management, Time Management, Problem Solving Skills.

INFORMATION TECHNOLOGY LAB - I

		I MBA I Semester :						
Course Code	Category	Hours/Week			Credits	Maximum Marks		
20CE00109		L	T	P	C	Internal	External	Total
		-	-	4	2	40	60	100
Contact classes: 31	Tutorial Classes: 0	Practical classes: Nil				Total classes: 31		

Course Objectives:

The Objective of the course is to provide basic understanding of applications of information technology and hands on experience to students in using computers for data organization and addressing business needs.

Course Outcomes:

CO1: To Understand the evolution of computer (K2)

CO2: To Develop different business IT related documents(K3)

CO3: To Analysis various data for decision Making in Business (k4)

CO4: To Present the information by using different tools in Information technology to the students(K2)

CO5: To analyse and interpret data to support decision making(K6)

UNIT - I	STUDY OF EVOLUTION OF COMPUTERS	Classes: 10
-----------------	--	--------------------

Generations - Assembling & Disassembling of Computer Components, Computer Networks - Applications of computers in Management -Internet, E-Commerce, E-Business.

UNIT - II	MS Word	Classes: 10
------------------	----------------	--------------------

Creating, saving editing and printing of documents -Find and replace options - Formatting with tables, charts and pictures- Mail Merge - Spell check and grammar checks

UNIT - III	MS Excel	Classes: 6
-------------------	-----------------	-------------------

Creating, naming and saving worksheets Data entry-Manual and automatic - Formatting cells and cell referencing - Working with graphs and charts - Creating and using formulas and functions - Previewing and printing worksheets. Data management tools Statistical Applications -Measures of central tendency.

UNIT - IV	MS-Power Point	Classes: 6
------------------	-----------------------	-------------------

Ramesh

Chadawalawada Ramanamma Engineering College
(AUTONOMOUS)
TIRUPATI 52

Presenting features, creating, saving a presentation using different methods editing, using different designs, layouts, color schemes, formatting, custom animating and displaying the presentation.

UNIT – V	MS Access & Data Interpretation	Classes: 6
----------	---------------------------------	------------

MS-Access: Create Databases, Tables & Relationships – Create forms to enter Data – Filter Data- Use of queries in data manipulation – Generating Reports.

Data Interpretation: Insert tables- Data Analysis using tables - Pie Charts - Caselets - Bars - Line Graphs - Data Sufficiency

Business Analytics Lab

		I MBA II Semester :						
Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		Internal	External	Total
17CE00208	Foundation	4	-	-	4	40	60	100
	Contact classes:50	Tutorial Classes:15 Practical classes: nil				Total classes:65		

Course Objectives:

To understand the basic concepts of business analytic. To learn financial, marketing experiments. To learn HRM, systems experiments. To understand the concepts of Information Technology

Course Outcomes:

- CO1: To understand the basic concepts of businessanalytics [K2]
- CO2: Demonstrating and experimenting financial aspects [K3]
- CO3: Examining marketing and sales aspects [k4]
- CO4: Demonstrating & creating humanresource administration [K6]
- CO5: Design Management information systems[k6]

UNIT - I	Introduction to Business Analytics – Accounting experiments	Classes: 10
-----------------	--	--------------------

Introduction to Business Analytics – functions – concepts. Creation of company – Preparation of Ledger - Posting Trial Balance – Profit and Loss Account – Balance sheet sole traders - Softwares:Finnacle

UNIT - II	Financial Experiments	Classes: 10
------------------	------------------------------	--------------------

Capital budgeting decisions – Calculations of NPV – Calculations of IRR – Calculations of Profitable Index – Softwares:Tally 9.0

DIRECTOR

Meaning and Essentials of Partnership Firm –Registration Deed – Tests of Partnership-Rights and Duties of Partners –Dissolution of Partnership.

UNIT –V: COMPANIES ACT 2013 & NEGOTIABLE INSTRUMENTS ACT, 1881

(i) Nature and Types of Companies – Formation of a Company –Memorandum of Association-Articles of Association–Kinds of Shares – Company Act amended in 2013 - Duties of Directors-Winding up Procedure.

(ii) Kinds of Negotiable Instruments and Endorsement- Presentation of a Negotiable Instrument Discharge of a Negotiable Instrument – Goods and Services Tax Act,2017

Relevant cases have to be discussed in each unit

OBJECT ORIENTED PROGRAMMING THROUGH JAVA LAB

II Semester								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
20CF00212	Core	L	T	P	C	CIA	SEE	Total
		-	-	4	2	40	60	100
Contact Classes: Nil	Tutorial Classes: Nil	Practical Classes: 45			Total Classes: 45			
Course Objectives: <ul style="list-style-type: none"> Practice object-oriented programs and build java applications. Implement java programs for establishing interfaces. Implement sample programs for developing reusable software components. Course Outcomes: <ul style="list-style-type: none"> Create a software application using the Java programming language. Debug a software application written in the Java programming language. Test a software application written in the Java programming language. Create database connectivity in java and implement GUI applications. Students learn to implement sample programs for developing reusable software components. 								
List of Experiments								
Week-1								
a. Try debug step by step with small program of about 10 to 15 lines which contains at least one if else condition and a for loop. b. Write a java program that prints all real solutions to the quadratic equation $ax^2+bx+c=0$. Read in a, b, c and use the quadratic formula. c. The Fibonacci sequence is defined by the following rule. The first two values in the sequence are 1 and 1. Every subsequent value is the sum of the two values preceding it. Write a java program that uses both recursive and non-recursive functions.								
Week-2								
a. Write a java program to multiply two given matrices. b. Write a java program to implement method overloading and constructors overloading. c. Write a java program to implement method overriding.								
Week-3								
a. Write a java program to check whether a given string is palindrome. b. Write a java program for sorting a given list of names in ascending order. c. Write a java program to create an abstract class named Shape that contains two integers and an empty method named print Area (). Provide three classes named Rectangle, Triangle and Circle								

DIRECTOR
 Ramasubramanian Engineering College
 Tirupattur

such that each one of the classes extends the class Shape. Each one of the classes contains only the method print Area () that prints the area of the given shape.

Week-4

Write a program that creates a user interface to perform integer division. The user enters two numbers in the text fields, Num1 and Num2. The division of Num1 and Num2 is displayed in the Result field when the Divide button is clicked. If Num1 and Num2 were not integers, the program would throw a Number Format Exception. If Num2 were zero, the program would throw an Arithmetic Exception Display the exception in a message dialog box.

Week-5

Write a java program that creates menu which appears similar to the menu of notepad application of the Microsoft windows or any editor of your choice.

Week-6

- Write a java program that reads a file name from the user, and then displays information about whether the file exists, whether the file is readable, whether the file is writable, the type of file and the length of the file in bytes.
- Write a java program that displays the number of characters, lines and words in a text file.
- Write a java program that reads a file and displays the file on the screen with line number before each line.

Week-7

- Suppose that table named table.txt is stored in a text file. The first line in the file is the header, and the remaining lines correspond to rows in the table. The elements are separated by commas. Write a java program to display the table using labels in grid layout.
- Write a java program that connects to a database using JDBC and does add, delete, modify and retrieve operations.

Week-8

Write a java program to handle keyboard events

Week-9

- Write a java program that takes tab separated data (one record per line) from a text file and insert them into a database.
- Write a java program that prints the metadata of a given table.

Week-10

Write a java program that simulates a traffic light. The program lets the user select one of three lights: Red, Yellow or Green with radio buttons. On selecting a button an appropriate message with "STOP" or "READY" or "GO" should appear above the buttons in selected color. Initially, there is no message shown.

Week-11

Write a java program that handles all mouse events and shows the event name at the center of the window when a mouse event is fired. Use adapter classes.

Write a java program to demonstrate the key event handlers.

INTERNET OF THINGS

II-Semester									
Course Code	Category	Hours / Week			Credits	Maximum Marks			
17CD05203	Core	L	T	P	C	CIA	SEE	Total	
		4	-	-	4	40	60	100	
Contact Classes: 60	Tutorial Classes: Nil	Practical Classes: Nil			Total Classes: 60				
<p>Objectives: The course should enable the students to:</p> <ul style="list-style-type: none"> Understand the architecture of Internet of Things and connected world. Explore on use of various hardware and sensing technologies to build IoT applications. Illustrate the real time IoT applications to make smart world. <p>Outcomes:</p> <ul style="list-style-type: none"> Interpret the vision of IoT from a global context. Determine the Market perspective of IoT. Compare and Contrast the use of Devices, Gateways and Data Management in IoT. Implement state of the art architecture in IoT. Illustrate the application of IoT in Industrial Automation and identify Real World Design 									
UNIT-I	Introduction to Internet of Things (IoT)							Classes: 12	
Definition and characteristics of IoT, physical design of IoT, logical design of IoT, IoT enabling technologies, IoT levels and deployment, domain specific IoTs.									
UNIT-II	IoT and M2M							Classes: 12	
Introduction, M2M, difference between IoT and M2M, software defined networking (SDN) and network function virtualization (NFV) for IoT, basics of IoT system management with NETCONF-YANG.									
UNIT-III	IoT Architecture and Python							Classes: 12	
IoT Architecture: State of the art introduction, state of the art; Architecture reference model: Introduction, reference model and architecture, IoT reference model. Logical design using Python: Installing Python, Python data types and data structures, control flow, functions, modules, packages, file handling.									
UNIT-IV	IoT Physical Devices and Endpoints							Classes: 12	
Introduction to Raspberry Pi interfaces (Serial, SPI, I2C), programming Raspberry Pi with Python, other IoT devices.									
UNIT-V	IoT Physical Servers and Cloud Offerings							Classes: 12	
Introduction to cloud storage models and communication APIs; WAMP: AutoBahn for IoT, Xively cloud for IoT; Case studies illustrating IoT design: Home automation, smart cities, smart environment.									
Text Books:									
1. Arshdeep Bahga, Vijay Madisetti, "Internet of Things: A Hands-on-Approach", VPT, 1 st Edition, 2014. 2. Matt Richardson, Shawn Wallace, "Getting Started with Raspberry Pi", O'Reilly (SPD), 3 rd Edition, 2014.

MOBILE APPLICATION DEVELOPMENT

II-Semester								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
17CD05204	Core	L	T	P	C	CIA	SEE	Total
		4	-	-	4	40	60	100
Contact Classes: 60	Tutorial Classes: Nil	Practical Classes: Nil			Total Classes: 60			
Objectives: The course should enable the students to: <ul style="list-style-type: none"> Understand fundamentals of android operating systems. Illustrate the various components, layouts and views in creating android applications Understand fundamentals of android programming. Outcomes: <ul style="list-style-type: none"> Be exposed to technology and business trends impacting mobile applications Be competent with the characterization and architecture of mobile applications. Be competent with understanding enterprise scale requirements of mobile applications. Be competent with designing and developing mobile applications using one application development framework. 								
UNIT-I	Introduction to Android						Classes: 12	
The Android 4.1 jelly Bean SDK, Understanding the Android Software Stack, installing the Android SDK, Creating Android Virtual Devices, Creating the First Android Project, Using the Text view Control, Using the Android Emulator, The Android Debug Bridge(ADB), Launching Android Applications on a Handset.								
UNIT-II	Basic Widgets						Classes: 12	
Understanding the Role of Android Application Components, Understanding the Utility of Android API, Overview of the Android Project Files, Understanding Activities, Role of the Android Manifest File, Creating the User Interface, Commonly Used Layouts and Controls, Event Handling, Displaying Messages Through Toast, Creating and Starting an Activity, Using the Edit Text Control, Choosing Options with Checkbox, Choosing Mutually Exclusive Items Using Radio Buttons								
UNIT-III	Building Blocks for Android Application Design						Classes: 12	
Introduction to Layouts, Linear Layout, Relative Layout, Absolute Layout, Using Image View, Frame Layout, Table Layout, Grid Layout, Adapting to Screen orientation. Utilizing Resources and Media Resources , Creating Values Resources, Using Drawable Resources, Switching States with Toggle Buttons, Creating an Images Switcher Application, Scrolling Through Scroll View, playing Audio, Playing Video, Displaying Progress with Progress Bar, Using Assets.								
UNIT-IV	Using Selection widgets and Debugging						Classes: 12	
Using List View, Using the Spinner control, Using the GridView Control, Creating an Image Gallery Using the ViewPager Control, Using the Debugging Tool: Dalvik Debug Monitor Service(DDMS), Debugging Application, Using the Debug Perspective.

COMMUNICATIVE ENGLISH I

I B. Tech - I Semester: Common for all branches

Course code	Category	Hours/week			Credits	Maximum Marks		
		L	T	P		CIA	SEE	Total
19CA52101	Foundation	2	-	-	2	40	60	100
Contact Classes:32	Tutorial Classes: Nil	Practical Classes: Nil			Total Classes:32			

OBJECTIVES:

- Facilitate effective listening skills for better comprehension of academic lectures and English spoken by native speakers
- Focus on appropriate reading strategies for comprehension of various academic texts and authentic materials
- Help improve speaking skills through participation in activities such as role plays, discussions and structured talks/oral presentations
- Impart effective strategies for good writing and demonstrate the same in summarizing, writing well organized essays, record and report useful information
- Provide knowledge of grammatical structures and vocabulary and encourage their appropriate use in speech and writing

UNIT-I

Classes:07

Listening: Identifying the topic, the context and specific pieces of information by listening to short audio texts and answering a series of questions.

Speaking: Asking and answering general questions on familiar topics such as home, family, work, studies and interests; introducing oneself and others.

Reading: Skimming to get the main idea of a text; scanning to look for specific pieces of information.

Reading for Writing: Beginnings and endings of paragraphs - introducing the topic, summarizing the main idea and/or providing a transition to the next paragraph.

Grammar and Vocabulary: Content words and function words; word forms: verbs, nouns, adjectives and adverbs; nouns: countables and uncountables; singular and plural; basic sentence structures; simple question form - wh-questions; word order in sentences.

Learning Outcomes

At the end of the module, the learners will be able to

- Understand social or transactional dialogues spoken by native speakers of English and identify the context, topic, and pieces of specific information
- Ask and answer general questions on familiar topics and introduce oneself/others
- Employ suitable strategies for skimming and scanning to get the general idea of a text and locate specific information
- Recognize paragraph structure and be able to match beginnings/endings/headings with paragraphs
- Form sentences using proper grammatical structures and correct word forms

UNIT-II

Classes:07

Listening: Answering a series of questions about main idea and supporting ideas after listening to audio texts.

Speaking: Discussion in pairs/ small groups on specific topics followed by short structured talks.

Reading: Identifying sequence of ideas; recognizing verbal techniques that help to link the ideas in a paragraph together.

CHADALAWADA RAMANNA ENGINEERING COLLEGE
 (AUTONOMOUS)
 TIRUPATI

Writing: Paragraph writing (specific topics) using suitable cohesive devices; mechanics of writing - punctuation, capital letters.

Grammar and Vocabulary: Cohesive devices - linkers, sign posts and transition signals; use of articles and zero article; prepositions.

Learning Outcomes

At the end of the module, the learners will be able to

- comprehend short talks on general topics
- participate in informal discussions and speak clearly on a specific topic using suitable discourse markers
- understand the use of cohesive devices for better reading comprehension
- write well structured paragraphs on specific topics
- identify basic errors of grammar/ usage and make necessary corrections in short texts

UNIT-III

Classes:06

Listening: Listening for global comprehension and summarizing what is listened to.

Speaking: Discussing specific topics in pairs or small groups and reporting what is discussed

Reading: Reading a text in detail by making basic inferences -recognizing and interpreting specific context clues; strategies to use text clues for comprehension.

Writing: Summarizing - identifying main idea/s and rephrasing what is read; avoiding redundancies and repetitions.

Grammar and Vocabulary: Verbs - tenses; subject-verb agreement; direct and indirect speech, reporting verbs for academic purposes.

Learning Outcomes

At the end of the module, the learners will be able to

- comprehend short talks and summarize the content with clarity and precision
- participate in informal discussions and report what is discussed
- infer meanings of unfamiliar words using contextual clues
- write summaries based on global comprehension of reading/listening texts
- use correct tense forms, appropriate structures and a range of reporting verbs in speech and writing.

UNIT-IV

Classes:06

Listening: Making predictions while listening to conversations/ transactional dialogues without video; listening with video.

Speaking: Role plays for practice of conversational English in academic contexts (formal and informal) - asking for and giving information/directions.

Reading: Studying the use of graphic elements in texts to convey information, reveal 46 trends/patterns/relationships, communicate processes or display complicated data.

Writing: Information transfer; describe, compare, contrast, identify significance/trends based on information provided in figures/charts/graphs/tables.

Grammar and Vocabulary: Quantifying expressions - adjectives and adverbs; comparing and contrasting; degrees of comparison; use of antonyms

Learning Outcomes

At the end of the module, the learners will be able to

- infer and predict about content of spoken discourse
- understand verbal and non-verbal features of communication and hold formal/informal conversations
- interpret graphic elements used in academic texts
- produce a coherent paragraph interpreting a figure/graph/chart/table

Thiruv
DIRECTOR
Chadalawada Ramana Engineering College
(AUTONOMOUS)
TIRUPATI

- use language appropriate for description and interpretation of graphical elements

UNIT-V

Classes:06

Listening: Identifying key terms, understanding concepts and answering a series of relevant questions that test comprehension.

Speaking: Formal oral presentations on topics from academic contexts - without the use of PPT slides.

Reading: Reading for comprehension.

Writing: Writing structured essays on specific topics using suitable claims and evidences

Grammar and Vocabulary: Editing short texts –identifying and correcting common errors in grammar and usage (articles, prepositions, tenses, subject verb agreement)

Learning Outcomes

At the end of the module, the learners will be able to

- take notes while listening to a talk/lecture and make use of them to answer questions
- make formal oral presentations using effective strategies
- comprehend, discuss and respond to academic texts orally and in writing
- produce a well-organized essay with adequate support and detail
- edit short texts by correcting common errors.

COMMUNICATIVE ENGLISH I LABORATORY

I B. Tech – I/II Semester : (Common to All Branches of Engineering)

Course code	Category	Hours/week			Credits	Maximum Marks		
		L	T	P		CIA	SEE	TOTAL
19A52102	Foundation	-	-	2	1	40	60	100
Contact Classes: Nil	Tutorial Classes: Nil	Practical Classes: 45			Total Classes: 45			

Objectives:

The course should enable the :

- students will be exposed to a variety of self instructional, learner friendly modes of language learning
- students will cultivate the habit of reading passages from the computer monitor. Thus providing them with the required facility to face computer based competitive exams like GRE, TOEFL, and GMAT etc.
- students will learn better pronunciation through stress, intonation and rhythm
- students will be trained to use language effectively to face interviews, group discussions, public speaking
- students will be initiated into greater use of the computer in resume preparation, report writing, format making etc

UNIT-I

Classes: 09

- Phonetics for listening comprehension of various accents
- Reading comprehension
- Describing objects/places/persons

Learning Outcomes

At the end of the module, the learners will be able to

- understand different accents spoken by native speakers of English
- employ suitable strategies for skimming and scanning on monitor to get the general idea of a text and locate specific information
- learn different professional registers and specific vocabulary to describe different persons, places and objects

UNIT-II

Classes: 09

- JAM
- Small talks on general topics
- Debates

Learning Outcomes

At the end of the module, the learners will be able to

- produce a structured talk extemporarily
- comprehend and produce short talks on general topics
- participate in debates and speak clearly on a specific topic using suitable discourse markers

UNIT-III

Classes: 09

- Situational dialogues – Greeting and Introduction
- Summarizing and Note making
- Vocabulary Building

Ramesh
DIRECTOR

Chudalawada Raman Engineering College
(AUTONOMOUS)
TIRUPATI

Learning Outcomes

At the end of the module, the learners will be able to

- Learn different ways of greeting and introducing oneself/others
- summarize the content with clarity and precision and take notes while listening to a talk/lecture and make use of them to answer questions
- replenish vocabulary with one word substitutes, homonyms, homophones, homographs to reduce errors in speech and writing

UNIT-IV**Classes:09**

- Asking for Information and Giving Directions
- Information Transfer
- Non-verbal Communication – Dumb Charade

Learning Outcomes

At the end of the module, the learners will be able to

- Learn different ways of asking information and giving directions
- Able to transfer information effectively
- understand non-verbal features of communication

UNIT-V**Classes:09**

- Oral Presentations
- Précis Writing and Paraphrasing
- Reading Comprehension and spotting errors

Learning Outcomes

At the end of the module, the learners will be able to

- make formal oral presentations using effective strategies
- learn different techniques of précis writing and paraphrasing strategies
- comprehend while reading different texts and edit short texts by correcting common errors

Minimum Requirements for ELCS Lab:

The English Language Lab shall have two parts:

- Computer Assisted Language Learning (CALL) Lab: The Computer aided Language Lab for 60 students with 60 systems, one master console, LAN facility and English language software for self study by learners.
- The Communication Skills Lab with movable chairs and audio-visual aids with a P.A. system, Projector, a digital stereo-audio & video system and camcorder etc.

System Requirement (Hardware component):

Computer network with LAN with minimum 60 multimedia systems with the following specifications:

- P – IV Processor
 - Speed – 2.8 GHZ
 - RAM – 512 MB Minimum
 - Hard Disk – 80 GB
- Headphones of High quality

Suggested Software:

1. Clarity Pronunciation Power – Part I (Sky Pronunciation)
2. Clarity Pronunciation Power – part II
3. K-Van Advanced Communication Skills

PROBLEM SOLVING AND PROGRAMMING

I B.Tech II- Semester : Common for All Branches									
Course Code	Category	Hours/Week			Credits	Maximum Marks			
19CA05102	Foundation	L	T	P	C	CIA	SEE	Total	
		-	-	3	1.5	30	70	100	
Contact Classes: Nil		Tutorial Classes: Nil		Practical Classes: 48			Total Classes: 48		
Objectives: <ul style="list-style-type: none"> Learn C Programming language. To make the student solve problems, implement algorithms using C language. To write diversified solutions using C language. 									
Design an algorithm and construct a flow chart using Raptor tool and then write programs for the following problems.									
LIST OF PROGRAMS									
Week -1	BASIC C PROGRAMS								
Write C program to <ol style="list-style-type: none"> 1. Find the Sum of three numbers. 2. Exchange (swap) of two numbers by using third variable. 3. Exchange (swap) of two numbers without using third variable. 4. Print the size of all data types. 									
Week - 2	BASIC C PROGRAMS								
<ol style="list-style-type: none"> a). Develop a calculator to convert time, distance, area, volume and temperature from one unit to another. b). Write a C program to find the Priority and associativity of operators using expressions. Take the expressions with different operators. c). Write a C program to swap two numbers using bitwise operators. 									
Week - 3	CONTROL STATEMENTS								
<ol style="list-style-type: none"> a) Write a C program to find whether the given number is odd or even. b) Write a C program to find the Maximum and minimum of N numbers. c) Write a C program to find the Maximum of three numbers. d) Write a C program to print 'hello world' without using semicolon. e) Write a C program to find whether the given number is odd or even using bitwise operator. f) Write a C program to find the maximum of two numbers using Conditional operator. g) Write a program which takes two integers and one arithmetic operator from the user, and performs the operation and then prints the result by using switch-case. (Operators : +, -, *, /, %) 									
Week -4	ITERATION STATEMENTS								
<ol style="list-style-type: none"> a) Write a C program to generate the required multiplication table. b) Write a C program to find the Factorial of a given number. c) Write a C program to check whether the given number is prime or not. d) Write a C program to find GCD 									
Week - 5	ITERATION STATEMENTS								
<ol style="list-style-type: none"> Write a C program to find the sum of the digits of a number. Write a C program to find whether the given integer is a Palindrome or not. Write a C program to generate Fibonacci numbers in the given range. 									

DIRECTOR
 (AUTONOMOUS)
TIRUPATI
Ramanamma Engineering College

Week - 6	NESTED LOOPS
	<p>a) Write a C program to print the following pattern.</p> <pre> 1 2 2 3 3 3 </pre> <p>b) print multiplication tables upto the given table.</p> <p>c) Write a C program to print Series of prime numbers in the given range.</p>
Week - 7	NESTED LOOPS
	<p>a) Write a C program to check given number is strong number or not.</p> <p>b) Write a C program to evaluate the sum of the following series up to 'n' terms $e^x = 1 + x + x^2/2! + x^3/3! + x^4/4! + \dots$</p>
Week - 8	ARRAYS
	<p>a).calculate the maximum, minimum and average of N numbers.</p> <p>b).Write a C program to find the sum of positive and negative numbers in a given set(Array) of numbers.</p> <p>c).Design a flowchart to perform Linear search on list of N unsorted numbers(Iterative and recursive)</p> <p>d)Write a C program to read two matrices and find</p> <ol style="list-style-type: none"> Sum. Product and display the result in the matrix form.
Week -9	ARRAYS
	<p>a) Write a C program to read matrix and perform the following operations</p> <ol style="list-style-type: none"> Find the sum of Diagonal Elements of a matrix. Print Transpose of a matrix. Print sum of even and odd numbers in a given matrix.
Week - 10	STRINGS
	<p>a) Write a C program to read two strings and perform the following operations without using built-in string Library functions.</p> <ol style="list-style-type: none"> String length determination. Compare Two Strings. Concatenate Two Strings. String reversing <p>b) Write a C program to accept a line of characters and print the number of Vowels, Consonants, blank spaces, digits and special characters.</p> <p>c) Write a C program to read a set of strings and sort them in alphabetical order.</p>
Week -11	FUNCTIONS
	<p>a) Write a C program to illustrate the following types of functions</p> <ol style="list-style-type: none"> Function with no arguments and no return values Function with arguments and no return value Function without arguments and with return value Function with arguments and with return value
Week - 12	POINTERS
	<p>a) Write a C program to exchange two numbers using pointers.</p> <p>b) Write a program to print the elements of an array in reverse order using pointers.</p>
Week - 13	FUNCTIONS
	<p>a) Write a C program to express a four digit number in words. For example 1546 should be written as one thousand five hundred and forty six</p> <p>b) Write a program using recursion for finding Factorial of a number</p>

[Signature]
DIRECTOR

Chaitanya Engineering College
(AUTONOMOUS)
TIRUPATI

- c). calculate the greatest common divisor using iteration and recursion for two numbers as specified by the user
 d). Write a C program to illustrate the Dynamic Memory allocation function malloc()

Week -14 STRUCTURES

- a) Declare a structure time that has three fields hr, min, secs. Create two structure variables start_time and end_time. Input their values from the user. Then if start_time is not equal to end_time then display HELLO CREC on the screen.
 b) Write a C program to read student roll no, name and marks in six subjects for n number of students and give class of each student by following the required conditions.
 c) Write a C program to demonstrate self referential structures.

Week -15 FILES

- a) Write a program to create a file and write some text data on the file. Then display the contents of the file and also print number of characters, number of words, number of lines in the file.
 b) Write a C program to merge two files.

Week -16 FILES

- a) Write a C program to create a text file and write data on it, then display every 5th character in that file.
 b) Write a program to read student records into a file. Record consists of rollno, name and marks of a student in six subjects and class. Class field is empty initially. Compute the class of a student. The calculation of the class is as per CREC rules. Write the first class, second class, third class and failed students lists separately to another file.

OUTCOMES:

- Illustrate flowchart and algorithm to the given problem
- Understand basic Structure of the C-PROGRAMMING, declaration and usage of variables
- Write C programs using operators
- Exercise conditional and iterative statements to Write C programs
- Write C programs using Pointers to access arrays, strings and functions.
- Write C programs using pointers and allocate memory using dynamic memory management functions.
- Exercise user defined data types

PROBLEM SOLVING AND PROGRAMMING

I B.Tech I/II Semester: Common for All Branches

Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		CIA	SEE	Total
19CA05101	Foundation	3	1	-	4	40	60	100
Contact Classes:45	Tutorial Classes:15	Practical Classes: Nil			Total Classes:60			

Objectives:

- Understand problem solving techniques
- Understand representation of a solution to a problem
- Understand the syntax and semantics of C programming language
- Understand the significance of Control structures
- Learn the features of C language

UNIT - I	INTRODUCTION TO COMPUTERS AND C LANGUAGE	Classes:14
-----------------	---	-------------------

Introduction to Computers, Introduction to Programming, Algorithms, Flowcharts, Flow chart symbols, Input/Output, Assignment, operators, conditional if, repetition, function and sub charts. Example problems–Finding maximum of 3 numbers, Unit converters, Interest calculators, multiplication tables, GCD of 2 numbers. Example problems-Fibonacci generation, prime number generation. Minimum, Maximum and average of n numbers, Linear search, Binary Search. Introduction to C Language, C Language Elements, Variables, Data Types, Operators and Expressions, Constants, Declarations, Operators, Type Conversions, Precedence and Order of Evaluation.

UNIT - II	CONTROL STATEMENTS, LOOPS AND ARRAYS	Classes:13
------------------	---	-------------------

Statements: Selection Statements, Iteration Statements, Jump statements: Break, Continue, goto, Arrays: Accessing Array Elements, Single & Multi Dimensional Arrays.

UNIT - III	STRINGS AND FUNCTIONS	Classes:13
-------------------	------------------------------	-------------------

Strings: Declaring, Initialization of a String, Reading and Writing Strings, String manipulation functions from the standard Library, String I/O Functions: gets(), puts().
Functions: Definition, Function Call- Call by Value, Storage Class Specifiers, Understanding the scope of Functions with its Types, the Return Statement, Recursion, Command Line Arguments.

UNIT - IV	POINTERS, STRUCTURES AND UNIONS	Classes:14
------------------	--	-------------------

Pointers: Pointer Variables, Pointer Expressions, Pointers And Arrays, Pointers to Strings, Call by Reference, C's Dynamic Allocation Functions, Problems with Pointers.
Structures and Unions: Accessing structure members, Array of structures, Passing Structures to Functions, Structure Pointers, Structures within Structures, Bit Fields, Enumerations, Typedef.

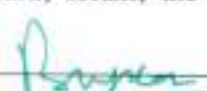

UNIT -V	FILE I/O	Classes:14
----------------	-----------------	-------------------

Streams and File, File System Basics: File pointer, opening a file using fopen(), closing a file, getc(), putc(), fclose(), feof(), fputs, fgets(), ferror(), fread(), fwrite(), fseek(), Formatted Console I/O: fprintf, fscanf, the Preprocessor Directives: #define and #include.

PYTHON PROGRAMMING

II Semester: CSE

Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		CIA	SEE	Total
19CA05201	Foundation	3	-	-	3	30	70	100
Contact Classes: 45	Tutorial Classes: Nil	Practical Classes: Nil			Total Classes: 45			

Objectives:

The course should enable the students to:

- To educate problem solving through python programming language.
- To train in development of solutions using modular concepts.
- To teach practical Pythonic solution patterns.
- To introduce function-oriented programming paradigm through python.

UNIT-I INTRODUCTION TO PYTHON **Classes: 10**

Introduction to Python: Python- Numbers, Strings, Variables, operators, expressions, statements, String Operations, Math function calls, Input/Output statements.

UNIT-II CONTROL STATEMENTS **Classes: 09**

Conditional If, while and for loops, User defined Functions, parameters to functions, recursive functions.

UNIT-III DATA STRUCTURES AND IDIOMATIC PROGRAMMING IN PYTHON **Classes: 08**

Lists, Tuples, Dictionaries, Strings, Files and their libraries, Beautiful Idiomatic approach to solve programming problems

UNIT-IV PYTHON OBJECT ORIENTED PROGRAMMING **Classes: 08**

Introduction to oops: Concept of class, object and instances, Method, Inheritance, Polymorphism, Data Abstraction, Encapsulation.

Oops through Python: Data hiding, Polymorphism, Inheritance, Class and static variables, Class methods and Static methods, Constructors and Destructors.

UNIT-V EVENT DRIVEN PROGRAMMING **Classes: 10**

Turtle bar Chart, Event Driven programming, Key press events, Mouse events, timer events.

Managerial Economics

		I MBA I Semester							
Course Code	Category	Hours/Week			Credits	Maximum Marks			
17CE00102	Foundation	L	T	P	C	Internal	External	Total	
		4	-	-	4	40	60	100	
Contact classes:50	Tutorial Classes:15	Practical classes: Nil				Total classes:65			

Course Objective:

The objective of this course is to understand the pertinence of economics in business concepts. This will enable the students to study the various concepts related to functional areas of Demand of the products and services, Production, Market structures, Pricing and Costing from a broader perspective.

Unit - I	Introduction to Managerial Economics	Classes: 10
-----------------	---	--------------------

Introduction to Managerial Economics : Importance, Nature and scope of Managerial Economics - Role and responsibilities of Managerial Economist - revealed preference hypothesis theory - Theory of firms - Managerial theories - Basic economics concepts - opportunity cost - Scarcity - Marginalism- Equi - marginalism - discounting principle - Incremental concept - Risk and Uncertainty.

Unit - II	Demand Analysis	Classes: 10
------------------	------------------------	--------------------

Introduction to Demand, demand schedule, demand determinants - Elasticity of demand - types of elasticity - Demand forecasting - Types of techniques - Law of supply - supply elasticity - Introduction to Production - Production function - Cobb-Douglas Production function - Law of variable proportions - Marginal Rate of Technical Substitution - Iso - quants - types of Iso-quants - Returns to scale and returns to variable - Iso-costs - Economies of scale.

Unit - III	Introduction to Cost	Classes: 10
-------------------	-----------------------------	--------------------

Introduction to Cost - cost function - types of costs - short run cost functions - relationship between total cost and total revenue - Long run cost function (envelope curve) - concept of Break even-Analysis - Introduction to Pricing - objectives of pricing - Multiple product pricing - Pricing of new products - skimming and penetration - Pricing methods.

Unit - IV	Market structures	Classes: 10
------------------	--------------------------	--------------------

Market structures - Monopoly - Duopoly - Oligopoly (Paul sweezy kinked demand curve) - Perfect competition - Monopolistic competition - Price discrimination - Introduction to game theory.

Unit - V	National Income	Classes: 10
-----------------	------------------------	--------------------

National Income - Concepts-Gross Domestic Product, Gross National Product, Net National Product-Measurement of National Income - Business Cycles and Contra cyclical policies. Factors influencing International trade. Balance of payments - disequilibrium, methods to correct dis-equilibrium.

BUSINESS COMMUNICATION

Course Code	Category	I MBA I Semester :				Maximum Marks		
		Hours/Week			Credits	Internal	External	Total
17CE00106		L	T	P	C			
		4	-	-	4	40	60	100
Contact classes:50	Tutorial Classes:15	Practical classes: Nil				Total classes:65		

Course Objectives:

The objective of this Course is to understand the communication concepts and to develop the students' competence in communication at an advanced level. Assuming that the students are fairly proficient in the basic communication skills of listening, speaking, reading and writing in English the course aims to train them in communicating efficiently in the workplace and professional contexts.

UNIT – I	Concept of Communication	Classes: 14
----------	---------------------------------	--------------------

Significance, Scope and functions of Business Communication – Process and dimensions of communication – Essentials of good communication – Channels of communication – Formal, informal communication – Upward, Downward, Horizontal communication – Grapevine Phenomenon.

UNIT – II	Types of communication: Verbal – Oral Communication	Classes: 13
-----------	--	--------------------

Verbal – Oral Communication: Advantages and limitations of oral communication, written communication – Characteristics, significance, advantages & Limitations of written communication. **Non verbal Communication:** Sign language – Body language – Kinesics – Proxemics – Time language and Haptics: Touch language

UNIT - III	Interpersonal communication	Classes: 14
------------	------------------------------------	--------------------

Communication models: Johari window – Transactional analysis, Communication styles, Managing Motivation to Influence Interpersonal communication – Role of emotion in inter personal communication.

UNIT – IV	Barriers to communication	Classes: 14
-----------	----------------------------------	--------------------

Types of barriers – Technological – Socio-Psychological barriers – Overcoming barriers, Types of listening – Tips for effective listening.

UNIT – V	Report writing	Classes: 10
----------	-----------------------	--------------------

Formal reports – The elements of clear writing – Writing effective letters – different layouts of business letters – Informal reports – Writing good news and bad news – Meetings and oral presentations, Interview techniques, Communication etiquettes.

Business Communication Lab - I

Course Code	Category	II MBA III Semester :				Maximum Marks		
		Hours/Week			Credits	Internal	External	Total
14CE00108	Foundation	L	T	P	C	40	60	100
		3	-	-	4			
Contact classes:50	Tutorial Classes:15	Practical classes: Nil				Total classes:65		

Course Description: Aim is to enable students understand how to write business letters and improve written communication.

Course Objectives:

- ✓ English language skills for effective written business communication ('s).
- ✓ Will be able to understand how to write project report.

Unit - I	Business Writing	Classes: 9
-----------------	-------------------------	-------------------

Introduction, Importance of Written Business Communication, Direct and Indirect Approached to Business Messages, Five Main Stages of Writing

Unit - II	Business Correspondence	Classes: 9
------------------	--------------------------------	-------------------

Introduction, Business Letter Writing, Effective Business Correspondence, Common Components of Business Letters, Strategies for Writing the Body of a Letter, Kinds of Business Letters, Writing Effective Memos. Practice Exercises.

Unit - III	Instructions	Classes: 9
-------------------	---------------------	-------------------

Instructions: Introduction, Written Instructions, General Warning, Caution and Danger, Format in Instructions, Oral Instructions, Audience Analysis, Product Instructions. Practice Exercises.

Unit - IV	Business Reports and Proposals	Classes: 9
------------------	---------------------------------------	-------------------

Business Reports and Proposals: Introduction, What is a Report, Steps in Writing a Routine Business Report, Parts of a Report, Corporate Reports, Business Proposals.

Unit - V	Careers and Resumes	Classes: 9
-----------------	----------------------------	-------------------

Careers and Resumes : Introduction, Career Building, Understanding yourself, setting a career goal, job search / looking at various options, preparing your resume, resume formats, traditional, electronic and video resumes,online recruitment process. Write your resume to market yourself.

Information Technology Lab

I MBA I Semester :								
Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		Internal	External	Total
17CE00109		-	-	4	2	40	60	100
	Contact classes: 31	Tutorial Classes: 0	Practical classes: Nil			Total classes: 31		

Course Description: This course is to provide basic understanding of applications of information technology and hands on experience to students in using computers for data organization and addressing business needs.

Course Objectives:

- To understand the evolution of computers
- To practical knowledge of MS Word
- To learn knowledge of MS Excel and powerpoint

UNIT – I	Study of Evolution of Computers	Classes: 5
-----------------	--	-------------------

Generations – Assembling & Disassembling of Computer Components, Computer Networks – Applications of computers in Management –Internet, E-Commerce, E-Business.

UNIT – II	Ms-Word	Classes: 8
------------------	----------------	-------------------

Creation of Document- Format Document-Text editing and saving-Organizing information with tables and outlines-Inserting tables – clip art – borders/shadings -Mail merge, Macros.

UNIT - III	Ms Excel	Classes: 6
-------------------	-----------------	-------------------

Creating and editing worksheets-Cell formatting-Creating and using formulas and functions-Use of Macros –Sorting and querying data-Working with graphs and charts. Data Analysis with Statistical Tools - Mean, Median, Average, Skewness, Correlation, Regression, Chi-Test -Use of Financial Tools-Use of other functions in Excel for data analysis.

UNIT – IV	Ms Power Point	Classes: 6
------------------	-----------------------	-------------------

MS Power Point-Creation of slides-Use of templates and slide designs for creating power point slides- use of drawings and graphics. Developing a Professional presentation on Business Plans, Institutions, Products, People etc,

UNIT – V	MS ACCESS	Classes: 6
-----------------	------------------	-------------------

Create Databases, Tables, and Relationships- Create forms to enter data-filter data-use of queries in data manipulation-Generating reports.

Business Analytics Lab

Course Code	Category	I MBA II Semester :				Maximum Marks		
		Hours/Week		Credits		Internal	External	Total
17CE00208	Foundation	L	T	P	C	40	60	100
		4	-	-	4			
Contact classes:50	Tutorial Classes:15	Practical classes: nil				Total classes:65		

Course Description:

The course is designed to understand the providing conceptual understanding of Business analytics under various functions of management. This will enable the students to study the various concepts related to applications of analytics and enabling them to apply the concepts in the management organization.

Course Objectives:

- ✓ To understand the basic concepts of business analytics
- ✓ To learn financial, marketing experiments
- ✓ To learn HRM, systemes experiments
- ✓ To understand the concepts of Information Technology

UNIT - I	Introduction to Business Analytics – Accounting experiments	Classes: 10
-----------------	--	--------------------

Introduction to Business Analytics – functions – concepts. Creation of company – Preparation of Ledger - Posting Trial Balance – Profit and Loss Account – Balance sheet sole traders.

UNIT - II	Financial Experiments	Classes: 10
------------------	------------------------------	--------------------

Capital budgeting decisions – Calculations of NPV – Calculations of IRR – Calculations of Profitable Index

UNIT - III	Marketing Experiments	Classes: 10
-------------------	------------------------------	--------------------

Storing and retrieving of data of customers - Storing and retrieving of data of sales - Storing and retrieving of data of dealers - products and geographical areas (Tables and Graphs)

UNIT - IV	HRM Experiments	Classes: 10
------------------	------------------------	--------------------

Creation of Employees data base - Demonstrating the salary administration

UNIT - V	Systems Experiments	Classes: 10
-----------------	----------------------------	--------------------

Understanding the Information Systems – Design of MIS - Overview of Internet and Internet tools.

Entrepreneurship Development

Course Code	Category	II MBA III Semester :				Maximum Marks		
		Hours/Week		Credits		Internal	External	Total
17CE00301	Foundation	L	T	P	C			
		3	-	-	4	40	60	100
Contact classes:50	Tutorial Classes:15	Practical classes: Nil				Total classes:65		

Course Description:

This course presents the concepts, characteristics of entrepreneurship in India and various institutions that are promoting entrepreneurship at national level and state level. Further, it also represents the importance of women entrepreneurship in the globalization scenario. It also describes the project management and processes of project management.

Course Objectives :

- ✓ To provide theoretical concepts of entrepreneurship.
- ✓ To give an overview of various organizations that promotes entrepreneurship in India.
- ✓ To learn the concept of women entrepreneurship in India.
- ✓ To provide awareness on Role of Government both in centre and state level in executing various entrepreneurial activities.

Unit - I	Introduction to Entrepreneurship	Classes: 10
-----------------	---	--------------------

Introduction to Entrepreneurship: Characteristics, qualities and skills of an Entrepreneur, functions of entrepreneur, entrepreneur scenario in India and abroad, forms of entrepreneurship, small business enterprises - importance of Indian economy, first mover – advantages and disadvantages, risk reduction strategies - market scope strategies, imitation strategies and managing newness.

Unit - II	Promotional Strategies	Classes: 15
------------------	-------------------------------	--------------------

Promotional strategies: Generation of new entry opportunities, SWOT analysis, technological competitiveness, legal regulatory system, patents and trademarks, intellectual property rights, project planning and feasibility studies, major steps in product development, Financial aspects.

DIRECTOR

TIRUPATI

sources of raising capital, debt-equity, financing by commercial banks, government grants and subsidies, entrepreneurship promotion, schemes of department of industries - DICs, KVIC, SIDBI, NABARD, NSIC, APSFC, IFCI and IDBI.

Unit - III	Corporate governance	Classes: 15
-------------------	-----------------------------	--------------------

Corporate governance: Corporate governance, capitalism at crossroads historical perspective of corporate governance, issues of corporate governance, theoretical basis of corporate governance, corporate governance mechanisms, Indian model of governance good corporate governance, corporate governance committees, OECD principles, Indian committee and guidelines, the confederation of Indian industry's initiative, corporate governance models.

Unit - IV	Role of government	Classes: 15
------------------	---------------------------	--------------------

Role of Central Government and State Government in promoting Entrepreneurship with various incentives, subsidies, grants etc. – with special reference to 'Export oriented units' Role of the following agencies in the Entrepreneurship Development. District Industrial Centre (DIC), Small Industries Services Institute (SISI), Entrepreneurship Development Institute of India (EDII), National Institute of Entrepreneurship and Small Business Development (NIESBUD), National Entrepreneurship Development Board (NEDB).

Unit - V	Process of project management	Classes: 10
-----------------	--------------------------------------	--------------------

Project management: Concept of project and classification of project identification, project formulation - project design, project planning, and social cost benefit analysis, financial analysis. **PROJECT APPRAISAL:** Project report and guidelines for preparing a project report, project Appraisal, Significance of project appraisal, Profitability appraisal, and project financing.

JAVA PROGRAMMING (17CAO5405)

Unit-I	Overview Of Java, Data Types, Arrays and Variables	Classes: 13
<p>Introduction: The Creation of java, how java changed the internet, Java's magic: The byte code, Servlets: java on the server side, java Buzzwords.An Overview of Java: Two control statements, Using blocks of codes, Lexical issues, The java class Libraries. Data Types, Arrays and Variables: Primitive Types, Integers, Floating-point Types, Characters, Booleans, literals, variables, Type conversion and casting, Automatic Type Promotion in Expressions, Arrays.</p>		
Unit-II	Operators, Control Statements, Classes	Classes: 14
<p>Operators: Arithmetic Operators, The Bitwise Operators, Relational Operators, Boolean Logic operators, The assignment operator, The ?: Operator, Operator Precedence, Using Parentheses. Control Statements: Java's selection Statements, Iteration statements, Jump Statements. Introducing Classes: Class Fundamentals, Declaring Objects, Assuming Object reference Variables, Introducing Methods, Constructors, The this Keyword, Garbage Collection, The Finalize() method, A Stack class. Overloading Methods, Using Object as Parameter, Argument Passing, Returning Objects, Recursion, Introducing Access control, Understanding static, Introducing Nested and Inner classes, Exploring the String class, Using Command line Arguments, Varargs: variable-Length Arguments.</p>		
Unit-III	Inheritance, Packages and Interfaces, Exception Handling	Classes: 14
<p>Inheritance: Basics, Using super, creating a multi level hierarchy, when constructors are executed, method overriding, dynamic method dispatch, using abstract class, using final with inheritance, the object class. Packages and Interfaces: Packages, Access protection, Importing Packages, Interfaces, Default Interfaces, Default interface methods, Use static methods in an Interface, Final thoughts on Packages and interfaces. Exception Handling: Exception handling Fundamentals, Exception Types, Uncaught Exceptions, Using try and catch, Multiple catch clauses, Nested try statements, throw, throws, finally, Java Built-in Exceptions, Creating your own exception subclasses, Chained Exceptions, Three Recently added Exceptions features, Using Exceptions.</p>		
Unit-IV	I/O, Applets, and Generics	Classes: 13
<p>I/O, Applets, and Other Topics: I/O basics, Reading Console input, Writing console Output, The Print Writer class, Reading and writing files, Automatically closing a file, Applet fundamentals, enumerations type wrappers auto boxing annotations. Generics: What Are Generics? The general form of a generic class, Bounded Types, Using Wildcard Arguments, creating a generic method, generics interfaces.</p>		
Unit-V	Introduction to Awt, Using Awt Controls, Layout Managers, and Menus	Classes: 14
<p>Introduction to AWT: Working with windows, graphics and Text: AWT classes, window fundamentals, working with frame windows, creating a frame window in an AWT Based applet, creating a window program, displaying information within a window, Graphics, working with color, setting the paint mode, working with fonts, managing text output using font metrics.</p> <p>Using AWT controls, Layout Mangers, and Menus: AWT control fundamentals, Labels, using buttons, applying check boxes, check box group, choice controls, using JList, Managing scroll bars, using a Text field, Using a Text area, understanding layout managers, Menu bars and Menus, dialog boxes, file dialog, Overriding paint().</p>

JAVA PROGRAMING LABORATORY

II B.Tech II Semester: CSE								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
17CA05408	Core	L	T	P	C	CIA	SEE	Total
		-	-	4	2	30	70	100
Contact Classes: Nil	Tutorial Classes: Nil	Practical Classes: 45			Total Classes: 45			
Objectives:								
The course will enable the students to:								
<ul style="list-style-type: none"> • Practice object-oriented programs and build java applications. • Implement java programs for establishing interfaces. • Implement sample programs for developing reusable software components. • Create database connectivity in java and implement GUI applications. 								
Week-1 Basic Programs								
<p>a. Write a java program that prints all real solutions to the quadratic equation $ax^2+bx+c=0$. Read in a, b, c and use the quadratic formula.</p> <p>b. The Fibonacci sequence is defined by the following rule. The first two values in the sequence are 1 and 1. Every subsequent value is the sum of the two values preceding it. Write a java program that uses both recursive and non-recursive functions.</p>								
Week-2 Matrices, Overloading, Overriding								
<p>a. Write a java program to multiply two given matrices.</p> <p>b. Write a java program to implement method overloading and constructor overloading.</p> <p>c. Write a java program to implement method overriding.</p>								
Week-3 Palindrome, Abstract Class								
<p>a. Write a java program to check whether a given string is palindrome.</p> <p>b. Write a java program for sorting a given list of names in ascending order.</p> <p>c. Write a java program to create an abstract class named Shape that contains two integers and an empty method named print Area(). Provide three classes named Rectangle, Triangle and Circle such that each one of the classes extends the class Shape. Each one of the classes contains only the method printArea() that prints the area of the given shape.</p>								
Week-4 User Interface								
Write a program that creates a user interface to perform integer division. The user enters two numbers in the text fields, Num1 and Num2. The division of Num1 and Num2 is displayed in the Result field when the Divide button is clicked. If Num1 and Num2 were not integers, the program would throw a Number Format Exception. If Num2 were zero, the program would throw an Arithmetic Exception Display the exception in a message dialog box.								
Week-5 AWT								
Write a java program that creates menu which appears similar to the menu of notepad application of the Microsoft windows								

DIRECTOR
 Chadalawada Romanamma Engineering College
 (AUTONOMOUS)
 TIRUPATI

Week-6	FILES
<p>a. Write a java program that reads a file name from the user, and then displays information about whether the file exists, whether the file is readable, whether the file is writable, the type of file and the length of the file in bytes.</p> <p>b. Write a java program that displays the number of characters, lines and words in a text file.</p> <p>c. Write a java program that reads a file and displays the file on the screen with line number before each line.</p>	
Week-7	Lay Out mangers
<p>a. Suppose that table named table.txt is stored in a text file. The first line in the file is the header, and the remaining lines correspond to rows in the table. The elements are separated by commas. Write a java program to display the table using labels in grid layout.</p>	
Week-8	Keyboard Events
Write a java program to handle keyboard events	
Week-9	Traffic Light
Write a java program that simulates a traffic light. The program lets the user select one of three lights: Red, Yellow or Green with radio buttons. On selecting a button an appropriate message with "STOP" or "READY" or "GO" should appear above the buttons in selected color. Initially, there is no message shown.	
Week-10	Mouse Events
<p>a. Write a java program that handles all mouse events and shows the event name at the center of the window when a mouse event is fired. Use adapter classes.</p> <p>b. Write a java program to demonstrate the key event handlers.</p>	
Week-11	Calculator
Write a java program that works as a simple calculator. Use a grid layout to arrange buttons for the digits and for the +, -, *, % operations. Add a text field to display the result. Handle any possible exception like divided by zero.	
Week-12	APPLET
<p>a. Develop an applet that displays a simple message.</p> <p>b. Develop an applet that receives an integer in one text field and computes its factorial value and returns it in another text field, when the button named "compute" is clicked.</p>	
Week-13	Mini Project-1
Develop library management system	
Week-14	Mini Project-2
Develop CMS system for CREC college

SOFT SKILLS LABORATORY

III B.Tech I Semester: ME								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
17CA52501	Foundation	L	T	P	C	CIA	SEE	Total
		-	-	4	2	30	70	100
Contact Classes: NIL	Tutorial Classes: NIL	Practical Classes: Nil			Total Classes: 68			

OBJECTIVES:

1. This Lab focuses on using multi-media instruction for language development to meet the following targets:
2. To improve the students' fluency in English, through a well-developed vocabulary and enable them to listen the English spoken at normal conversational speed by educated English speakers and respond appropriately in different socio-cultural and professional contexts.
3. Further, they would be required to communicate their ideas relevantly and coherently in writing.
4. To prepare all the students for their placements.

UNIT-I COMMUNICATIVE COMPETENCE

1. Reading Comprehension
2. Listening Comprehension
3. Vocabulary Development
4. Communication Styles and Competencies

UNIT-II WRITING SKILLS

1. Report Writing
2. Resume Preparation
3. E-mail Writing

UNIT-III PRESENTATION SKILLS

1. Oral presentation
2. Power point presentation
3. Informative presentation

UNIT-IV GETTING READY FOR JOB

1. SWOT/C Analysis
2. Group Discussions
3. Interview skills

UNIT-V INTERPERSONAL SKILLS

1. Time Management
2. Problem Solving & Decision Making
3. Etiquettes

Minimum Requirements for SOFT SKILLS Lab:

The Advanced English Communication Skills (AECS) Laboratory shall have the following infra-structural facilities to accommodate at least 60 students in the lab:

1. Spacious room with appropriate acoustics.
2. Round Tables with movable chairs
3. Audio-visual aids

LIST OF EXPERIMENTS

1. Introduction to Analysis Software Package

2. Structural analysis: (Any Six exercises)

Expt. 1	Analysis of a rectangular plate with a hole
Expt. 2	Analysis of a truss member under loading.
Expt. 3	Analysis of a bracket plate with axial loading
Expt. 4	Analysis of a bracket plate with eccentric loading
Expt. 5	Static Analysis of Prismatic bar
Expt. 6	Static Analysis of a Corner Bracket
Expt. 7	Static Analysis of beam
Expt. 8	Analysis of Thermally Loaded support Structure
Expt. 9	Analysis of Hinged support member
Expt. 10	Analysis of Tapered plate under transverse load

3. Thermal analysis (Any two exercises)

Expt. 1	Analysis of a square plate considering conduction.
Expt. 2	Analysis of a square plate considering conduction and convection.
Expt. 3	Analysis of a compound bodies considering conduction and convection.

4. Computational Fluid Dynamics (Any four exercises)

Expt. 1	Determine the flow of incompressible gas through an S-bend for laminar flow.
Expt. 2	Determine the flow of incompressible gas through an S-bend for turbulent flow
Expt. 3	Determine that of incompressible water flowing over a cylinder.
Expt. 4	Determine air flow over a simple geometry (airfoil) in a wind tunnel (2-D).
Expt. 5	Determine heat transfer from the heated fin within a rectangular enclosure containing air.
Expt. 6	Determine how to solve a natural convection problem (in an infinitely long concentric cylinder).
Expt. 7	Determine liquid enters through two inlets with different temperatures (multiphase flow) and leaves one outlet.

Software can be used: ANSYS, ALG NASTRAN, Star-CCM+, Fluent, FIRE, CFX

SOFTWARE TESTING METHODOLOGY

PROFESSIONAL ELECTIVE-I

Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		CIA	SEE	Total
17CA05507	Core	3	1	-	3	30	70	100
Contact Classes: 45	Tutorial Classes: 15	Practical Classes: Nil			Total Classes: 60			

Objectives:

The course should enable the students to:

- Understand the concept of software testing objectives, process criteria, strategies and methods.
- Demonstrate various software testing issues and solutions in software like unit test, integration, Regression and system testing.
- Demonstrate the techniques and skills on how to use modern software testing tools to support Software testing projects.
- Understand important concepts of complexity metrics and object oriented metrics.

UNIT-I INTRODUCTION TO TESTING **Classes: 10**

Introduction: Purpose of testing, dichotomies, model for testing, consequences of bugs, taxonomy of bugs. **Flow graphs and path testing:** Basics concepts of path testing, predicates, path predicates and achievable paths, path sensitizing, path instrumentation, application of path testing.

UNIT-II TRANSACTION FLOW TESTING **Classes: 08**

Transaction flow testing: Transaction flows, transaction flow testing techniques, dataflow testing, basics of dataflow testing, strategies in dataflow testing, application of dataflow testing.

UNIT-III DOMAIN TESTING **Classes: 09**

Domain testing: Domains and paths, nice and ugly domains, domain testing, domains and interfaces testing, domain and interface testing, domains and testability.

Logic based testing: Overview, decision tables, path expressions, kv charts, and specifications.

UNIT-IV PATH ,PATH PRODUCTS AND REGULAR EXPRESSION **Classes: 08**

Paths, path products and regular expressions: Path products and path expression, reduction procedure, applications, regular expressions and flow anomaly detection.

UNIT-V TRANSITION TESTING **Classes: 10**

State, state graphs and transition testing: State graphs, good and bad state graphs, state testing, testability tips.

**BUILDING LARGE SCALE SOFTWARE SYSTEMS
(MOOCS-III)**

Course Objectives:

- To introduce the architecture of large c programs.
- To introduce the concept Case study for design of large C programs using Linux kernel.
- To introduce the tools, technologies & programming languages.

Course Outcomes:

- Student able to understand coupling and cohesion
- Student able to design large c and c++ programs using Linux kernel
- Student able to understand how to design Linux kernel
- Ability to solve various problems related to Object Oriented Software using patterns

Unit I: Architecture of Large C Programs : Coupling and Cohesion concepts , types of cohesion functional, sequential, procedural, temporal, logical and coincidental; types of coupling – data,stamp, control, common, content coupling.

Unit II: Designing Large C programs having good cohesion and coupling; C modules- notation of separate compilation; Case study for design of large C programs using linux kernel.

Unit III: Tools for building large programs – version control using git and building large programs using make – bug tracking systems – bugzilla.

Unit IV: Building Large C++ programs – Architecture of Large C ++ programs – Coupling and Cohesion of C++ programs, Metrics for measuring the quality of C++ programs, Chidamber and Krammer. Metric suite- MOOD metrics – improving the design of C++ programs; Case study of redesigning Linux kernel into Minimalistic Object Oriented Linux (MOOL).

Unit V: Pattern Oriented Software Architecture: Building object oriented programs using design patterns identification of design patterns in source code- refactoring existing programs into design pattern based programs- case studies of building software with design patterns.

I B. Tech – II Semester: ME

ENGINEERING DRAWING

Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
20CA03201	Core	1	-	4	3	30	70	100
		Tutorial Classes: Nil			Practical Classes: 51			

OBJECTIVES:

1. To know the basics of Engineering Drawing and its applications
2. To understand the projection of solids
3. To understand the Isometric Projections of Regular Solids
4. To analyze the orthographic projections

UNIT – I	INTRODUCTION ENGINEERING GRAPHICS & SCALES	Classes: 12
-----------------	---	--------------------

Introduction to drawing instruments & principles of Engineering Drawing - Conventions in Drawing-Lettering – BIS Conventions. Curves used in Engineering Practice. a) Parabola, Ellipse, Hyperbola and Rectangular Hyperbola (General method only) b) Cycloid, Epicycloid and Hypocycloid. Involute curves (Circle & Polygon).
Scales: Diagonal & Vernier Scales.

UNIT – II	PROJECTION OF POINTS & LINES	Classes: 12
------------------	---	--------------------

Projection of points, Projection of Lines: Projection of lines parallel to one plane and perpendicular to the other, parallel to both planes, inclined to one plane or both planes, Traces.

UNIT – III	PROJECTIONS OF PLANES	Classes: 14
-------------------	------------------------------	--------------------

Projection of planes: Parallel to one plane and perpendicular to the other, perpendicular to both planes, inclined to one or both planes.

UNIT – IV	PROJECTIONS & SECTIONS OF SOLIDS	Classes: 15
------------------	---	--------------------

Projection of solids: Projections of regular solids inclined to one or both planes by rotational or auxiliary views method.
Sections of Solids: Projections of Section of Cylinder, Prism & Pyramids.

UNIT – V	ISOMETRIC PROJECTIONS	Classes: 15
-----------------	------------------------------	--------------------

Principles of isometric projection- Isometric scale; Isometric views: planes, simple solids. Conversion of orthographic to isometric view Vice Versa.

PYTHON PROGRAMMING LAB

II - Semester							
Course Code	Category	Hours / Week			Credits	Maximum Marks	
		L	T	P		CIA	SEE
17CF00206	Core	-	-	3	2	40	60
Contact Classes: Nil	Tutorial Classes: Nil	Practical Classes: 39			Total Classes:		
OBJECTIVES: <ul style="list-style-type: none"> To write, test, and debug simple Python programs. To implement Python programs with conditionals and loops. Use functions for structuring Python programs. Represent compound data using Python lists, tuple, dictionaries. Read and write data from/to files in Python. 							
OUTCOMES: <ul style="list-style-type: none"> Write, test, and debug simple Python programs. Implement Python programs with conditionals and loops. Develop Python programs step-wise by defining functions and calling them. Use Python lists, tuple, dictionaries for representing compound data. <p style="margin-left: 40px;">Read and write data from/to files in Python.</p>							
Week-1	Basic Programs						Classes
1. Write a program to compute the GCD of two numbers. 2. Write a program to find the factorial of given number.							
Week-2	Basic Programs						Classes
1. Write a program to find the square root of a number (Newton's method). 2. Write a program to find the whether the given number is prime or not.							
Week-3	Basic Programs						Classes
1. Write a program to find the sum of the digits of a number. 2. Write a program to find the sum of positive and negative numbers in a given set of numbers.							
Week-4	Basic Programs						Classes
1. Write a program to find the maximum of a list of numbers							
Week-5	Searching						Classes
1. Write a program to implement Linear search. 2. Write a program to implement Binary search.							
Week-6	Sorting						Classes
1. Write a program to implement Selection sort. 2. Write a program to implement Insertion sort.							
Week-7	Sorting						Classes

DIRECTOR
 Chadalawada Ramanna Engineering College
 (AUTONOMOUS)
 TIRUPATI

1. Write a program to implement Merge sort.		
Week-8	Functions	Classes: 03
1. Write a program to display Fibonacci numbers using functions.		
Week-9	Matrix	Classes: 03
1. Write a program to multiply two matrices.		
Week-10	Files	Classes: 03
1. Write a program to create a file and write some text data on the file. Then display the contents of the file.		
Week-11	Files	Classes: 03
1. Find the most frequent words in a text read from a file.		
Week-12	Graphics	Classes: 03
1. Simulate elliptical orbits in Pygame.		
Week-13	Graphics	Classes: 03
1. Simulate bouncing ball using Pygame PLATFORM NEEDED Python 3 interpreter for Windows/Linux

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING								
II M.Tech (CSE), II- SEMESTER – 2021-22								
COURSE : BIG DATA ANALYTICS								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		CIA	SEE	Total
21CD05202	Core	4	-	-	4	40	60	100
Classes : 60	Tutorial: Nil	Practical Classes: Nil			Total Classes: 60Hrs			

Objectives:

1. Optimize business decisions and create competitive advantage with Big Data analytics
2. Introducing Java concepts required for developing map reduce programs
3. Derive business benefit from unstructured data
4. Imparting the architectural concepts of Hadoop and introducing map reduce paradigm
5. To introduce programming tools PIG & HIVE in Hadoop ecosystem.

Outcomes:

1. Understand what Big Data is and why classical data analysis techniques are no longer adequate.
2. Understand the benefits that Big Data can offer to businesses and organizations.
3. Understand conceptually how Big Data is stored.
4. Understand how Big Data can be analyzed to extract knowledge.

UNIT-I Big Data 10Hrs

What is Big Data , Characteristics of Big data, Introduction to Hadoop, Brief History ,Why Hadoop,Working with Big Data: Google File System, Hadoop Distributed File System (HDFS) .

UNIT-II HDFS 14Hrs

The Design of HDFS,HDFS Concepts, Blocks, Name nodes and Data nodes HDFS Federation HDFS High-Availability, The Command-Line Interface ,Basic File system Operations, Hadoop File systems, Interfaces, The Java Interface, Reading Data from a Hadoop URL, Reading Data Using the File System API ,Writing Data, Directories, Querying the File System, Deleting Data Data Flow, Anatomy of a File Read ,Anatomy of a File Write ,Coherency Model.

UNIT-III MapReduce 12Hrs

Writing MapReduce Programs: A Weather Dataset, Understanding Hadoop API for MapReduce Framework, Basic programs of Hadoop MapReduce: Driver code, Mapper code, Reducer code, RecordReader, Combiner, Partitioner.

UNIT-IV HIVE 12Hrs

The Hive Shell, Running Hive, Configuring Hive, Hive Services, The Metastore, Comparison with Traditional Databases, Schema on Read Versus Schema on Write, HBasics, Implementation, Java and MapReduce clients, Loading data, web queries.

UNIT-V PIG 12Hrs

Installing and Running Pig, Execution Types, Running Pig Programs, Grunt, Pig Latin Editors An Example, Generating Examples, Comparison with Databases, Pig Latin, Structure, Statements Expressions, Types Schemas, Functions, Macro User-Defined Functions, A Filter UDF, An Eval UDF, An Eval UDF

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING								
II M.Tech (CSE), II- SEMESTER – 2021-22								
COURSE : INTERNET OF THINGS								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		CIA	SEE	Total
21CD05203	Core	4	-	-	4	40	60	100
Classes : 60	Tutorial: Nil	Practical Classes: Nil			Total Classes: 60Hrs			

Objectives:

The course should enable the students to:

1. Understand the architecture of Internet of Things and connected world.
2. Explore on use of various hardware and sensing technologies to build IoT applications.
3. Illustrate the real time IoT applications to make smart world.

Outcomes:

1. Interpret the vision of IoT from a global context.
2. Determine the Market perspective of IoT.
3. Compare and Contrast the use of Devices, Gateways and Data Management in IoT.
4. Implement state of the art architecture in IoT.
5. Illustrate the application of IoT in Industrial Automation and identify Real World Design

UNIT-I Introduction to Internet of Things(IoT) 12Hrs

Definition and characteristics of IoT, physical design of IoT, logical design of IoT, IoT enabling technologies, IoT levels and deployment, domain specific IoTs.

UNIT-II IoT and M2M 12Hrs

Introduction, M2M, difference between IoT and M2M, software defined networking (SDN) and network function virtualization (NFV) for IoT, basics of IoT system management with NETCONF-YANG.

UNIT-III IoT Architecture and Python 12Hrs

IoT Architecture: State of the art introduction, state of the art; Architecture reference model: Introduction, reference model and architecture, IoT reference model.

Logical design using Python: Installing Python, Python data types and data structures, control flow, functions, modules, packages, file handling.

UNIT-IV IoT Physical Devices and Endpoints 12Hrs

Introduction to Raspberry Pi interfaces (Serial, SPI, I2C), programming Raspberry PI with Python, other IoT devices.

UNIT-V IoT Physical Servers and Cloud Offerings 12Hrs

Introduction to cloud storage models and communication APIs; WAMP: AutoBahn for IoT, Xively cloud for IoT; Case studies illustrating IoT design: Home automation, smart cities, smart environment.

Text Books:

1. Arshdeep Singh, Vijay Madisetti, "Internet of Things: A Hands-on-Approach", VPT, 1st Edition, 2014.
2. Matthew Richardson, Shawn Wallace, "Getting Started with Raspberry Pi", O'Reilly (SPD), 2nd Edition, 2014.

MAP REDUCE PROGRAMMING LAB

II Semester								
Course Code	Category	Hours/Week			Credits	Maximum Marks		
17CD05213	Core	L	T	P	C	CIA	SEE	Total
		-	-	4	2	40	60	100
Contact Classes: Nil	Tutorial Classes: Nil	Practical Classes: 48			Total Classes: 48			
Objectives: <ul style="list-style-type: none"> Introduce students the concept and challenge of big data (3 V's: volume, velocity, and variety). Teach students in applying skills and tools to manage and analyze the big data 								
Outcomes: <ul style="list-style-type: none"> Understand the concept and challenge of big data and why existing technology is inadequate to analyze the big data; Collect, manage, store, query, and analyze various form of big data; and Gain hands-on experience on large-scale analytics tools to solve some open big data problems; Understand the impact of big data for business decisions and strategy. 								
Week-1	Getting Started with MapReduce and Hadoop							
Loading an existing Eclipse project,								
Week-2	Examining a simple MapReduce Class: Word Counting							
During operation, multiple instances of the Map and Reduce classes will be made, where each can be run on different machines are to be created.								
Week-3	Compiling the Word Counting Example and running it Locally							
The word counting example translates into a map and reduce tasks, we will now compile the Word Counting example and run it on your local machine.								
Week-4	Running Word Counting on a Remote Cluster							
Running a MapReduce job on Amazon.								
Week-5	Top Hashtag Identification							
To modify a MapReduce job and how to use the configure and close methods to make use of stateful tasks. In particular, you will take the code of the word counting example from the previous task and modify it to find the top 10 hashtags from the input corpus.								
Week-6	Indexing English Tweets							
You will learn how to use external jar files with a project, use additional resources and change the output format of a MapReduce job. In particular, this exercise is focused on using a MapReduce job to build an index of English tweets from a generic tweet sample. You will create a map task that will classify incoming tweets as English or not and create a new output format for Hadoop that will write the classified documents in a format that a search engine(the Terrier IR Platform) can understand.

ENGINEERING & I.T. WORKSHOP

I B. Tech - II Semester: Common to all

Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
17CA03203	Foundation	-	-	4	2	30	70	100
Contact Classes: Nil	Tutorial Classes: Nil	Practical Classes: 68			Total Classes: 68			

OBJECTIVES:

1. Identify and use of tools, types of joints in carpentry, fitting, tin smithy welding and foundry operations.
2. Understand of electrical wiring and components.

Any 10 of the following experiments has to be performed during the I year II Sem.

CARPENTRY

- | | |
|---------|--|
| Expt. 1 | Preparation of dove tail joint as per given taper angle. |
| Expt. 2 | Preparation of lap joint as per given dimensions. |
| Expt. 3 | Preparation of Cross Lap joint as per given taper angle. |

FITTING

- | | |
|---------|---|
| Expt. 4 | Make a square fit for given sizes. |
| Expt. 5 | Make a V Joint for given dimensions. |
| Expt. 6 | Make a half round fit for given dimensions. |

TIN SMITHY

- | | |
|---------|---|
| Expt. 7 | Prepare the development of a surface and make a rectangular tray. |
| Expt. 8 | Prepare the development of a surface and make a round tin. |

FOUNDRY

- | | |
|----------|-----------------------------------|
| Expt. 9 | Prepare a single pattern pattern. |
| Expt. 10 | Prepare a double pattern pattern. |

WELDING

- | | |
|----------|-------------------------------|
| Expt. 11 | Preparation of V butt joint |
| Expt. 12 | Preparation of Lap joint |
| Expt. 13 | Preparation of T fillet joint |

Business Communication Lab - I

II MBA III Semester :								
Course Code	Category	Hours/Week			Credits	Maximum Marks		
14CE00108	Foundation	L	T	P	C	Internal	External	Total
		3	-	-	4	40	60	100
Contact classes:50	Tutorial Classes:15	Practical classes: Nil				Total classes:65		

Course Description: Aim is to enable students understand how to write business letters and improve written communication.

Course Objectives:

- ✓ English language skills for effective written business communication ('s).
- ✓ Will be able to understand how to write project report.

Unit – I	Business Writing	Classes: 9
-----------------	-------------------------	-------------------

Introduction, Importance of Written Business Communication, Direct and Indirect Approached to Business Messages, Five Main Stages of Writing

Unit – II	Business Correspondence	Classes: 9
------------------	--------------------------------	-------------------

Introduction, Business Letter Writing, Effective Business Correspondence, Common Components of Business Letters, Strategies for Writing the Body of a Letter, Kinds of Business Letters, Writing Effective Memos, Practice Exercises.

Unit – III	Instructions	Classes: 9
-------------------	---------------------	-------------------

Instructions: Introduction, Written Instructions, General Warning, Caution and Danger, Format in Instructions, Oral Instructions, Audience Analysis, Product Instructions. Practice Exercises.

Unit – IV	Business Reports and Proposals	Classes: 9
------------------	---------------------------------------	-------------------

Business Reports and Proposals: Introduction, What is a Report, Steps in Writing a Routine Business Report, Parts of a Report, Corporate Reports, Business Proposals.

Unit – V	Careers and Resumes	Classes: 9
-----------------	----------------------------	-------------------

Careers and Resumes : Introduction, Career Building, Understanding yourself, setting a career goal, job search / looking at various options, preparing your resume, resume formats, traditional, electronic and video resumes,online recruitment process. Write your resume to market yourself.

Business Analytics Lab

I MBA II Semester :								
Course Code	Category	Hours/Week			Credits	Maximum Marks		
17CE00208	Foundation	L	T	P	C	Internal	External	Total
		4	-	-	4	40	60	100
Contact classes:50	Tutorial Classes:15	Practical classes: nil				Total classes:65		

Course Description:

The course is designed to understand the providing conceptual understanding of Business analytics under various functions of management. This will enable the students to study the various concepts related to applications of analytics and enabling them to apply the concepts in the management organization.

Course Objectives:

- ✓ To understand the basic concepts of business analytics
- ✓ To learn financial, marketing experiments
- ✓ To learn HRM, systems experiments
- ✓ To understand the concepts of Information Technology

UNIT - I	Introduction to Business Analytics – Accounting experiments	Classes: 10
-----------------	--	--------------------

Introduction to Business Analytics – functions – concepts. Creation of company – Preparation of Ledger - Posting Trial Balance – Profit and Loss Account – Balance sheet sole traders.

UNIT - II	Financial Experiments	Classes: 10
------------------	------------------------------	--------------------

Capital budgeting decisions – Calculations of NPV – Calculations of IRR – Calculations of Profitable Index

UNIT - III	Marketing Experiments	Classes: 10
-------------------	------------------------------	--------------------

Storing and retrieving of data of customers - Storing and retrieving of data of sales - Storing and retrieving of data of dealers - products and geographical areas (Tables and Graphs)

UNIT - IV	HRM Experiments	Classes: 10
------------------	------------------------	--------------------

Creation of Employees data base - Demonstrating the salary administration

UNIT - V	Systems Experiments	Classes: 10
-----------------	----------------------------	--------------------

Understanding the Information Systems – Design of MIS - Overview of Internet and Internet tools.

TECHNICAL COMMUNICATION SKILLS

I - Semester								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
17CF52101	Foundation	L	T	P	C	CIA	SEE	Total
		4	-	-	4	40	60	100
Contact Classes: 45	Tutorial Classes: 15	Practical Classes: Nil			Total Classes: 60			
<p>Course Objectives:</p> <ul style="list-style-type: none"> To develop awareness in students of the relevance and importance of technical communication and presentation skills. To prepare the students for placements To sensitize the students to the appropriate use of non-verbal communication To train students to use language appropriately for presentations and interviews To enhance the documentation skills of the students with emphasis on formal and informal writing <p>COURSE OUTCOMES</p> <ul style="list-style-type: none"> Become effective technical communicators Be job-ready and able to face interviews confidently Sensitive use of non-verbal language suitable to different situations in professional life Learn and use keys words, phrases and sentence structures making a mark in interviews and presentation skills Effective writing skills with the ability to use different styles for different situations 								
Unit-I						Classes: 08		
Basics of Technical Communication – Introduction – Objectives & Characteristics of Technical Communication – Importance and need for Technical communication - LSRW Skills – Barriers to effective communication								
Unit-II						Classes: 10		
Informal and Formal Conversation - Verbal and Non-verbal communication –Kinesics, Proxemics, Chronemics, Haptics, Paralanguage								
Unit-III						Classes: 08		
Written communication – Differences between spoken and written communication – Features of effective writing –Advantages and disadvantages of spoken and written communication- Art of condensation-summarizing and paraphrasing								
Unit-IV						Classes: 10		
Presentation Skills – Nature and importance of oral presentation – Defining the purpose – Analyzing the audience - Planning and preparing the presentation, organizing and rehearsing the presentation – Individual and group presentations - Handling stage fright								

INTERNET OF THINGS

PROFESSIONAL ELECTIVES III

CNC TECHNOLOGY & PROGRAMMING

I M.Tech. II SEMESTER: CAD/CAM								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		CIA	SEE	Total
21CD03203	Core	4	-	-	4	40	60	100
Contact Classes: 64		Tutorial Classes: Nil			Practical Classes: Nil		Total Classes: 64	
UNIT-I	Introduction to CNC Machine tools						Classes : 14	
<p>Introduction to CNC Machine tools: Evolution of Computerized control in manufacturing, Components, Working principle of CNC, DNC and Machining centers.</p> <p>Constructional features of CNC machine tools: Introduction, Spindle drives, Transmission belting, axes feed drives, Slide ways, Ball screws.</p> <p>Accessories: Work tables, Spindles, Spindle heads, Beds and Columns, Tooling – Automatic Tool changer (ATC).</p>								
UNIT-II	FEEDBACK DEVICES						Classes : 14	
<p>Feedback devices: Introduction, Digital incremental displacement measuring systems, Incremental rotary encoders, Moire fringes, Digital absolute measuring system.</p> <p>Electro-magnetic analogue position transducers: Principle, advantages, characteristics, Synchros, Synchro-Resolvers, Inductors, Laser interferometer.</p>								
UNIT-III	CONTROL SYSTEMS AND INTERFACE						Classes : 14	
<p>CONTROL SYSTEMS AND INTERFACE : Open and closed loop systems, Micro processor based CNC systems, block diagram of typical CNC system, description of hard ware and soft interpolation systems, Standard and optional features of CNC control systems.</p>								
UNIT-IV	APT Programming						Classes : 14	
<p>APT programming: APT language structure, APT geometry, Definition of point, time, vector, circle, plane, patterns and matrices. APT motion commands: setup commands, point-to point motion commands, continuous path motion commands, post processor commands, control commands, Macro subroutines, Part programming preparation for typical examples.</p>								
UNIT-V	ECONOMICS AND MAINTENANCE OF CNC MACHINE TOOLS						Classes : 12	
<p>Economics and Maintenance of CNC machine tools: Introduction, factors influencing selection of CNC machines, Cost of operation of CNC machines, Maintenance features of CNC machines, Preventive maintenance, Documentation, Spare parts, Training in Maintenance.</p>								
Text Books:

MAP REDUCE PROGRAMMING LAB

II Semester								
Course Code	Category	Hours/Week			Credits	Maximum Marks		
17CD05213	Core	L	T	P	C	CIA	SEE	Total
		-	-	4	2	40	60	100
Contact Classes: Nil	Tutorial Classes: Nil	Practical Classes: 48			Total Classes: 48			
Objectives: <ul style="list-style-type: none"> Introduce students the concept and challenge of big data (3 V's: volume, velocity, and variety). Teach students in applying skills and tools to manage and analyze the big data 								
Outcomes: <ul style="list-style-type: none"> Understand the concept and challenge of big data and why existing technology is inadequate to analyze the big data; Collect, manage, store, query, and analyze various form of big data; and Gain hands-on experience on large-scale analytics tools to solve some open big data problems; Understand the impact of big data for business decisions and strategy. 								
Week-1	Getting Started with MapReduce and Hadoop							
Loading an existing Eclipse project,								
Week-2	Examining a simple MapReduce Class: Word Counting							
During operation, multiple instances of the Map and Reduce classes will be made, where each can be run on different machines are to be created.								
Week-3	Compiling the Word Counting Example and running it Locally							
The word counting example translates into a map and reduce tasks, we will now compile the Word Counting example and run it on your local machine.								
Week-4	Running Word Counting on a Remote Cluster							
Running a MapReduce job on Amazon.								
Week-5	Top Hashtag Identification							
To modify a MapReduce job and how to use the configure and close methods to make use of stateful tasks. In particular, you will take the code of the word counting example from the previous task and modify it to find the top 10 hashtags from the input corpus.								
Week-6	Indexing English Tweets							
You will learn how to use external jar files with a project, use additional resources and change the output format of a MapReduce job. In particular, this exercise is focused on using a MapReduce job to build an index of English tweets from a generic tweet sample. You will create a map task that will classify incoming tweets as English or not and create a new output format for Hadoop that will write the classified documents in a format that a search engine(the Terrier IR Platform) can understand.

**15A03506 NANO TECHNOLOGY
(MOOCS-I)**
Course objective

On successful completion of the course, students should be able to: Understand the basic scientific concepts of nanoscience. Understand the properties of nano materials, characterization of materials, synthesis and fabrication. Understand the applications of nano technology in various science, engineering and technology fields.

UNIT-I

INTRODUCTION: History of nano science, definition of nano meter, nano materials, nano technology. Classification of nano materials. Crystal symmetries, crystal directions, crystal planes. Band structure.

PROPERTIES OF MATERIALS:

Mechanical properties, electrical properties, dielectric properties, thermal properties, magnetic properties, opto electronic properties. Effect of size reduction on properties, electronic structure of nano materials.

UNIT-II

SYNTHESIS AND FABRICATION: Synthesis of bulk polycrystalline samples, growth of single crystals. Synthesis techniques for preparation of nano particle – Bottom Up Approach – sol gel synthesis, hydro thermal growth, thin film growth, PVD and CVD; Top Down Approach – Ball milling, micro fabrication, lithography. Requirements for realizing semiconductor nano structures, growth techniques for nano structures.

UNIT-III

CHARACTERIZATION TECHNIQUES: X-Ray diffraction and Scherrer method, scanning electron microscopy, transmission electron microscopy, scanning probe microscopy, atomic force microscopy, piezoresponse microscopy, X-ray photoelectron spectroscopy, XANES and XAFS, angle resolved photoemission spectroscopy, diffuse reflectance spectra, photoluminescence spectra, Raman spectroscopy.

UNIT-IV**CARBON NANO TECHNOLOGY:**

Characterization of carbon allotropes, synthesis of diamond – nucleation of diamond, growth and morphology. Applications of nano crystalline diamond films, graphene, applications of carbon nano tubes.

15A52602 ADVANCED ENGLISH LANGUAGE COMMUNICATION SKILLS
(AELCS) LAB (Audit Course)

1. INTRODUCTION

With increased globalization and rapidly changing industry expectations, employers are looking for the wide cluster of skills to cater to the changing demand. The introduction of the Advanced Communication Skills Lab is considered essential at 3rd year level. At this stage, the students need to prepare themselves for their careers which may require them to listen to, read, speak and write in English both for their professional and interpersonal communication in the globalised context.

The proposed course should be a laboratory course to enable students to use 'good' English and perform the following:

- Gathering ideas and information and to organise ideas relevantly and coherently.
- Engaging in debates.
- Participating in group discussions.
- Facing interviews.
- Writing project/research reports/technical reports.
- Making oral presentations.
- Taking part in social and professional communication.

2. OBJECTIVES:

This Lab focuses on using multi-media instruction for language development to meet the following targets:

- To improve the students' fluency in English, through a well-developed vocabulary and enable them to listen to English spoken at normal conversational speed by educated English speakers and respond appropriately in different socio-cultural and professional contexts.
- Further, they would be required to communicate their ideas relevantly and coherently in writing.
- To prepare all the students for their placements.

Ramanna
DIRECTOR

Chaitanya Mahapatra Ramanna Engineering College
(AUTONOMOUS)

3. SYLLABUS

The following course content to conduct the activities is prescribed for the Advanced English Communication Skills (AECS) Lab:

UNIT-I: COMMUNICATION SKILLS

1. Reading Comprehension
2. Listening comprehension
3. Vocabulary Development
4. Common Errors

UNIT-II: WRITING SKILLS

1. Report writing
2. Resume Preparation
3. E-mail Writing

UNIT-III: PRESENTATION SKILLS

1. Oral presentation
2. Power point presentation
3. Poster presentation

UNIT-IV: GETTING READY FOR JOB

1. Debates
2. Group discussions
3. Job Interviews

UNIT-V: INTERPERSONAL SKILLS

1. Time Management
2. Problem Solving & Decision Making
3. Etiquettes

4. LEARNING OUTCOMES:

- Accomplishment of sound vocabulary and its proper use contextually
- Flair in Writing and felicity in written expression.
- Enhanced job prospects.
- Effective Speaking Abilities

5. MINIMUM REQUIREMENT:

The Advanced English Communication Skills (AECS) Laboratory shall have the following infra-structural facilities to accommodate at least 60 students in the lab:

- Spacious room with appropriate acoustics.
- Round Tables with movable chairs
- Audio-visual aids
- LCD Projector
- Public Address system

15A05703 MOBILE APPLICATION DEVELOPMENT

Course Objectives:

- To understand fundamentals of android operating systems.
- Illustrate the various components, layouts and views in creating android applications
- To understand fundamentals of android programming.

Course Outcomes:

- Create data sharing with different applications and sending and intercepting SMS.
- Develop applications using services and publishing android applications.
- To demonstrate their skills of using Android software development tools

Unit 1: Introduction to Android:

The Android 4.1 jelly Bean SDK, Understanding the Android Software Stack, installing the Android SDK, Creating Android Virtual Devices, Creating the First Android Project, Using the Text view Control, Using the Android Emulator, The Android Debug Bridge(ADB), Launching Android Applications on a Handset.

Unit 2: Basic Widgets:

Understanding the Role of Android Application Components, Understanding the Utility of Android API, Overview of the Android Project Files, Understanding Activities, Role of the Android Manifest File, Creating the User Interface, Commonly Used Layouts and Controls, Event Handling, Displaying Messages Through Toast, Creating and Starting an Activity, Using the Edit Text Control, Choosing Options with Checkbox, Choosing Mutually Exclusive Items Using Radio Buttons

Unit 3: Building Blocks for Android Application Design:

Introduction to Layouts, Linear Layout, Relative Layout, Absolute Layout, Using Image View, Frame Layout, Table Layout, Grid Layout, Adapting to Screen orientation.

Utilizing Resources and Media Resources, Creating Values Resources, Using Drawable Resources, Switching States with Toggle Buttons, Creating an Images Switcher Application, Scrolling Through Scroll View, playing Audio, Playing Video, Displaying Progress with Progress Bar, Using Assets.

Bhuvan
DIRECTOR
 Chodalawada Ramasamma Engineering College
 (AUTONOMOUS)
 TIRUPATI

Unit 4: Using Selection widgets and Debugging:

Using List View, Using the Spinner control, Using the GridView Control, Creating an Image Gallery Using the ViewPager Control, Using the Debugging Tool: Dalvik Debug Monitor Service(DDMS), Debugging Application, Using the Debug Perspective.

Displaying And Fetching Information Using Dialogs and Fragments: What Are Dialogs?, Selecting the Date and Time in One Application, Fragments, Creating Fragments with java Code, Creating Special Fragments

Unit 5: Building Menus and Storing Data:

Creating Interface Menus and Action Bars, Menus and Their Types, Creating Menus Through XML, Creating Menus Through Coding, Applying a Context Menu to a List View, Using the Action Bar, Replacing a Menu with the Action Bar, Creating a Tabbed Action Bar, Creating a Drop-Down List Action Bar

Using Databases:

Using the SQLiteOpenHelperclass, Accessing Databases with the ADB, Creating a Data Entry Form,

Communicating with SMS and Emails:

Understanding Broadcast Receivers, Using the Notification System, Sending SMS Messages with Java Code, Receiving SMS Messages, Sending Email, Working With Telephony Manager.

15A05802 MOBILE COMPUTING
(MOOCS-II)

Course Objectives:

- Understand mobile ad hoc networks, design and implementation issues, and available solutions.
- Acquire knowledge of sensor networks and their characteristics.

Course Outcomes:

- Students able to use mobile computing more effectively
- Students gain understanding of the current topics in MANETs and WSNs, both from an industry and research point of views.
- Acquire skills to design and implement a basic mobile ad hoc or wireless sensor network via simulations.

UNIT-I:

Wireless LANS and PANS: Introduction, Fundamentals of WLANs, IEEE 802.11 Standards, HIPERLAN Standard, Bluetooth, Home RF.

Wireless Internet:

Wireless Internet, Mobile IP, TCP in Wireless Domain, WAP, Optimizing Web over Wireless.

UNIT-II:

AD HOC Wireless Networks: Introduction, Issues in Ad Hoc Wireless Networks, AD Hoc Wireless Internet.

MAC Protocols for Ad Hoc Wireless Networks: Introduction, Issues in Designing a MAC protocol for Ad Hoc Wireless Networks, Design goals of a MAC Protocol for Ad Hoc Wireless Networks, Classifications of MAC Protocols, Contention - Based Protocols, Contention - Based Protocols with reservation Mechanisms, Contention - Based MAC Protocols with Scheduling Mechanisms, MAC Protocols that use Directional Antennas, Other MAC Protocols.

UNIT -III:

Routing Protocols: Introduction, Issues in Designing a Routing Protocol for Ad Hoc Wireless Networks, Classification of Routing Protocols, Table -Driven Routing Protocols, On - Demand

Routing Protocols, Hybrid Routing Protocols, Routing Protocols with Efficient Flooding Mechanisms, Hierarchical Routing Protocols, Power - Aware Routing Protocols.

Chadalawada Ramanna

DIRECTOR

Chadalawada Ramanna Engineering College

Transport Layer and Security Protocols: Introduction, Issues in Designing a Transport Layer Protocol for Ad Hoc Wireless Networks, Design Goals of a Transport Layer Protocol for Ad Hoc Wireless Networks, Classification of Transport Layer Solutions, TCP Over Ad Hoc Wireless Networks, Other Transport Layer Protocol for Ad Hoc Wireless Networks, Security in Ad Hoc Wireless Networks, Network Security Requirements, Issues and Challenges in Security Provisioning, Network Security Attacks, Key Management, Secure Routing in Ad Hoc Wireless Networks.

UNIT –IV:

Quality of Service: Introduction, Issues and Challenges in Providing QoS in Ad Hoc Wireless Networks, Classification of QoS Solutions, MAC Layer Solutions, Network Layer Solutions, QoS Frameworks for Ad Hoc Wireless Networks.

Energy Management: Introduction, Need for Energy Management in Ad Hoc Wireless Networks, Classification of Ad Hoc Wireless Networks, Battery Management Schemes, Transmission Power Management Schemes, System Power Management Schemes.

UNIT –V:

Wireless Sensor Networks: Introduction, Sensor Network Architecture, Data Dissemination, Data Gathering, MAC Protocols for Sensor Networks, Location Discovery, Quality of a Sensor Network, Evolving Standards, Other Issues.

TEXT BOOKS:

1. Ad Hoc Wireless Networks: Architectures and Protocols - C. Siva Ram Murthy and B.S.Manoj, PHI, 2004.
2. Wireless Ad-hoc and Sensor Networks: Protocols, Performance and Control - Jagannathan Sarangapani, CRC Press

REFERENCE BOOKS:

15A05605 WEB AND INTERNET TECHNOLOGIES

Course Objectives:

- To introduce client side scripting with Javascript and DHTML
- To introduce server side programming with Java servlets, JSP and PHP.
- To learn the basic web concepts and Internet protocols

Course Outcomes:

- Ability to create dynamic and interactive web sites
- Gain knowledge of client side scripting using java script and DHTML.
- Demonstrate understanding of what is XML and how to parse and use XML data
- Able to do server side programming with Java Servlets, JSP and PHP.
- Able to design rich client presentation using AJAX.

UNIT I

Introduction to Web Technologies: Introduction to Web servers like Apache 1.1, IIS XAMPP(Bundle Server), WAMP(Bundle Server), Handling HTTP Request and Response, installations of above servers, HTML and CSS: HTML 5.0 , XHTML, CSS 3.

UNIT II

Java Script: An introduction to JavaScript–JavaScript DOM Model-DOM and Objects,- Regular Expressions- Exception Handling-Validation-Built-in objects-Event Handling-DHTML with JavaScript. **Servlets:** Java Servlet Architecture- Servlet Life Cycle- Form GET and POST actions- Session Handling- Understanding Cookies.

Installing and Configuring Apache Tomcat Web Server;- DATABASE CONNECTIVITY: JDBC perspectives, JDBC program example - **JSP:** Understanding Java Server Pages-JSP Standard Tag Library(JSTL)-Creating HTML forms by embedding JSP code.

UNIT III

Introduction to PHP: The problem with other Technologies (Servlets and JSP), Downloading, installing, configuring PHP, Programming in a Web environment and The anatomy of a PHP Page.

Overview of PHP Data types and Concepts: Variables and data types, Operators, Expressions and Statements, Strings, Arrays and Functions.

Bunika
DIRECTOR
 Chadalavada Ramana Engineering College
 (AUTONOMOUS)
 TIRUPATI

PHP Advanced Concepts: Using Cookies, Using HTTP Headers, Using Sessions, Authenticating users, Using Environment and Configuration variables, Working with Date and Time.

UNIT IV

Creating and Using Forms: Understanding Common Form Issues, GET vs. POST, Validating form input, Working with multiple forms, and Preventing Multiple Submissions of a form.

XML: Basic XML- Document Type Definition XML Schema DOM and Presenting XML, XML Parsers and Validation, XSL and XSLT Transformation, News Feed (RSS and ATOM).

UNIT V

AJAX: Ajax Client Server Architecture-XML Http Request Object-Call Back Methods; Web Services: Introduction- Java web services Basics – Creating, Publishing, Testing and Describing a Web services (WSDL)-Consuming a web service, Database Driven web service from an application – SOAP.

TEXT BOOKS:

1. Beginning PHP and MySQL, 3rd Edition , Jason Gilmore, Apress Publications (Dream tech).
2. PHP 5 Recipes A problem Solution Approach Lee Babin, Nathan A Good, Frank M.Kromann and Jon Stephens.
3. Deitel and Deitel and Nieto, "Internet and World Wide Web - How to Program", Prentice Hall, 5 th Edition, 2011.
4. Herbert Schildt, "Java-The Complete Reference", Eighth Edition, Mc Graw Hill Professional, 2011.

Morals, Values and Ethics-Integrity-Work Ethic-Service learning – Civic Virtue – Respect for others – Living Peacefully – Caring – Sharing – Honesty - Courage- Co Operation – Commitment – Empathy –Self Confidence Character – Spirituality.								
UNIT - II	ENGINEERING ETHICS							
Senses of Engineering Ethics- Variety of moral issues – Types of inquiry – Moral dilemmas – Moral autonomy – Kohlberg's theory- Gilligan's theory- Consensus and controversy – Models of professional roles- Theories about right action- Self interest - Customs and religion –Uses of Ethical theories – Valuing time –Co operation – Commitment.								
UNIT - III	ENGINEERING AS SOCIAL EXPERIMENTATION							
Engineering As Social Experimentation– Framing the problem – Determining the facts – Codes of Ethics – Clarifying Concepts – Application issues – Common Ground - General Principles – Utilitarian thinking respect for persons.								
UNIT - IV	ENGINEERS RESPONSIBILITY FOR SAFETY AND RISK							
Safety and risk – Assessment of safety and risk – Risk benefit analysis and reducing riskSafety and the Engineer- Designing for the safety- Intellectual Property rights (IPR).								
UNIT - V	GLOBAL ISSUES							
Globalization – Cross culture issues- Environmental Ethics – Computer Ethics – Computers as the instrument of Unethical behavior – Computers as the object of Unethical acts – Autonomous Computers- Computer codes of Ethics – Weapons Development - Ethics

Entrepreneurship Development

Course Code	Category	II MBA III Semester :				Maximum Marks		
		Hours/Week			Credits	Internal	External	Total
17CE00301	Foundation	L	T	P	C	40	60	100
		3	-	-	4			
Contact classes:50	Tutorial Classes:15	Practical classes: Nil				Total classes:65		

Course Description:

This course presents the concepts, characteristics of entrepreneurship in India and various institutions that are promoting entrepreneurship at national level and state level. Further, it also represents the importance of women entrepreneurship in the globalization scenario. It also describes the project management and processes of project management.

Course Objectives :

- ✓ To provide theoretical concepts of entrepreneurship.
- ✓ To give an overview of various organizations that promotes entrepreneurship in India.
- ✓ To learn the concept of women entrepreneurship in India.
- ✓ To provide awareness on Role of Government both in centre and state level in executing various entrepreneurial activities.

Unit - I	Introduction to Entrepreneurship	Classes: 10
-----------------	---	--------------------

Introduction to Entrepreneurship: Characteristics, qualities and skills of an Entrepreneur, functions of entrepreneur, entrepreneur scenario in India and abroad, forms of entrepreneurship, small business enterprises - importance of Indian economy, first mover – advantages and disadvantages, risk reduction strategies - market scope strategies, imitation strategies and managing newness.

Unit - II	Promotional Strategies	Classes: 15
------------------	-------------------------------	--------------------

Promotional strategies: Generation of new entry opportunities, SWOT analysis, technological competitiveness, legal regulatory system, patents and trademarks, intellectual property rights, project planning and feasibility studies, major steps in product development. Financial aspects, sources of raising capital, debt-equity, financing by commercial banks, government grants and

DIRECTOR 69
 Chadalawada Ramanamma Engineering College
 (AUTONOMOUS)
 TIRUPATI

subsidies, entrepreneurship promotion, schemes of department of industries - DICs, KVIC, SIDBI, NABARD, NSIC, APSFC, IFCI and IDBI.

Unit - III	Corporate Governance	Classes: 15
-------------------	-----------------------------	--------------------

Corporate governance: Corporate governance, capitalism at crossroads historical perspective of corporate governance, issues of corporate governance, theoretical basis of corporate governance, corporate governance mechanisms, Indian model of governance good corporate governance, corporate governance committees, OECD principles, Indian committee and guidelines, the confederation of Indian industry's initiative, corporate governance models.

Unit - IV	Role of Government	Classes: 15
------------------	---------------------------	--------------------

Role of Central Government and State Government in promoting Entrepreneurship with various incentives, subsidies, grants etc. – with special reference to 'Export oriented units' Role of the following agencies in the Entrepreneurship Development. District Industrial Centre (DIC), Small Industries Services Institute (SISI), Entrepreneurship Development Institute of India (EDII), National Institute of Entrepreneurship and Small Business Development (NIESBUD), National Entrepreneurship Development Board (NEDB).

Unit - V	Process of Project Management	Classes: 10
-----------------	--------------------------------------	--------------------

Project management: Concept of project and classification of project identification, project formulation - project design, project planning, and social cost benefit analysis, financial analysis. **PROJECT APPRAISAL:** Project report and guidelines for preparing a project report, project Appraisal, Significance of project appraisal, Profitability appraisal, and project financing.

Business Simulation Laboratory

		II MBA III Semester :						
Course Code	Category	Hours/Week		Credits	Maximum Marks			
17CE00303	Foundation	L	T	P	C	Internal	External	Total
			-	-	3	2	40	60
Contact classes: Nil	Tutorial Classes: Nil	Practical classes: 42			Total classes: 42			

Course Description:

This course presents the knowledge of various MS office softwares like Excel sheets and usage of the computer tools etc. further it also gives the knowledge of using Statistical tools and techniques.

Course Objectives:

- ✓ The main aim is to understand statistical tools learning in ms-excel and spss.
- ✓ The learning outcome is that the students will be able to:
 - a) analyse the data to draw inference for decision making.
 - b) understand the application of statistical measures of central tendency.
 - c) understand the application of anova, analyse trends and test hypotheses

Unit - I	Introduction MS Excel – Working with data	Classes: 10
-----------------	--	--------------------

Customizing the quick access toolbar - Creating and using templates - Entering, editing, copy, cut, paste, paste special - Formatting data - Using the right mouse click - Saving - Page setup and printing.

Unit - II	Excel Lessons	Classes: 15
------------------	----------------------	--------------------

Using headers and footers -. Manipulating data:- Using data names and ranges - Filters - Sort - Validation lists . . Data from external sources - Using and formatting tables -. Basic formulas -. Use of functions -. Data analysis using charts and graphs - Managing, inserting, and copying worksheets -. Securing the excel document (protect cells and workbook).

Unit - III	Advanced Excel Lessons	Classes: 15
-------------------	-------------------------------	--------------------

Advanced formulas and functions - Advanced worksheet features - Advanced data analysis using - Pivottables - Pivot charts

Unit - IV	Over view of SPSS and Simulation of frequency distribution	Classes: 15
------------------	---	--------------------

Uses - Data analysis - Making students/learn familiar with main menu and other features of spss package - Binomial - Poisson - Exponential.- Weibull - Normal distributions.

Unit - V	Statistical tools for execution using excel	Classes: 10
-----------------	--	--------------------

Tabulation - Bar diagram - Multiple bar diagram - Pie diagram - measure of central tendency - Mean Median -. Mode.- Measure of dispersion - Variance - Standard deviation -. Coefficient of-variation Correlation - Regression lines - T- test - F-test - Anova one way classification, - Chi square test - Independence of attributes.

AI TOOLS, TECHNIQUES AND APPLICATIONS LABORATORY

B.Tech III Year II Semester								
Course Code	Category	Hours/ Week			Credits	Maximum Marks		
		L	T	P	C	CIA	SEE	Total
19CA05511	Core	0	0	3	1.5	30	70	100
Contact Classes: Nil		Tutorial Classes: Nil		Practical Classes: 48		Total Classes: 48		

COURSE OBJECTIVES:

The course should enable the students to:

1. Implement the basic knowledge of Study of Prolog.
2. Construct Problem solving Techniques.
3. Apply Different Search Techniques.
4. Practice various Traversal Problems.

LIST OF EXPERIMENTS

Exp. 1	Study of PROLOG. Write the following programs using PROLOG.
Exp. 2	Program to show how integer variable is used in prolog program.
Exp. 3	Write a program to solve 8 queens problem
Exp. 4	Program to add two numbers
Exp. 5	Program to delete an integer from the list .
Exp. 6	Solve any problem using depth first search.
Exp. 7	Program to categorize animal characteristics.
Exp. 8	Program to show concept of list.
Exp. 9	Solve any problem using best first search.
Exp. 10	Program to read address of a person using compound variable
Exp. 11	Program to demonstrate family relationship
Exp. 12	Solve 8-puzzle problem using best first search
Exp. 13	Program of fun to show concept of cut operator .
Exp. 14	Solve Robot (traversal) problem using means End Analysis.
Exp. 15	Program to count number of elements in a list .
Exp. 16	Solve traveling salesman problem.
Exp. 17	Program to reverse the list.
Exp. 18	Program to append an integer into the list.
Exp. 19	Program to replace an integer from the list.

Equipment/Software required for Laboratories: PROLOG

Reference Books:

1. Artificial Intelligence: A Modern Approach., Russell & Norvig. 1995, Prentice Hall.
2. Artificial Intelligence, Elaine Rich and Kevin Knight, 1991, TMH.
3. Artificial Intelligence-A modern approach, Stuart Russel and peter norvig, 1998, PHI.
4. Artificial intelligence, Patrick Henry Winston., 1992, Addition Wesley 3 Ed.,

COURSE OUTCOMES:

Upon the successful completion of the course, the student will be able to

- CO1: Demonstrate the knowledge on prolog Programming and Analyze the PROLOG programming through SWI
- CO2: Analyze the various problem solving techniques
- CO3: Design and develop prolog program to add variables
- CO4: Conduct investigation and test the functionality on implementation of prolog programming
- CO5: Select appropriate techniques or algorithm tool kit to analyze and implement DFS,BFS
- CO6: Follow ethical principles in designing and programming AI problems.
- CO7: Do experiments effectively as an individual and as a member in a group.
- CO8: Communicate verbally and in written form, the understandings about the programming.
- CO9: Continue updating their skill related to implementation for various applications during

SOFT SKILLS

B.Tech III Year II Semester								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
19CA052601	Elective	3	0	0	3	3	70	100
Contact Classes: 48	Tutorial Classes: Nil	Practical Classes: Nil			Total Classes: 48			
COURSE OBJECTIVES:								
1. To enhance employability skills through Group discussions and Mock Interviews. 2. To enable the students collectively in organizational skills. 3. To train the students to meet communicative competence.								
UNIT-I	VERBAL ABILITY & COMMUNICATION SKILLS						Classes: 10	
Communication: Verbal and Non-Verbal Communication, Barriers to effective Communication, Types of Communication - Oral, Aural, Writing and Reading Grammar:- usage of Articles, Preposition, Verb, Tenses, Adverbs, If-Conditionals, Adjectives, Degrees of Comparison, Conjunction, Simple, Compound & Complex, Active & Passive voice, Reported Speech and Common Errors in English. Word Power: - Synonyms, Antonyms, Affixes, One word substitutions and Idioms & Phrases.								
UNIT-II	EMPLOYABILITY SKILLS						Classes: 10	
COMPREHENSIONS:- Listening Comprehension, Reading Comprehension, Technical Reports, Resume Writing, E-mail Writing and Essay Writing SVAR (Accent): Phonetics, Inflections, Stress and Intonation. GROUP ACTIVITIES: Just-A-Minute (JAM), Debate, Group Discussion and Interview Skills								
UNIT-III	Arithmetic III						Classes: 10	
Number System, Averages, Percentages, Simple Interest & Compound Interest, Problems on Ages, Profit & Loss, Probability, Permutation & Combinations, Logarithms								
UNIT-IV	Arithmetic IV						Classes: 09	
Time & work, Time and Distance, Allegation and Mixtures, Mesuration2D, Mensuration3D, Data Interpretation.								
UNIT- V	Reasoning II						Classes: 09	
Analogy, Classification, Number series, Coding Decoding, Direction & Distance, Blood Relation. Critical Reasoning – Syllogism, Statements & Assumptions, Statements & Arguments, Data sufficiency, Seating Arrangement, Puzzles.								
Text Books:								
1. Rizvi M. Ashraf Effective Technical Communication, Tata McGraw-Hill Publishing Company Limited, 2006. 2. R.S Aggarwal, Quantitative Aptitude for Competitive Examinations, S. Chand Publications 3. R.S.Aggarwal, Verbal and Non Verbal Reasoning, S.Chand Publications.

COURSE OUTCOMES:								
Upon the successful completion of the course, the student will be able to								
CO1: Apply grammatical structures to formulate correct sentences and communicate fluently								
CO2: Analyze the correct production of sounds and LSRW skills to perform any situation in their career.								
CO3: Exhibit the knowledge on Simple Arithmetic Calculations for real time Applications								
CO4: Investigate the Complex Arithmetic Operations in real time Applications								
CO5: Analyze of Reasoning, Analytical and Logical thinking methods.

AI TOOLS, TECHNIQUES AND APPLICATIONS

B.Tech III Year II Semester								
Course Code	Category	Hours / Week			Credit	Maximum Marks		
		L	T	P	C	CIA	SEE	Total
19CA05505	Core	2	1	0	3	30	70	100
Contact Classes: 32	Tutorial Classes: 16	Practical Classes: Nil			Total Classes: 48			
COURSE OBJECTIVES:								
The course should enable the students to:								
<ol style="list-style-type: none"> 1. Study the concepts of artificial intelligence in problem solving. 2. Explore the methods of agents and reasoning patterns. 3. Introduce the concepts of knowledge representation and learning. 4. IV. Analyze and solve statistical learning methods using AI techniques. 								
UNIT-I	INTRODUCTION						Classes:10	
The AI problems, what is an AI technique, the levels of the model, the underlying assumption, problems; Problem spaces and search: Defining the problem as a state space search, production systems, problem characteristics and production system characteristics; Problem-solving: Uninformed search strategies; Informed search strategies: Heuristic search strategies, local search algorithms and optimization problems, backtracking search for CSP.								
UNIT-II	KNOWLEDGE AND REASONING						Classes: 10	
Logical agents, knowledge-based agents, the wumpus world and propositional logic, reasoning patterns in propositional logic and agents based on propositional logic; First-order logic: Syntax and semantic of first-order logic, knowledge engineering in first-order logic; Inference in first-order logic: Propositional vs first-order inference, unification and lifting, forward chaining, backward chaining, resolution.								
UNIT-III	KNOWLEDGE REPRESENTATION						Classes: 09	
Categories and objects, actions, situations and events, mental events and mental objects: The internet shopping world, truth maintenance systems. Uncertain knowledge and reasoning: Uncertainty, acting under uncertainty, basic probability notation, the axioms of probability, inference using full joint distributions, independence, Baye's rule and its use.								
UNIT-IV	LEARNING						Classes: 10	
Learning from observations, forms of learning, Inductive learning: Learning decision trees, ensemble learning; Why learning works: Computational learning theory.								
UNIT- V	STATISTICAL LEARNING METHODS						Classes: 09	
Knowledge in learning: A logical formulation of learning, knowledge in learning; Neural networks; Fuzzy logic systems: Introduction, crisp sets, fuzzy sets, some fuzzy terminology, fuzzy logic control, sugeno style of fuzzy inference processing, fuzzy hedges, a cut threshold.								
Text Books:								
<ol style="list-style-type: none"> 1. Stuart J. Russell, Peter Norving, "Artificial Intelligence A Modern Approach", Pearson Education, 3rd Edition, 2013. 2. Elaine Rich, Kevin Knight , Shiva Shankar B Nair, "Artificial Intelligence", Tata McGraw Hill, 3 rd Edition, 2008.

COURSE OBJECTIVES:								
The course should enable the students to:								
<ol style="list-style-type: none"> 1. Introduce the fundamental concepts of IoT and physical computing. 2. Expose the student to a variety of embedded boards and IoT Platforms. 3. Create a basic understanding of the communication protocols in IoT communications. 4. Familiarize the student with application program interfaces for IoT. 5. Enable students to create simple IoT applications. 								
UNIT-I								Classes: 09
Overview of IoT: The Internet of Things: An Overview, The Flavour of the Internet of Things, The "Internet" of "Things", The Technology of the Internet of Things, Enchanted Objects, Who is Making the Internet of Things? Design Principles for Connected Devices: Calm and Ambient Technology, Privacy, Web Thinking for Connected Devices, Affordances, Prototyping: Sketching, Familiarity, Costs Vs Ease of Prototyping, Prototypes and Production, Open source Vs Close source, Tapping into the community.								
UNIT-II								Classes: 10
Embedded Devices: Electronics, Embedded Computing Basics, Arduino, Raspberry Pi, Mobile phones and tablets, Plug Computing: Always-on Internet of Things.								
UNIT-III								Classes: 10
Communication in the IoT: Internet Communications: An Overview, IP Addresses, MAC Addresses, TCP and UDP Ports, Application Layer Protocols Prototyping Online Components: Getting Started with an API, Writing a New API, Real-Time Reactions, Other Protocols Protocol.								
UNIT-IV								Classes: 10
Business Models: A short history of business models, The business model canvas, Who is the business model for, Models, Funding an Internet of Things startup, Lean Startups. Manufacturing: What are you producing, Designing kits, Designing printed circuit boards.								
UNIT- V								Classes: 09
Manufacturing continued: Manufacturing printed circuit boards, Mass-producing the case and other fixtures, Certification, Costs, Scaling up software, Ethics: Characterizing the Internet of Things, Privacy, Control, Environment, Solutions.								
Text Books:								
<ol style="list-style-type: none"> 1. Internet of Things - A Hands-on Approach, Arshdeep Bahga and Vijay Madiseti, Universities Press, 2015, ISBN: 9788173719547 R16 B.TECH ECM. 2. Getting Started with Raspberry Pi, Matt Richardson & Shawn Wallace, O'Reilly (SPD), 2014, ISBN: 9789350239759.

ADVANCE COMMUNICATIVE ENGLISH LABORATORY

B.Tech II Year II Semester

Course code	Category	Hours/week			Credits		Maximum Marks		
		L	T	P	C	CIA	SEE	TOTAL	
20CA52401	Foundation	0	0	3	1.5	30	70	100	

Contact Classes: Nil Tutorial Classes: Nil Practical Classes: 48 Total Classes: 48

OBJECTIVES:

The course should enable the students to :

1. The course allows the students to use multi-media instruction for language development
2. To improve the students' fluency in English and enable them to listen the English spoken at normal conversational speed by educated English speakers and respond appropriately in different socio-cultural and Professional contexts.
3. Further, they would be required to communicate their ideas relevantly and coherently in writing and placing MNCs.

List of Topics

1. Syllables, stress & Intonation
2. Listening Skills
3. Report writing
4. Book review
5. Film review
6. Grooming
7. Non-verbal skills(Body Language)
8. Power Point Presentation(Ppt)
9. Group Discussion II
10. Time management
11. Stress management
12. Problem solving & Decision Making
13. Corporate Etiquettes
14. SWOT Analysis
15. Interview Skills II

Minimum Requirements for SOFT SKILLS Lab:

Soft Skills Laboratory shall have the following infra-structural facilities to accommodate at least 60 students in the lab:

1. Spacious room with appropriate acoustics.
2. Round Tables with movable chairs
3. Audio-visual aids
4. LCD Projector
5. Public Address system
6. P – IV Processor, Hard Disk – 80 GB, RAM–512 MB Minimum, Speed – 2.8 GHZ
7. T. V, a digital stereo & Camcorder
8. Headphones of High quality

Suggested Software:

1. Walden Info tech: Advanced English Communication Skills Lab
2. K-VAN SOLUTIONS-Advanced English Language Communication Skills lab
3. DELTA's key to the Next Generation TOEFL Test: Advanced Skills Practice.
4. TOEFL & GRE(KAPLAN, AARCO & BARRONS, USA, Cracking GRE by CLIFFS)
5. Train2success.com

COMMUNICATIVE ENGLISH LABORATORY

B.Tech I Year I Semester

Course Code	Category	Hours/week			Credits	Maximum Marks		
		L	T	P		CIA	SEE	TOTAL
20CA52102	Foundation	0	0	3	1.5	30	70	100
Contact classes: 0	Tutorial Classes:0	Practical Classes:48			Total Classes:48			

COURSE OBJECTIVES:

The course should enable the

1. Students will be exposed to a variety of self instructional, learner friendly modes of language learning.
2. Students will learn better pronunciation through stress, intonation and rhythm.
3. Students will be trained to use language effectively to face interviews, group discussions, public speaking.
4. Students will be initiated into greater use of the computer in resume preparation, report writing, format making etc.

List of Topics

1. Phonetics
2. Reading comprehension
3. Describing objects/places/persons
4. Role Play or Conversational Practice
5. JAM
6. Etiquettes of Telephonic Communication
7. Information Transfer
8. Note Making and Note Taking
9. E-mail Writing
10. Group Discussions-I
11. Resume Writing
12. Debates
13. Oral Presentations
14. Poster Presentation
15. Interviews Skills-I

Minimum Requirements for ELCS Lab:

The English Language Lab shall have two parts:

1. Computer Assisted Language Learning (CALL) Lab: The Computer aided Language Lab for 60 students with 60 systems, one master console, LAN facility and English language software for self study by learners.
2. The Communication Skills Lab with movable chairs and audio-visual aids with a P.A. system, Projector, a digital stereo-audio & video system and camcorder etc.

System Requirement (Hardware component):

Computer network with LAN with minimum 60 multimedia systems with the following specifications:

- i) P – IV Processor
 - a) Speed – 2.8 GHZ
 - b) RAM – 512 MB Minimum
 - c) Hard Disk – 80 GB
- ii) Headphones of High quality

Suggested Software:

1. Clarity Pronunciation Power – Part I (Sky Pronunciation)
2. Clarity Pronunciation Power – part II
3. Van Advanced Communication Skills
4. Walden InfoTech Software.

C PROGRAMMING LANGUAGE**B.Tech I Year II Semester**

Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		CIA	SEE	Total
20CA05101	Foundation	3	0	0	3	30	70	100
Contact Classes:48	Tutorial Classes: Nil	Practical Classes: Nil			Total Classes:48			

COURSE OBJECTIVES:

1. To acquire problem solving skills.
2. To be able to develop flowcharts and algorithms for the given problem.
3. To learn how to write modular programs in C.
4. To enable them to use arrays, pointers, strings and structures in solving problems.

UNIT - I INTRODUCTION **Classes:10**

Introduction to C Language Elements, Variables, Data Types, Operators and Expressions, Constants, Declarations, Operators, Type Conversions, Operator Precedence and Order of Evaluation. Statements: Selection Statements, Iteration Statements, Jump statements: Break, Continue, go to.

UNIT - II ARRAYS **Classes:10**

Accessing Array Elements, Single & Multi Dimensional Arrays. Strings: Declaring, Initialization of a String, Reading and Writing Strings, String manipulation functions from the standard Library, String I/O Functions: gets(), puts().

UNIT - III FUNCTIONS **Classes:10**

Definition, Function Call- Call by Value, Storage Class Specifiers, Understanding the scope of Functions with its Types, the Return Statement, Recursion, Command Line Arguments.

UNIT - IV POINTERS **Classes:9**

Pointer Variables, Pointer Expressions, Pointers And Arrays, Pointers to Strings, Call by Reference, Dynamic Memory Allocation Functions, Problems with Pointers, Dangling pointers.

UNIT -V STRUCTURES AND UNIONS **Classes:9**

Accessing structure members, Array of structures, Passing Structures to Functions, Structure Pointers, Self Referential Structures, Structures within Structures, Bit Fields, Enumerations, Typedef. Files handling in C, File oriented operations.

Text Books:

C PROGRAMMING LAB

B.Tech I Year II Semester

Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		CIA	SEE	Total
20CA05102	Foundation	0	0	3	1.5	30	70	100
Contact Classes: Nil		Tutorial Classes: Nil		Practical Classes: 48		Total Classes: 48		

COURSE OBJECTIVES:

1. Learn C Programming language.
2. To make the student solve problems, implement algorithms using C language.
3. To write diversified solutions using C language.

LIST OF PROGRAMS

Week -1

Write C program to

- a) Print the size of all data types.
- b) Find the Sum of three numbers
- c) Exchange (swap) of two numbers by using third variable.
- d) Exchange (swap) of two numbers without using third variable.

Week - 2

- a) Develop a calculator to convert time, distance, area, volume and temperature from one unit to another.
- b) Write a C program to find the Priority and associativity of operators using expressions. Take the expressions with different operators.
- c) Write a C program to swap two numbers using bitwise operators.

Week - 3

- a) Write a C program to find whether the given integer is odd or even.
- b) Write a C program to find the Maximum of three numbers.
- c) Write a C program to print 'hello world' without using semicolon.
- d) Write a C program to find whether the given number is odd or even using bitwise operator.
- e) Write a C program to find the maximum of two numbers using Conditional operator.
- f) Write a program which takes two integers and one arithmetic operator from the user, and performs the operation and then prints the result by using **switch-case**. (Operators : +, -, *, /, %)

Week -4

- a) Write a C program to generate the required multiplication table.
- b) Write a C program to find the Factorial of a given integer.
- c) Write a C program to compute x power of n (x^n) without using built in functions.
- d) Write a C program to check whether the given integer is prime or not.
- e) Write a C program to find GCD

Week - 5

- a) Write a C program to find the sum of the digits of an integer.
- b) Write a C program to find whether the given integer is a Palindrome or not.
- c) Write a C program to generate Fibonacci numbers in the given range.

Week - 6

COMMUNICATIVE ENGLISH

B.Tech I Year I Semester

Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		CIA	SEE	TOTAL
20CA52101	Foundation	3	0	0	3	30	70	100

Contact Classes: 48 Tutorial Classes: Nil Practical Classes: Nil Total Classes: 48

COURSE OBJECTIVES:

1. Facilitate effective listening skills for better comprehension of academic lectures and English spoken by native speakers.
2. Focus on appropriate reading strategies for comprehension of various academic texts and authentic materials.
3. Help improve speaking skills through participation in activities such as role plays, discussions and structured talks/oral presentations.
4. Impart effective strategies for good writing and demonstrate the same in summarizing, writing well organized essays, record and report useful information.
5. Provide knowledge of grammatical structures and vocabulary and encourage their appropriate use in speech and writing.

UNIT-I	Lesson: On the Conduct of Life: William Hazlitt	Classes:10
---------------	--	-------------------

Listening: Identifying the topic, the context and specific pieces of information by listening to short audio texts and answering a series of questions.

Speaking: Asking and answering general questions on familiar topics such as home, family, work, studies and interests; introducing oneself and others.

Reading: Skimming to get the main idea of a text; scanning to look for specific pieces of information.

Reading for Writing: Beginnings and endings of paragraphs - introducing the topic, summarizing the main idea and/or providing a transition to the next paragraph.

Grammar and Vocabulary: Content words and function words; word forms: verbs, nouns, adjectives and adverbs; nouns: countables and uncountables; singular and plural; basic sentence structures; simple question form - wh-questions; word order in sentences.

Learning Outcomes

At the end of the module, the learners will be able to

- Understand social or transactional dialogues spoken by native speakers of English and identify the context, topic, and pieces of specific information
- Ask and answer general questions on familiar topics and introduce oneself/others
- Employ suitable strategies for skimming and scanning to get the general idea of a text and locate specific information
- Recognize paragraph structure and be able to match beginnings/endings/headings with paragraphs
- Form sentences using proper grammatical structures and correct word forms

UNIT-II	Lesson: The Brook: Alfred Tennyson	Classes:10
----------------	---	-------------------

Listening: Answering a series of questions about main idea and supporting ideas after listening to audio texts.

Speaking: Discussion in pairs/ small groups on specific topics followed by short structured talks.

Reading: Identifying sequence of ideas; recognizing verbal techniques that help to link the ideas in a paragraph together.

Writing: Paragraph writing (specific topics) using suitable cohesive devices; mechanics of writing - punctuation, capital letters.

Grammar and Vocabulary: Cohesive devices - linkers, sign posts and transition signals; use of articles and zero article; prepositions.

Learning Outcomes

Ramanna
DIRECTOR

At the end of the module, the learners will be able to

- Comprehend short talks on general topics
- Participate in informal discussions and speak clearly on a specific topic using suitable discourse markers
- Understand the use of cohesive devices for better reading comprehension
- Write well structured paragraphs on specific topics
- Identify basic errors of grammar/ usage and make necessary corrections in short texts

UNIT-III Lesson: The Death Trap: Saki

Classes:10

Listening: Listening for global comprehension and summarizing what is listened to.

Speaking: Discussing specific topics in pairs or small groups and reporting what is discussed **Reading:** Reading a text in detail by making basic inferences -recognizing and interpreting specific context clues; strategies to use text clues for comprehension.

Writing: Summarizing - identifying main idea/s and rephrasing what is read; avoiding redundancies and repetitions.

Grammar and Vocabulary: Verbs - tenses; subject-verb agreement; direct and indirect speech, reporting verbs for academic purposes.

Learning Outcomes

At the end of the module, the learners will be able to

- Comprehend short talks and summarize the content with clarity and precision
- Participate in informal discussions and report what is discussed
- Infer meanings of unfamiliar words using contextual clues
- Write summaries based on global comprehension of reading/listening texts
- Use correct tense forms, appropriate structures and a range of reporting verbs in speech and writing

UNIT-IV Lesson: Innovation: Muhammad Yunus

Classes:09

Listening: Making predictions while listening to conversations/ transactional dialogues without video; listening with video.

Speaking: Role plays for practice of conversational English in academic contexts (formal and informal) - asking for and giving information/directions.

Reading: Studying the use of graphic elements in texts to convey information, reveal 46 trends/patterns/relationships, communicate processes or display complicated data.

Writing: Letter Writing: Official Letters/Report Writing

Grammar and Vocabulary: Quantifying expressions - adjectives and adverbs; comparing and contrasting; Voice - Active & Passive Voice

Learning Outcomes

At the end of the module, the learners will be able to

- Infer and predict about content of spoken discourse
- Understand verbal and non-verbal features of communication and hold formal/informal conversations
- Interpret graphic elements used in academic texts
- Produce a coherent paragraph interpreting a figure/graph/chart/table
- Use language appropriate for description and interpretation of graphical elements

UNIT-V Lesson: Politics and the English Language: George Orwell

Classes:09

Listening: Identifying key terms, understanding concepts and answering a series of relevant questions that test comprehension.

Speaking: Formal oral presentations on topics from academic contexts - without the use of PPT slides.

Reading: Reading for comprehension.

Writing: Writing structured essays on specific topics using suitable claims and evidences

Grammar and Vocabulary: Editing short texts -identifying and correcting common errors in grammar and usage (articles, prepositions, tenses, subject verb agreement)

Learning Outcomes

At the end of the module, the learners will be able to

DIRECTOR

Chadalawada Ramanna Engineering College
(AUTONOMOUS)
TIRUPATI

- Take notes while listening to a talk/lecture and make use of them to answer questions
- Make formal oral presentations using effective strategies
- Comprehend, discuss and respond to academic texts orally and in writing
- Produce a well-organized essay with adequate support and detail
- Edit short texts by correcting common errors

Text Books:

6. Norman Lewis Word Power Made Easy- The Complete Handbook for Building a Superior Vocabulary (2014).
7. Speed Reading with the Right Brain: Learn to Read Ideas Instead of Just Words by David Butler.

COURSE OUTCOMES:

Upon the successful completion of the course, the student will be able to

- CO1: Demonstrate to overcome the barriers in communication process using non-verbal language suitable to different situations in professional life to become effective technical communicator.
- CO2: Apply the knowledge on social or transactional dialogues spoken by native speakers of English and identify the context, topic, and pieces of specific information.
- CO3: Exhibit the knowledge on cohesive devices for better conversation in informal discussions and speak clearly on a specific topic using suitable discourse markers.
- CO4: Apply the concepts of Entrepreneurship Skills and Analyze discourse markers to speak clearly on a specific topic in informal discussions and create coherent paragraph writing.
- CO5: Apply the Knowledge to recognize the need of ability to engage in independent and life-long learning communication effectively in English over speech.

C PROGRAMMING LANGUAGE**B.Tech I Year II Semester**

Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		CIA	SEE	Total
20CA05101	Foundation	3	0	0	3	30	70	100
Contact Classes:48	Tutorial Classes: Nil	Practical Classes: Nil			Total Classes:48			

COURSE OBJECTIVES:

1. To acquire problem solving skills.
2. To be able to develop flowcharts and algorithms for the given problem.
3. To learn how to write modular programs in C.
4. To enable them to use arrays, pointers, strings and structures in solving problems.

UNIT - I	INTRODUCTION	Classes:10
-----------------	---------------------	-------------------

Introduction to C Language Elements, Variables, Data Types, Operators and Expressions, Constants, Declarations, Operators, Type Conversions, Operator Precedence and Order of Evaluation. Statements: Selection Statements, Iteration Statements, Jump statements: Break, Continue, go to.

UNIT - II	ARRAYS	Classes:10
------------------	---------------	-------------------

Accessing Array Elements, Single & Multi Dimensional Arrays. Strings: Declaring, Initialization of a String, Reading and Writing Strings, String manipulation functions from the standard Library, String I/O Functions: gets(), puts().

UNIT - III	FUNCTIONS	Classes:10
-------------------	------------------	-------------------

Definition, Function Call- Call by Value, Storage Class Specifiers, Understanding the scope of Functions with its Types, the Return Statement, Recursion, Command Line Arguments.

UNIT - IV	POINTERS	Classes:9
------------------	-----------------	------------------

Pointer Variables, Pointer Expressions, Pointers And Arrays, Pointers to Strings, Call by Reference, Dynamic Memory Allocation Functions, Problems with Pointers, Dangling pointers.

UNIT - V	STRUCTURES AND UNIONS	Classes:9
-----------------	------------------------------	------------------

Accessing structure members, Array of structures, Passing Structures to Functions, Structure Pointers, Self Referential Structures, Structures within Structures, Bit Fields, Enumerations, Typedef. Files handling in C, File oriented operations.

Contact Classes: Nil	Tutorial Classes: Nil	Practical Classes: 48			Total Classes:48			

COURSE OBJECTIVES:

1. Learn C Programming language.
2. To make the student solve problems, implement algorithms using C language.
3. To write diversified solutions using C language.

LIST OF PROGRAMS**Week -1**

Write C program to

- a) Print the size of all data types.
- b) Find the Sum of three numbers
- c) Exchange (swap) of two numbers by using third variable.
- d) Exchange (swap) of two numbers without using third variable.

Week - 2

- a) Develop a calculator to convert time, distance, area, volume and temperature from one unit to another.
- b) Write a C program to find the Priority and associativity of operators using expressions. Take the expressions with different operators.
- c) Write a C program to swap two numbers using bitwise operators.

Week - 3

- a) Write a C program to find whether the given integer is odd or even.
- b) Write a C program to find the Maximum of three numbers.
- c) Write a C program to print 'hello world' without using semicolon.
- d) Write a C program to find whether the given number is odd or even using bitwise operator.
- e) Write a C program to find the maximum of two numbers using Conditional operator.
- f) Write a program which takes two integers and one arithmetic operator from the user, and performs the operation and then prints the result by using **switch-case**.(Operators : +, -, *, /, %)

Week -4

- a) Write a C program to generate the required multiplication table.
- b) Write a C program to find the Factorial of a given integer.
- c) Write a C program to compute x power of n (x^n) without using built in functions.
- d) Write a C program to check whether the given integer is prime or not.
- e) Write a C program to find GCD

Week - 5

- a) Write a C program to find the sum of the digits of an integer.
- b) Write a C program to find whether the given integer is a Palindrome or not.
- c) Write a C program to generate Fibonacci numbers in the given range.

Week - 6**DIRECTOR**Chaitanya Engineering College
(AUTONOMOUS)
TIRUPATI

	<p>a) Write a C program to print the following pattern.</p> <pre> 1 2 2 3 3 3 </pre> <p>b) Print multiplication tables up to the given table.</p> <p>c) Write a C program to print series of prime numbers in the given range.</p>
Week - 7	
	<p>a) Write a C program to check whether the given integer is strong number or not.</p> <p>b) Write a C program to evaluate the sum of the following series up to 'n' terms</p> $e^x = 1 + x + \frac{x^2}{2!} + \frac{x^3}{3!} + \frac{x^4}{4!} + \dots$
Week - 8	
	<p>a) Compute the maximum, minimum and average of N numbers.</p> <p>b) Write a C program to find the sum of positive and negative numbers in a given set(Array) of numbers.</p> <p>c) Write a program to implement linear search technique</p> <p>d) Write a C program to read two matrices and find</p> <p>i) Sum. ii) Product and display the result in the matrix form.</p>
Week -9	
	<p>a) Write a C program to read a matrix and perform the following operations</p> <p>i) Find the sum of Diagonal Elements of a matrix.</p> <p>ii) Print Transpose of a matrix.</p> <p>iii) Print sum of even and odd numbers in a given matrix.</p>
Week - 10	
	<p>a) Write a C program to read two strings and perform the following operations without using built-in string library functions.</p> <p>i) String length determination.</p> <p>ii) Compare Two Strings.</p> <p>iii) Concatenate Two Strings.</p> <p>iv) String reversing</p> <p>v) Determining whether a string is a palindrome or not</p> <p>b) Write a C program to accept a line of characters and print the number of Vowels, Consonants, blank spaces, digits and special characters.</p> <p>c) Write a C program to read a set of strings and sort them in alphabetical order.</p>
Week -11	
	<p>a) Write a C program to illustrate the following types of functions</p> <p>i) Function with no arguments and no return values</p> <p>ii) Function with arguments and no return value</p> <p>iii) Function without arguments and with return value</p> <p>iv) Function with arguments and with return value</p>
Week - 12	
	<p>a) Write a C program to exchange two numbers using pointers.</p> <p>b) Write a program to print the elements of an array in reverse order using pointers.</p>
Week - 13	
	<p>a) Write a C program to express a four digit number in words. For example 1546 should be written as one thousand five hundred and forty six</p> <p>b) Write a C program using recursion for finding Factorial of a number</p> <p>c) Calculate the greatest common divisor using recursion for two numbers as specified by</p>

COURSE OBJECTIVES:

The course should enable the

1. Students will be exposed to a variety of self instructional, learner friendly modes of language learning.
2. Students will learn better pronunciation through stress, intonation and rhythm.
3. Students will be trained to use language effectively to face interviews, group discussions, public speaking.
4. Students will be initiated into greater use of the computer in resume preparation, report writing, format making etc.

List of Topics

1. Phonetics
2. Reading comprehension
3. Describing objects/places/persons
4. Role Play or Conversational Practice
5. JAM
6. Etiquettes of Telephonic Communication
7. Information Transfer
8. Note Making and Note Taking
9. E-mail Writing
10. Group Discussions-I
11. Resume Writing
12. Debates
13. Oral Presentations
14. Poster Presentation
15. Interviews Skills-I

Minimum Requirements for ELCS Lab:

The English Language Lab shall have two parts:

1. Computer Assisted Language Learning (CALL) Lab: The Computer aided Language Lab for 60 students with 60 systems, one master console, LAN facility and English language software for self study by learners.
2. The Communication Skills Lab with movable chairs and audio-visual aids with a P.A. system, Projector, a digital stereo-audio & video system and camcorder etc.

System Requirement (Hardware component):

Computer network with LAN with minimum 60 multimedia systems with the following specifications:

- i) P – IV Processor
 - a) Speed – 2.8 GHZ
 - b) RAM – 512 MB Minimum
 - c) Hard Disk – 80 GB
- ii) Headphones of High quality

Suggested Software:

1. Clarity Pronunciation Power – Part I (Sky Pronunciation)
2. Clarity Pronunciation Power – part II
3. K-Van Advanced Communication Skills
4. Walden InfoTech Software.
5. Orel
6. Young India Films

COURSE OBJECTIVES:

1. Learn C Programming language.
2. To make the student solve problems, implement algorithms using C language.
3. To write diversified solutions using C language.

LIST OF PROGRAMS

Week -1

Write C program to

- a) Print the size of all data types.
- b) Find the Sum of three numbers
- c) Exchange (swap) of two numbers by using third variable.
- d) Exchange (swap) of two numbers without using third variable.

Week - 2

- a) Develop a calculator to convert time, distance, area, volume and temperature from one unit to another.
- b) Write a C program to find the Priority and associativity of operators using expressions. Take the expressions with different operators.
- c) Write a C program to swap two numbers using bitwise operators.

Week - 3

- a) Write a C program to find whether the given integer is odd or even.
- b) Write a C program to find the Maximum of three numbers.
- c) Write a C program to print 'hello world' without using semicolon.
- d) Write a C program to find whether the given number is odd or even using bitwise operator.
- e) Write a C program to find the maximum of two numbers using Conditional operator.
- f) Write a program which takes two integers and one arithmetic operator from the user, and performs the operation and then prints the result by using **switch-case**.(Operators : +, -, *, /, %)

Week -4

- a) Write a C program to generate the required multiplication table.
- b) Write a C program to find the Factorial of a given integer.
- c) Write a C program to compute x power of n (x^n) without using built in functions.
- d) Write a C program to check whether the given integer is prime or not.
- e) Write a C program to find GCD

Week - 5

- a) Write a C program to find the sum of the digits of an integer.
- b) Write a C program to find whether the given integer is a Palindrome or not.
- c) Write a C program to generate Fibonacci numbers in the given range.

Week - 6

[Signature]
DIRECTOR

Chaitanya Engineering College
(AUTONOMOUS)
TIRUPATI

a) Write a C program to print the following pattern.

```
1
2 2
3 3 3
```

b) Print multiplication tables up to the given table.

c) Write a C program to print series of prime numbers in the given range.

Week - 7

a) Write a C program to check whether the given integer is strong number or not.

b) Write a C program to evaluate the sum of the following series up to 'n' terms

$$e^x = 1 + x + x^2/2! + x^3/3! + x^4/4! + \dots$$

Week - 8

a) Compute the maximum, minimum and average of N numbers.

b) Write a C program to find the sum of positive and negative numbers in a given set(Array) of numbers.

c) Write a program to implement linear search technique

d) Write a C program to read two matrices and find

i) Sum. ii) Product and display the result in the matrix form.

Week -9

a) Write a C program to read a matrix and perform the following operations

i) Find the sum of Diagonal Elements of a matrix.

ii) Print Transpose of a matrix.

iii) Print sum of even and odd numbers in a given matrix.

Week - 10

a) Write a C program to read two strings and perform the following operations without using built-in string library functions.

i) String length determination.

ii) Compare Two Strings.

iii) Concatenate Two Strings.

iv) String reversing

v) Determining whether a string is a palindrome or not

b) Write a C program to accept a line of characters and print the number of Vowels, Consonants, blank spaces, digits and special characters.

c) Write a C program to read a set of strings and sort them in alphabetical order.

Week -11

a) Write a C program to illustrate the following types of functions

i) Function with no arguments and no return values

ii) Function with arguments and no return value

iii) Function without arguments and with return value

iv) Function with arguments and with return value

Week - 12

a) Write a C program to exchange two numbers using pointers.

b) Write a program to print the elements of an array in reverse order using pointers.

Week -13

a) Write a C program to express a four digit number in words. For example 1546 should be written as one thousand five hundred and forty six

b) Write a C program using recursion for finding Factorial of a number

c) Calculate the greatest common divisor using recursion for two numbers as specified by

Classes:09

Listening: Making predictions while listening to conversations/ transactional dialogues without video; listening with video.

Speaking: Role plays for practice of conversational English in academic contexts (formal and informal) - asking for and giving information/directions.

Reading: Studying the use of graphic elements in texts to convey information, reveal 46 trends/patterns/relationships, communicate processes or display complicated data.

Writing: Letter Writing: Official Letters/Report Writing

Grammar and Vocabulary: Quantifying expressions - adjectives and adverbs; comparing and contrasting; Voice - Active & Passive Voice

Learning Outcomes

At the end of the module, the learners will be able to

- Infer and predict about content of spoken discourse
- Understand verbal and non-verbal features of communication and hold formal/informal conversations
- Interpret graphic elements used in academic texts
- Produce a coherent paragraph interpreting a figure/graph/chart/table
- Use language appropriate for description and interpretation of graphical elements

UNIT-V Lesson: Literatures and the English Language: George Orwell

Classes:09

Listening: Identifying key terms, understanding concepts and answering a series of relevant questions that test comprehension.

Speaking: Formal presentations on topics from academic contexts - without the use of PPT slides.

Reading: Reading for comprehension.

Writing: Writing essays on specific topics using suitable claims and evidences

Grammar and Vocabulary: Editing short texts -identifying and correcting common errors in grammar and usage (articles, prepositions, tenses, subject verb agreement)

Learning Outcomes

At the end of the module, the learners will be able to

[Handwritten Signature]

COMMUNICATIVE ENGLISH LABORATORY

B.Tech I Year I Semester

Course Code	Category	Hours/week			Credits	Maximum Marks		
		L	T	P		CIA	SEE	TOTAL
20CA52102	Foundation	0	0	3	1.5	30	70	100

Contact classes: 0 Tutorial Classes:0 Practical Classes:48 Total Classes:48

COURSE OBJECTIVES:

The course should enable the

1. Students will be exposed to a variety of self instructional, learner friendly modes of language learning.
2. Students will learn better pronunciation through stress, intonation and rhythm.
3. Students will be trained to use language effectively to face interviews, group discussions, public speaking.
4. Students will be initiated into greater use of the computer in resume preparation, report writing, format making etc.

List of Topics

1. Phonetics
2. Reading comprehension
3. Describing objects/places/persons
4. Role Play or Conversational Practice
5. JAM
6. Etiquettes of Telephonic Communication
7. Information Transfer
8. Note Making and Note Taking
9. E-mail Writing
10. Group Discussions-I
11. Resume Writing
12. Debates
13. Oral Presentations
14. Poster Presentation
15. Interview Skills-I

Minimum Requirements for ELCS Lab:

The English Language Lab shall have two parts:

1. Computer Aided Language Learning (CALL) Lab: The Computer aided Language Lab for 60 students with 60 systems, one master console, LAN facility and English language software for self learning centers.
2. The Communication Skills Lab with movable chairs and audio-visual aids with a P.A. system, a digital stereo-audio & video system and camcorder etc.

System Requirements (Hardware component):

Computer systems with LAN with minimum 60 multimedia systems with the following specifications:

- i) Processor:
 - a) Pentium III 450 MHz
 - b) RAM: 1GB Minimum
 - c) Hard Disk: 40 GB
- ii) Headphones: High quality

Suggested Software

1. Cloze Test Generation Power – Part I (Sky Pronunciation)
2. Cloze Test Generation Power – part II
3. Interview Communication Skills
4. Interview Software.

		0	0	2	1	30	70	100
Contact Classes: Nil	Tutorial Classes: Nil	Practical Classes: 32			Total Classes: 32			
COURSE OBJECTIVES:								
<p>The course should enable the students to:</p> <ol style="list-style-type: none"> 1. Apply knowledge of mathematics, science, and engineering for the analysis and processing of signals and to generate various continuous and discrete time signals using MATLAB tool. 2. Apply the convolution theorem and correlation for continuous time signals. 3. Analyze a continuous time LTI/LTV systems using convolution. 4. Design and conduct experiments on modulation techniques to analyze and interpret results. 								
ANY TEN EXPERIMENTS								
EXP. 1	Basic operations on Matrices.							
EXP. 2	Generation of various signals and sequences such as unit impulse, unit step, triangular, sawtooth, sinusoidal, sinc.							
EXP. 3	Operations on signals and sequences such as addition, multiplication, scaling, shifting, folding.							
EXP. 4	Finding the even and odd parts of signal or sequence and real and imaginary parts of signal.							
EXP. 5	Convolution between signals and sequences.							
EXP. 6	Autocorrelation and cross correlation between signals and sequences.							
EXP. 7	Finding the Fourier Transforms of given signal and plotting its magnitude and phase spectrum.							
EXP. 8	Verification of linearity and time invariance property of a given continuous/discrete system.							
EXP. 9	Verification of Sampling Theorem.							
EXP. 10	Removal of noise by Autocorrelation/Cross correlation in a given signal corrupted by noise.							
EXP. 11	Waveform synthesis using Laplace Transform.							
EXP. 12	Locating Zero's and Pole's, and plotting the pole-zero maps in S-Plane and Z-Plane for given transfer functions.							
COURSE OUTCOMES:								
<p>Upon the successful completion of the course, the student will be able to</p> <p>CO1: Demonstrate the knowledge on the basic concepts of matrices, signals and systems. CO2: Analyze different signal generations and operations. CO3: Develop a MATLAB program to analyze various systems with different signals. CO4: Investigate and analyze different MATLAB programs on signal analysis. CO5: Follow the ethical values in developing the programs with MATLAB. CO6: Do experiments effectively as an individual and as a member in a group. CO7: Communicate verbally and in written form, the understandings about the MATLAB Programs. CO8: Continue updating their analysis and design skills related to various programs based on application during their life time.</p>

Contact Classes:32	Tutorial Classes: NIL	Practical Classes: NIL			Total Classes:32				
COURSE OBJECTIVES:									
<p>The course should enable the students to:</p> <ol style="list-style-type: none"> 1. Help improve speaking skills through participation in activities. 2. Impart effective strategies for good writing and demonstrate the same in summarizing, writing well useful information. 3. Provide knowledge of presentations structures and vocabulary and encourage their appropriate use in speech and writing. 									
UNIT-I								Classes:06	
<ol style="list-style-type: none"> 1. Features of Communication and Forms of Communication. 2. Non-Verbal Communication and Types of Non-verbal Communication. 3. Barriers to Communication and Remedies. <p>Learning Outcomes At the end of the module, the learners will be able to</p> <ul style="list-style-type: none"> ➤ Become effective technical communicators. ➤ Sensitive use of non-verbal language suitable to different situations in professional life. ➤ Understand how to overcome the barriers in Communication process. 									
UNIT-II								Classes:06	
<ol style="list-style-type: none"> 1. Self Introduction-about you 2. English for Etiquette- Greetings-Introducing a person-Congratulating-Complimenting- 3. English for Etiquette - Requesting-Accepting/Declining an invitation-Expressing Gratitude. <p>Learning Outcomes At the end of the module, the learners will be able to</p> <ul style="list-style-type: none"> ➤ Understand social or transactional dialogues spoken by native speakers of English and identify the context, topic, and pieces of specific information ➤ Ask and answer general questions on familiar topics and introduce oneself/others <p>Form sentences using proper grammatical structures and correct word forms</p>									
UNIT-III								Classes:06	
<ol style="list-style-type: none"> 1. Effective usage of Modal Auxiliaries in framing Conversations. 2. Dialogue building-Formal conversation-Semi formal-Informal Conversation. 3. Asking/Giving directions-Asking some for directions-Giving directions <p>Learning Outcomes At the end of the module, the learners will be able to</p> <ul style="list-style-type: none"> ➤ comprehend short talks on general topics ➤ participate in informal discussions and speak clearly on a specific topic using suitable discourse markers ➤ understand the use of cohesive devices for better conversation 									
UNIT-IV								Classes:07	
<ol style="list-style-type: none"> 1. Writing Stories from outline-Developing the hints-How to write stories from the outline given. 2. Letter writing- Informal letter-Formal letter (Business and order)-Official letter. 3. Abstract Writing-Book Review-Film Review <p>Learning Outcomes At the end of the module, the learners will be able to</p> <ul style="list-style-type: none"> ➤ infer meanings of unfamiliar words using contextual clues ➤ write summaries based on global comprehension of reading/listening texts ➤ Use appropriate format for writing memos and produce a coherent paragraph of notice ➤ use language appropriate for description elements 									
UNIT-V								Classes:07	

1. Designing a Resume-Guidelines for a better presentations-Purpose of the Resume-Designing and formatting your Resume with covering letter- Difference between CV & Resume
2. Welcome Speech and Vote of Thanks-Charesteristics of Welcome Speech-Some common welcome quotes-How to write Vote of thanks-The order of speech for vote of thanks.
3. Report Writing- Types of Reports-Project Report

Learning Outcomes

At the end of the module, the learners will be able to

- make formal oral presentations using effective strategies
- write his/her winning Resume
- produce a well-organized speech

Text Books:

1. **Advanced Skills for Communication in English: Book I** by V.JEYA SANTHI Dr.R.SELVAM M.A., M.Phil., Ph.D. - December 2015 with 200 Reads, Publisher: 978-81-2343-101-7, Publisher: New Century Book House

		L	T	P		CIA	SEE	TOTAL
19CA53301	Foundation	2	1	0	3	30	70	100
Contact Classes:32	Tutorial Classes: 16	Practical Classes: Nil			Total Classes:48			
COURSE OBJECTIVES:								
<p>The course should enable the students to:</p> <ol style="list-style-type: none"> 1. Understand the concepts of design thinking approaches. 2. Create design thinking teams and conduct design thinking sessions. 3. Apply both critical thinking and design thinking in parallel to solve problems. 4. Apply some design thinking concepts to their daily work. 								
UNIT-I	INTRODUCTION TO DESIGN THINKING						Classes:09	
Introduction to Design thinking: Concept and its role within new product development and Innovation, Frame work of design thinking, Non linear process, principles and mindset. Inspirational Design Briefing: Nine Criteria, Writing, Research findings, pitfalls to avoid, Keys to success.								
UNIT-II	CUSTOMER EXPERIENCE MAPPING						Classes:10	
Customer Experience Mapping: Inputs to experience mapping, Experience mapping process, Experience map as spring board to innovative solutions.								
UNIT-III	BRIDGE RESEARCH AND CONCEPT DESIGN						Classes:10	
Bridge research and concept design: Challenges in idea generation, Need for systematic method to connect to the user, The Visualize, Empathize and Ideate method, applying the method.								
UNIT-IV	CREATIVITY IN IDEA GENERATION						Classes:10	
Boosting creativity in idea generation using Design heuristics: Design Heuristics, The evidence base, Design heuristics for idea generation, Using Design heuristics to generate design concepts, Evidence of the value of design heuristics tools. The role of design in early stage ventures: An emerging start up culture, Basics, Process, and Troubleshooting common mistakes.								
UNIT-V	CORPORATE CULTURE OF DESIGN THINKING						Classes:09	
Leading for Corporate culture of design thinking: What is corporate culture, Impact of corporate culture, Corporate forces that undermine the design thinking, Four pillars of innovation for enabling design thinking, Four stages of transforming to a culture of design thinking.								
Text Books:

Contact Classes: 45	Tutorial Classes: Nil	Practical Classes: Nil			Total Classes: 45			
Course Objectives:								
The course should enable the students to:								
V. Meliorate the knowledge of fundamentals and types of neural networks.								
VI. Develop the different Algorithms for neural networks.								
VII. Meliorate the knowledge in Fuzzy logic principles.								
VIII. Correlate the principles with applications of neural networks and fuzzy logic.								
UNIT-I	INTRODUCTION TO ARTIFICIAL NEURAL NETWORKS AND LEARNING LAWS						Classes: 11	
Artificial neural networks and their biological motivation, terminology, models of neuron, topology, characteristics of artificial neural networks, types of activation functions, Learning methods: Error correction learning, Hebbian learning, perception, XOR problem, perceptron learning rule convergence theorem, adaline.								
UNIT-II	FEEDFORWARD AND RECURRENT NEURAL NETWORKS						Classes: 08	
Multilayer perception, back propagation learning algorithm, universal function approximation, associative memory, auto association, hetero association, recall and cross talk, linear auto associator, bi-directional associative memory, Hopfield neural network.								
UNIT-III	UNSUPERVISED LEARNING AND SELF ORGANISING NETWORKS						Classes: 09	
Competitive learning neural networks, max net, mexican hat, hamming net. Kohonen self-organizing feature map, counter propagation, learning vector quantization, applications of neural networks in image processing, signal processing, modeling and control.								
UNIT-IV	FUZZY SETS AND FUZZY RELATIONS						Classes: 08	
Introduction, classical sets and fuzzy sets, classical relations and fuzzy relations, Fuzzy set theory and operations, Properties of fuzzy sets, membership functions, fuzzy to crisp conversion, fuzzy arithmetic								
UNIT-V	FUZZY SYSTEMS						Classes: 09	
Fuzzy Logic - Fuzzy Membership, Rules: Membership functions, interference in fuzzy logic, fuzzy if-then rules, Fuzzy implications and Fuzzy algorithms, Fuzzyfication & Defuzzification, Fuzzy Controller, Industrial applications.

COMMUNICATIVE ENGLISH

B.Tech I Year I Semester

Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
20CA52101	Foundation	3	0	0	3	30	70	100
Contact Classes: 48		Tutorial Classes: Nil		Practical Classes: Nil		Total Classes: 48		

COURSE OBJECTIVES:

1. Facilitate effective listening skills for better comprehension of academic lectures and English spoken by native speakers.
2. Focus on appropriate reading strategies for comprehension of various academic texts and authentic materials.
3. Help improve speaking skills through participation in activities such as role plays, discussions and structured talks/oral presentations.
4. Impart effective strategies for good writing and demonstrate the same in summarizing, writing well organized essays, record and report useful information.
5. Provide knowledge of grammatical structures and vocabulary and encourage their appropriate use in speech and writing.

UNIT-I	Lesson: On the Conduct of Life: William Hazlitt	Classes:10
---------------	--	-------------------

Listening: Identifying the topic, the context and specific pieces of information by listening to short audio texts and answering a series of questions.

Speaking: Asking and answering general questions on familiar topics such as home, family, work, studies and interests; introducing oneself and others.

Reading: Skimming to get the main idea of a text; scanning to look for specific pieces of information.

Reading for Writing: Beginnings and endings of paragraphs - introducing the topic, summarizing the main idea and/or providing a transition to the next paragraph.

Grammar and Vocabulary: Content words and function words; word forms; verbs, nouns, adjectives and adverbs; nouns: countables and uncountables; singular and plural; basic sentence structures; simple question form - wh-questions; word order in sentences.

Learning Outcomes

At the end of the module, the learners will be able to

- Understand social or transactional dialogues spoken by native speakers of English and identify the context, topic, and pieces of specific information
- Ask and answer general questions on familiar topics and introduce oneself/others
- Employ suitable strategies for skimming and scanning to get the general idea of a text and locate specific information
- Recognize paragraph structure and be able to match beginnings/endings/headings with paragraphs
- Form sentences using proper grammatical structures and correct word forms

UNIT-II	Lesson: The Brook: Alfred Tennyson	Classes:10
----------------	---	-------------------

Listening: Answering a series of questions about main idea and supporting ideas after listening to audio texts.

Speaking: Discussion in pairs/ small groups on specific topics followed by short structured talks.

Reading: Identifying sequence of ideas; recognizing verbal techniques that help to link the ideas in a paragraph together.

Writing: Paragraph writing (specific topics) using suitable cohesive devices; mechanics of writing - punctuation and capital letters.

Grammar and Vocabulary: Cohesive devices - linkers, sign posts and transition signals; use of articles and zero article; prepositions.

Learning Outcomes

At the end of the module, the learners will be able to

- Comprehend short talks on general topics
- Participate in informal discussions and speak clearly on a specific topic using suitable discourse markers
- Understand the use of cohesive devices for better reading comprehension
- Write well structured paragraphs on specific topics
- Identify basic errors of grammar/ usage and make necessary corrections in short texts

UNIT-III Lesson: The Death Trap: Saki

Classes:10

Listening: Listening for global comprehension and summarizing what is listened to.

Speaking: Discussing specific topics in pairs or small groups and reporting what is discussed **Reading:** Reading a text in detail by making basic inferences -recognizing and interpreting specific context clues; strategies to use text clues for comprehension.

Writing: Summarizing - identifying main idea/s and rephrasing what is read; avoiding redundancies and repetitions.

Grammar and Vocabulary: Verbs - tenses; subject-verb agreement; direct and indirect speech, reporting verbs for academic purposes.

Learning Outcomes

At the end of the module, the learners will be able to

- Comprehend short talks and summarize the content with clarity and precision
- Participate in informal discussions and report what is discussed
- Infer meanings of unfamiliar words using contextual clues
- Write summaries based on global comprehension of reading/listening texts
- Use correct tense forms, appropriate structures and a range of reporting verbs in speech and writing

UNIT-IV Lesson: Innovation: Muhammad Yunus

Classes:09

Listening: Making predictions while listening to conversations/ transactional dialogues without video; listening with video.

Speaking: Role plays for practice of conversational English in academic contexts (formal and informal) - asking for and giving information/directions.

Reading: Studying the use of graphic elements in texts to convey information, reveal 46 trends/patterns/relationships, communicate processes or display complicated data.

Writing: Letter Writing: Official Letters/Report Writing

Grammar and Vocabulary: Quantifying expressions - adjectives and adverbs; comparing and contrasting; Voice - Active & Passive Voice

Learning Outcomes

At the end of the module, the learners will be able to

- Infer and predict about content of spoken discourse
- Understand verbal and non-verbal features of communication and hold formal/informal conversations
- Interpret graphic elements used in academic texts
- Produce a coherent paragraph interpreting a figure/graph/chart/table
- Use language appropriate for description and interpretation of graphical elements

UNIT-V Lesson: Politics and the English Language: George Orwell

Classes:09

Listening: Identifying key terms, understanding concepts and answering a series of relevant questions that test comprehension.

Speaking: Formal oral presentations on topics from academic contexts - without the use of PPT slides.

Reading: Reading for comprehension.

Writing: Writing structured essays on specific topics using suitable claims and evidences

Grammar and Vocabulary: Editing short texts -identifying and correcting common errors in grammar and usage (articles, prepositions, tenses, subject verb agreement)

Learning Outcomes

At the end of the module, the learners will be able to

C PROGRAMMING LANGUAGE

B.Tech I Year II Semester

Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
20CA05101	Foundation	3	0	0	3	30	70	100
Contact Classes:48	Tutorial Classes: Nil	Practical Classes: Nil			Total Classes:48			

COURSE OBJECTIVES:

1. To acquire problem solving skills.
2. To be able to develop flowcharts and algorithms for the given problem.
3. To learn how to write modular programs in C.
4. To enable them to use arrays, pointers, strings and structures in solving problems.

UNIT - I INTRODUCTION **Classes:10**

Introduction to C Language Elements, Variables, Data Types, Operators and Expressions, Constants, Declarations, Operators, Type Conversions, Operator Precedence and Order of Evaluation. Statements: Selection Statements, Iteration Statements, Jump statements: Break, Continue, go to.

UNIT - II ARRAYS **Classes:10**

Accessing Array Elements, Single & Multi Dimensional Arrays. Strings: Declaring, Initialization of a String, Reading and Writing Strings, String manipulation functions from the standard Library, String I/O Functions: gets(), puts().

UNIT - III FUNCTIONS **Classes:10**

Definition, Function Call- Call by Value, Storage Class Specifiers, Understanding the scope of Functions with its Types, the Return Statement, Recursion, Command Line Arguments.

UNIT - IV POINTERS **Classes:9**

Pointer Variables, Pointer Expressions, Pointers And Arrays, Pointers to Strings, Call by Reference, Dynamic Memory Allocation Functions, Problems with Pointers, Dangling pointers.

UNIT - V STRUCTURES AND UNIONS **Classes:9**

Accessing structure members, Array of structures, Passing Structures to Functions, Structure Pointers, Self Referential Structures, Structures within Structures, Bit Fields, Enumerations, Typedef. Files handling in C, File oriented operations.

Text Books:

1. C Programming-A Problem Solving Approach, Forouzan, Gilberg, Cengage.

Contact classes: 0	Tutorial Classes:0	Practical Classes:48			Total Classes:48			

COURSE OBJECTIVES:

The course should enable the

1. Students will be exposed to a variety of self instructional, learner friendly modes of language learning.
2. Students will learn better pronunciation through stress, intonation and rhythm.
3. Students will be trained to use language effectively to face interviews, group discussions, public speaking.
4. Students will be initiated into greater use of the computer in resume preparation, report writing, format making etc.

List of Topics

1. Phonetics
2. Reading comprehension
3. Describing objects/places/persons
4. Role Play or Conversational Practice
5. JAM
6. Etiquettes of Telephonic Communication
7. Information Transfer
8. Note Making and Note Taking
9. E-mail Writing
10. Group Discussions-1
11. Resume Writing
12. Debates
13. Oral Presentations
14. Poster Presentation
15. Interviews Skills-1

Minimum Requirements for ELCS Lab:

The English Language Lab shall have two parts:

1. Computer Assisted Language Learning (CALL) Lab: The Computer aided Language Lab for 60 students with 60 systems, one master console, LAN facility and English language software for self study by learners.
2. The Communication Skills Lab with movable chairs and audio-visual aids with a P.A. system, Projector, a digital stereo-audio & video system and camcorder etc.

System Requirement (Hardware component):

Computer network with LAN with minimum 60 multimedia systems with the following specifications:

- i) P – IV Processor
 - a) Speed – 2.8 GHZ
 - b) RAM – 512 MB Minimum
 - c) Hard Disk – 80 GB
- ii) Headphones of High quality

Suggested Software:

1. Clarity Pronunciation Power – Part I (Sky Pronunciation)
2. Clarity Pronunciation Power – part II
3. K-Van Advanced Communication Skills
4. Walden InfoTech Software.
5. Ortel
6. Young India Films

20CA05102	Foundation	0	0	3	1.5	30	70	100
Contact Classes: Nil		Tutorial Classes: Nil		Practical Classes: 48		Total Classes: 48		

COURSE OBJECTIVES:

1. Learn C Programming language.
2. To make the student solve problems, implement algorithms using C language.
3. To write diversified solutions using C language.

LIST OF PROGRAMS

Week -1

Write C program to

- a) Print the size of all data types.
- b) Find the Sum of three numbers
- c) Exchange (swap) of two numbers by using third variable.
- d) Exchange (swap) of two numbers without using third variable.

Week - 2

- a) Develop a calculator to convert time, distance, area, volume and temperature from one unit to another.
- b) Write a C program to find the Priority and associativity of operators using expressions. Take the expressions with different operators.
- c) Write a C program to swap two numbers using bitwise operators.

Week - 3

- a) Write a C program to find whether the given integer is odd or even.
- b) Write a C program to find the Maximum of three numbers.
- c) Write a C program to print 'hello world' without using semicolon.
- d) Write a C program to find whether the given number is odd or even using bitwise operator.
- e) Write a C program to find the maximum of two numbers using Conditional operator.
- f) Write a program which takes two integers and one arithmetic operator from the user, and performs the operation and then prints the result by using **switch-case**. (Operators : +, -, *, /, %)

Week -4

- a) Write a C program to generate the required multiplication table.
- b) Write a C program to find the Factorial of a given integer.
- c) Write a C program to compute x power of n (x^n) without using built in functions.
- d) Write a C program to check whether the given integer is prime or not.
- e) Write a C program to find GCD

Week - 5

- a) Write a C program to find the sum of the digits of an integer.
- b) Write a C program to find whether the given integer is a Palindrome or not.
- c) Write a C program to generate Fibonacci numbers in the given range.

[Signature]
DIRECTOR

Chandrababu Naidu Engineering College
(AUTONOMOUS)
TIRUPATI

a) Write a C program to print the following pattern.

1
2 2
3 3 3

b) Print multiplication tables up to the given table.

c) Write a C program to print series of prime numbers in the given range.

Week - 7

a) Write a C program to check whether the given integer is strong number or not.

b) Write a C program to evaluate the sum of the following series up to 'n' terms
 $e^x = 1 + x + x^2/2! + x^3/3! + x^4/4! + \dots$

Week - 8

a) Compute the maximum, minimum and average of N numbers.

b) Write a C program to find the sum of positive and negative numbers in a given set(Array) of numbers.

c) Write a program to implement linear search technique

d) Write a C program to read two matrices and find

i) Sum. ii) Product and display the result in the matrix form.

Week -9

a) Write a C program to read a matrix and perform the following operations

i) Find the sum of Diagonal Elements of a matrix.

ii) Print Transpose of a matrix.

iii) Print sum of even and odd numbers in a given matrix.

Week - 10

a) Write a C program to read two strings and perform the following operations without using built-in string library functions.

i) String length determination.

ii) Compare Two Strings.

iii) Concatenate Two Strings.

iv) String reversing

v) Determining whether a string is a palindrome or not

b) Write a C program to accept a line of characters and print the number of Vowels, Consonants, blank spaces, digits and special characters.

c) Write a C program to read a set of strings and sort them in alphabetical order.

Week -11

a) Write a C program to illustrate the following types of functions

i) Function with no arguments and no return values

ii) Function with arguments and no return value

iii) Function without arguments and with return value

iv) Function with arguments and with return value

Week - 12

a) Write a C program to exchange two numbers using pointers.

b) Write a C program to print the elements of an array in reverse order using pointers.

Week -13

a) Write a C program to express a four digit number in words. For example 1546 should be written as one thousand five hundred and forty six

b) Write a C program using recursion for finding Factorial of a number

c) Calculate the greatest common divisor using recursion for two numbers as specified by

COURSE OBJECTIVES:

1. Identify and use of tools, types of joints in carpentry, fitting, tin smithy welding and foundry operations.
2. Understand of electrical wiring and components.

LIST OF EXPERIMENTS (Any 10 of the following experiments has to be performed)

S. No	Name of the Experiment
CARPENTRY	
Exp. 1	Preparation of dove tail joint as per given taper angle.
Exp. 2	Preparation of lap joint as per given dimensions.
Exp. 3	Preparation of Cross Lap joint as per given taper angle.
FITTING	
Exp. 4	Make a square fit for given sizes.
Exp. 5	Make a V Joint for given dimensions.
Exp. 6	Make a half round fit for given dimensions.
TIN SMITHY	
Exp. 7	Prepare the development of a surface and make a rectangular tray.
Exp. 8	Prepare the development of a surface and make a round tin.
FOUNDRY	
Exp. 9	Prepare a single Piece pattern.
Exp. 10	Prepare a Split pattern.
WELDING	
Exp. 11	Preparation of V butt joint
Exp. 12	Preparation of Lap joint
Exp. 13	Preparation of T fillet joint

5. Work shop Manual / P.Kannaiah/ K.L.Narayana/ SciTech Publishers.

COURSE OUTCOMES:

Upon the successful completion of the course, the student will be able to

- CO1: Demonstrate the knowledge on differ tools used in carpentry, fitting, sheet metal, basic machining process, foundry and welding.
- CO2: Analyze the basic principle of carpentry, fitting, sheet metal, basic machining process, foundry and welding.
- CO3: Design small components using different materials include wood, GI sheet, MS plates, foundry and welding.
- CO4: Apply basic carpentry, fitting, sheet metal, basic machining process, foundry and welding.
- CO5: Follow the ethical principles in while doing the exercises.
- CO6: Do the exercises effectively as an individual and as a team member in a group.
- CO7: Communicate verbally among team members and in written form, the understanding about the trade exercises.

COMMUNICATIVE ENGLISH I

B.Tech I Year I Semester								
Course code	Category	Hours/week			Credits	Maximum Marks		
		L	T	P	C	CIA	SEE	Total
19CA52101	Foundation	2	0	0	2	30	70	100
Contact Classes:32	Tutorial Classes: Nil	Practical Classes: Nil			Total Classes:32			
<p>Course Objectives: The course should enable the students to:</p> <ol style="list-style-type: none"> 1. Facilitate effective listening skills for better comprehension of academic lectures and English spoken by native speakers. 2. Focus on appropriate reading strategies for comprehension of various academic texts and authentic materials. 3. Help improve speaking skills through participation in activities such as role plays, discussions and structured talks/oral presentations. 4. Impart effective strategies for good writing and demonstrate the same in summarizing, writing well organized essays, record and report useful information. 5. Provide knowledge of grammatical structures and vocabulary and encourage their appropriate use in speech and writing. 								
UNIT-I						Classes:07		
<p>Listening: Identifying the topic, the context and specific pieces of information by listening to short audio texts and answering a series of questions.</p> <p>Speaking: Asking and answering general questions on familiar topics such as home, family, work, studies and interests; introducing oneself and others.</p> <p>Reading: Skimming to get the main idea of a text; scanning to look for specific pieces of information.</p> <p>Reading for Writing: Beginnings and endings of paragraphs - introducing the topic, summarizing the main idea and/or providing a transition to the next paragraph.</p> <p>Grammar and Vocabulary: Content words and function words; word forms: verbs, nouns, adjectives and adverbs; nouns: countables and uncountables; singular and plural; basic sentence structures; simple question form - wh-questions; word order in sentences.</p> <p>Learning Outcomes At the end of the module, the learners will be able to</p> <ul style="list-style-type: none"> • Understand social or transactional dialogues spoken by native speakers of English and identify the context, topic, and pieces of specific information • Ask and answer general questions on familiar topics and introduce oneself/others • Employ suitable strategies for skimming and scanning to get the general idea of a text and locate specific information • Recognize paragraph structure and be able to match beginnings/endings/headings with paragraphs • Form sentences using proper grammatical structures and correct word forms 								
UNIT-II						Classes:07		
<p>Listening: Answering a series of questions about main idea and supporting ideas after listening to audio texts.</p> <p>Speaking: Discussion in pairs/ small groups on specific topics followed by short structured talks.</p> <p>Reading: Identifying sequence of ideas; recognizing verbal techniques that help to link the ideas in a paragraph together.</p> <p>Writing: Paragraph writing (specific topics) using suitable cohesive devices; mechanics of writing - punctuation, capital letters.</p> <p>Grammar and Vocabulary: Cohesive devices - linkers, sign posts and transition signals; use of articles and zero article; prepositions.</p> <p>Learning Outcomes At the end of the module, the learners will be able to</p> <ul style="list-style-type: none"> • comprehend short talks on general topics • participate in informal discussions and speak clearly on a specific topic using suitable discourse 								

DIRECTOR
 Chadalawada Ramanaiah Engineering College
 (AUTONOMOUS)
 TIRUPATI

markers

- understand the use of cohesive devices for better reading comprehension
- write well structured paragraphs on specific topics
- identify basic errors of grammar/ usage and make necessary corrections in short texts

UNIT-III

Classes:06

Listening: Listening for global comprehension and summarizing what is listened to.

Speaking: Discussing specific topics in pairs or small groups and reporting what is discussed **Reading:** Reading a text in detail by making basic inferences -recognizing and interpreting specific context clues; strategies to use text clues for comprehension.

Writing: Summarizing - identifying main idea/s and rephrasing what is read; avoiding redundancies and repetitions.

Grammar and Vocabulary: Verbs - tenses; subject-verb agreement; direct and indirect speech, reporting verbs for academic purposes.

Learning Outcomes

At the end of the module, the learners will be able to

- comprehend short talks and summarize the content with clarity and precision
- participate in informal discussions and report what is discussed
- infer meanings of unfamiliar words using contextual clues
- write summaries based on global comprehension of reading/listening texts
- use correct tense forms, appropriate structures and a range of reporting verbs in speech and writing.

UNIT-IV

Classes:06

Listening: Making predictions while listening to conversations/ transactional dialogues without video; listening with video.

Speaking: Role plays for practice of conversational English in academic contexts (formal and informal) - asking for and giving information/directions.

Reading: Studying the use of graphic elements in texts to convey information, reveal 46 trends/patterns/relationships, communicate processes or display complicated data.

Writing: Information transfer; describe, compare, contrast, identify significance/trends based on information provided in figures/charts/graphs/tables.

Grammar and Vocabulary:Quantifying expressions - adjectives and adverbs; comparing and contrasting; degrees of comparison; use of antonyms

Learning Outcomes

At the end of the module, the learners will be able to

- infer and predict about content of spoken discourse
- understand verbal and non-verbal features of communication and hold formal/informal conversations
- interpret graphic elements used in academic texts
- produce a coherent paragraph interpreting a figure/graph/chart/table
- use language appropriate for description and interpretation of graphical elements

UNIT-V

Classes:06

Listening: Identifying key terms, understanding concepts and answering a series of relevant questions that test comprehension.

Speaking: Formal oral presentations on topics from academic contexts - without the use of PPT slides.

Reading: Reading for comprehension.

Writing: Writing structured essays on specific topics using suitable claims and evidences

Grammar and Vocabulary: Editing short texts -identifying and correcting common errors in grammar and usage (articles, prepositions, tenses, subject verb agreement)

Learning Outcomes

At the end of the module, the learners will be able to

- take notes while listening to a talk/lecture and make use of them to answer questions
- make formal oral presentations using effective strategies
- comprehend, discuss and respond to academic texts orally and in writing

15A04605 **MATLAB PROGRAMMING**
(CBCS-I)

Objectives:

- Understand the MATLAB Desktop, Command window and the Graph Window
- Be able to do simple and complex calculation using MATLAB
- Be able to carry out numerical computations and analyses
- Understand the mathematical concepts upon which numerical methods rely
- Ensure you can competently use the MATLAB programming environment
- Understand the tools that are essential in solving engineering problems

1. UNIT-I: Introduction to MATLAB

MATLAB Interactive Sessions, Menus and the toolbar, computing with MATLAB, Script files and the Editor Debugger, MATLAB Help System, Programming in MATLAB.

2. UNIT-II: Arrays

Arrays, Multidimensional Arrays, Element by Element Operations, Polynomial Operations Using Arrays, Cell Arrays, Structure Arrays.

3. UNIT-III: Functions & Files

Elementary Mathematical Functions, User Defined Functions, Advanced Function Programming, Working with Data Files.

4. UNIT-IV: Programming Techniques

Program Design and Development, Relational Operators and Logical Variables, Logical Operators and Functions, Conditional Statements, Loops, the Switch Structure, Debugging Mat Lab Programs.

Plotting :XY- plotting functions, Subplots and Overlay plots, Special Plot types, Interactive plotting, Function Discovery, Regression, 3-D plots.

5. UNIT-V: Linear Algebraic Equations

Elementary Solution Methods, Matrix Methods for (Linear Equations), Cramer's Method, Under-determined Systems, Order Systems.

15A04506 **MEMS & MICRO SYSTEMS**
(MOCS-I)

UNIT I

Introduction: Introduction to MEMS & Microsystems, Introduction to Microsensors, Evaluation of MEMS, Microsensors, Market Survey, Application of MEMS, MEMS Materials, MEMS Materials Properties, MEMS Materials Properties.

UNIT II

Microelectronic Technology for MEMS: Microelectronic Technology for MEMS, Micromachining Technology for MEMS, Micromachining Process, Etch Stop Techniques and Microstructure, Surface and Quartz Micromachining, Fabrication of Micromachined Microstructure, Microstereolithography,

UNIT III

Micro Sensors: MEMS Microsensors, Thermal Microsensors, Mechanical Micromachined Microsensors, MEMS Pressure Sensor, MEMS Flow Sensor, Micromachined Flow Sensors, MEMS Inertial Sensors, MEMS Gyro Sensor

UNIT IV

MEMS Accelerometers: Micromachined Micro accelerometers for MEMS, MEMS Accelerometers for Avionics, Temperature Drift and Damping Analysis, Piezoresistive Accelerometer Technology, MEMS Capacitive Accelerometer, MEMS Capacitive Accelerometer Process, MEMS for Space Application.

UNIT V

MEMS Applications: Polymer MEMS & Carbon Nano Tubes CNT, Wafer Bonding & Packaging of MEMS, Interface Electronics for MEMS, Introduction to BioMEMS and Micro Fluidics, Introduction to Bio Nano Technology, Bio Sensors, Fluidics, MEMS for Biomedical Applications (Bio-MEMS)

Text Books:

1. Nadim Maluf Kirt Williams "An Introduction to Microelectromechanical Systems Engineering", Second Edition, Artech House, Inc. Boston London, International Standard Book Number: 1-58053-590-9.
2. Varadan, V Kand Varadan "Microsensors, actuators, MEMS, and electronics for smart structures" Rai-Choudhury P (ed.) Handbook of Microlithography, Micromachining, and Microfabrication, SPIE Optical Engineering Press

15A04507 IC APPLICATIONS LABORATORY

All experiments are based upon 741 / TL 082/ASLK Kits.

1. Study the characteristics of negative feedback amplifier
2. Design of an instrumentation amplifier
3. Study the characteristics of regenerative feedback system with extension to design an astablemultivibrator
4. Study the characteristics of integrator circuit
5. Design of Analog filters – I
6. Design of Analog filters – II
7. Design of a self-tuned Filter
8. Design of a function generator
9. Design of a Voltage Controlled Oscillator
10. Design of a Phase Locked Loop(PLL)
11. Automatic Gain Control (AGC) Automatic Volume Control (AVC)
12. Design of a low drop out regulator
13. DC-DC Converter
