

FLIP CLASS:

- The primary purpose of facilitating a meaningful learning for the students began with “Lesson plan”.
- As indicated in the lesson plan, faculty member judiciously combines the usage of blackboard and specifically prepared electronic content in the classroom delivery.
- A “flip class” teaching methodology being a mandatory exercise for the students to deliver a talk/lecture of his/her choice in the classroom has been making a student to indulge prior preparation of the subject content using multiple resources.

A sample of a copy of a documentary evidence of a flip class is attached for ready reference.
